## Executive Summary and Deliverable Outcome:

**Deliverable Title:** Inform Data Subjects of the Existence of Profiling

**Deliverable Description:** If profiling occurs, data subjects will be informed of the existence of the profiling, its possible consequences and how their fundamental rights will be safeguarded.

This deliverable will comprise of a report on the procedures for informing data subjects of the existence of the profiling, its possible consequences and how their fundamental rights will be safeguarded.

The deliverable will be considered successful once delivered to the project coordinator and/or the executive management group.

**Responsible:** UCC

**Outcome Summary:** As no profiling will occur in this project an extended deliverable report is not required.

WP7 run by UCC is the only work package in the XROTOR project that deals with research participants, however UCC have informed the project coordinator that profiling is not envisaged within the component tasks of WP7. Tasks in WP7 will be focused on understanding the characteristics of the communities, rather than profiling the participating individuals. In this regard, UCC clearly communicate this to prospective participants in the briefing document where it is explained that UCC will be involved in the “identification and characterisation of stakeholders in each community, including but not limited to various marine users.” – see deliverable report 1.7.

The project coordinator has accepted the input from UCC that profiling will not occur in WP7, resulting in the completion of deliverable 1.8.
