Digital Era

Teaching & Learning Process

Integration Technology

Learning Management System (LMS)

WHAT IS LMS

Gray (2019)

Software that allows an organization to host, deliver, and track employee or customer training.

Burton (2020)

e-learning tool that helps trainers create, upload, manage, distribute, and track their online training initiatives in one place.

Mardinger (2020)

software-based or Software as a Service (SaaS) platform that facilitates the management, delivery, and measurement of an organization's corporate e-learning programs.

BASIC FEATURES LMS

1 Create and update training modules

2 Importing lessons and students

3 Manage users and control their access levels

4 Quizzes, activities, and assessments

5 Report generation: assessment scores, student progress, and engagement

Cont.   BASIC FEATURES LMS

6   Course calendar and due dates

7   Certificates

8   Drip content and module delivery

9   Email or SMS reminders

10   Social Learning features

WHAT IS CANVAS

Canvas is a learning management system, or LMS, an online learning platform that allows teachers and students to share content and communicate with one another during a course.

WHY USE CANVAS

Canvas tools enhance the teaching power and the student's learning experience.

Grading Control

Students always know where they stand in the course because the Gradebook in Canvas is always available. Canvas makes grading assignments fast and simple. Canvas maintains assignment integrity by enabling uploaded submissions, time-stamped entries, auto-graded assignments, instant feedback, annotations, automatically weighted assignments, and much more. This will eliminate hauling around stacks of student papers and preventing debates about lost assignments.

Automated Tasks

Canvas Assignments use due date settings to trigger reminders to students so they're less likely to miss assignments.

Cloud-Based Course Content

Canvas can organize and store all related materials in one centralized and secure location in a way that is easy for the students to locate and self-serve, which helps limit unnecessary correspondence. Uploading files limits or replaces unnecessary administrative tasks in preparing handouts. Students can access them 24 hours in a week from anywhere.

Communication tools in Canvas can help maximize Students & Teachers interactions

1

Inbox (Messages & Conversations)

The Canvas Inbox functions like an email account that helps teacher communicate with students in all courses. Teacher never have to deal with managing email addresses for the students.

2

Calendar

The global navigation menu displays a Calendar feature populating all of the class assignments to help teacher stay current and prevent missing out on completing an assignment for students or grading instructors..

3

Conferencing

Conferences make it easy to conduct synchronous (real-time) lectures for all of the students in the course, allowing teacher to broadcast real-time audio, video, demo applications on desktop, share presentation slides, or demo online resources. .

4

Chat

The Chat tool gives teacher another option to keep virtual office hours and hold live conversations with students to answer their questions.

5

Discussions

Canvas provides an integrated system for class discussions, allowing both teacher and students to start and contribute to as many discussion topics as desired, integrated with the Canvas Gradebook, or ungraded (such as a forum about current events).

Communication tools in Canvas can help maximize Students & Teachers interactions

6

Collaborative Spaces and Groups

Canvas can provide a virtual space for students to work on collaborative documents and discussions, which are saved in real-time, meaning a change made by any of its users is immediately visible to everyone.

7

Announcements

The students can get important updated information instantly, without having to go through the email accounts or multiple channels outside of Canvas.

8

Notifications

Teacher and students can get alerts through email, text message, or social media.

9

To-Do List

On the course homepage, the To Do List reminds students of upcoming assignment.

10

Assignment Feedback

Teacher can easily give feedback on assignments so students know what is expected.

The Canvas interface: Customizable and Intuitive, aggregating all the elements of a virtual classroom

Navigation

Adaptable navigation and menu options help teacher navigate in a way that's most important.
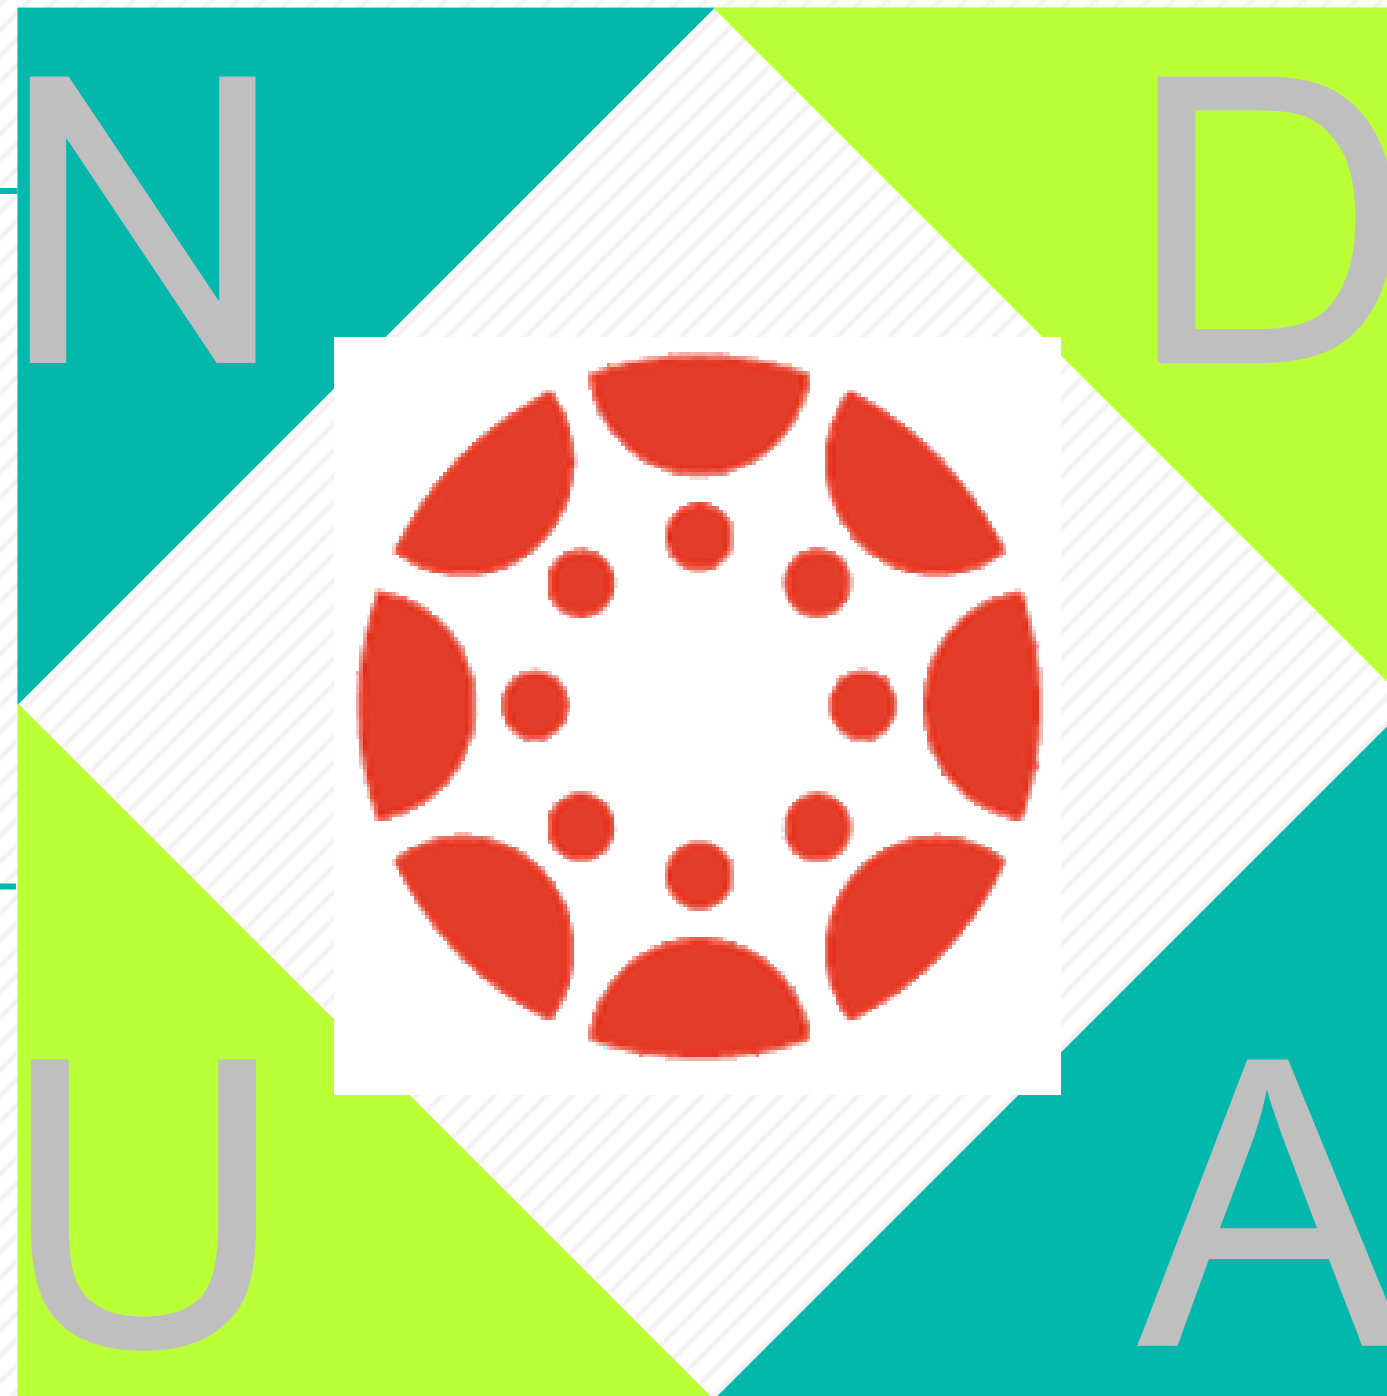

User Profile

Canvas provides a personal area in the course so students can know more about each other.
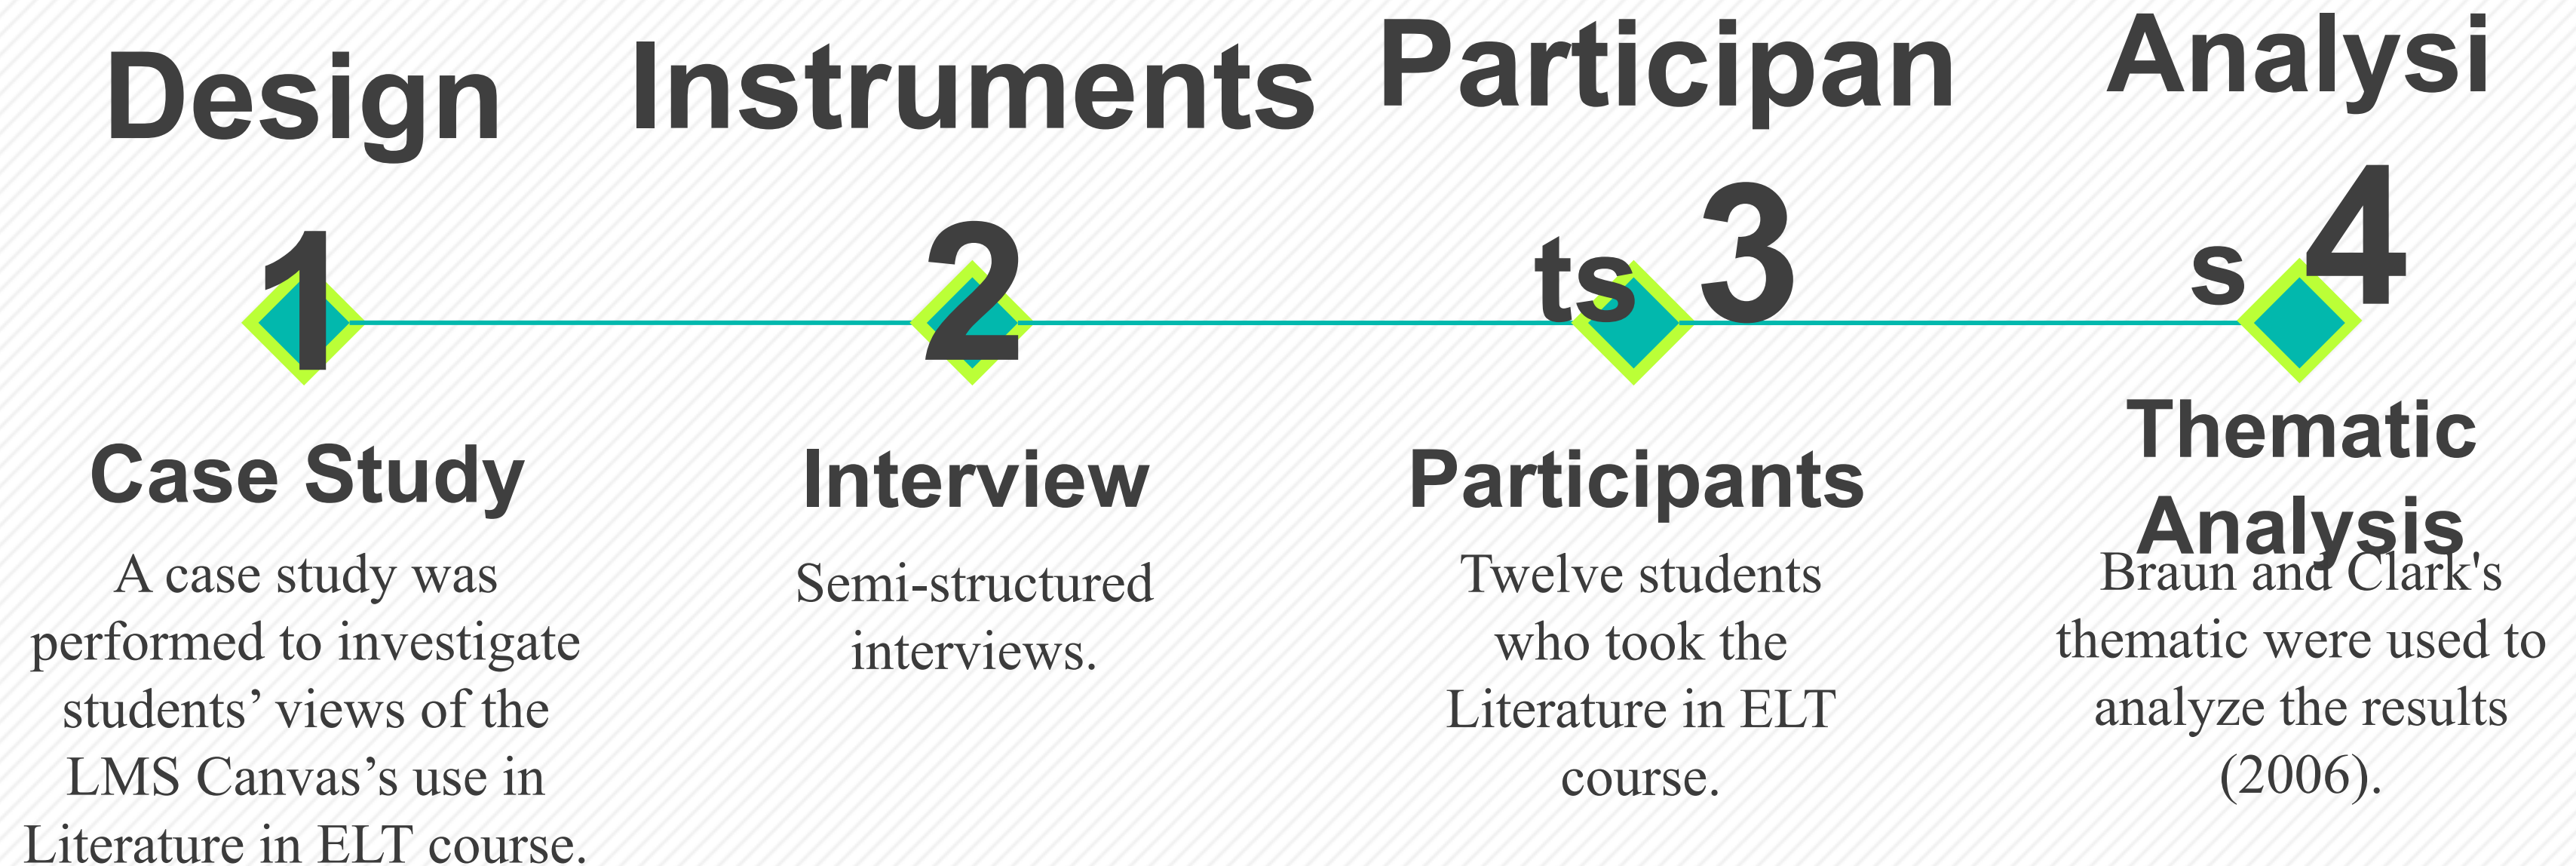

Dashboard

A dashboard page quickly summarizes assignments, announcements and other relevant information across course sites.

Accessibility

Canvas is accessible to students with disabilities and meets universal access goals when materials are properly prepared.

METHODOLOGY

Design
1
Case Study

A case study was performed to investigate students' views of the LMS Canvas's use in Literature in ELT course.

Instruments
2
Interview

Semi-structured interviews.

Participants
3
Participants

Twelve students who took the Literature in ELT course.

Analysis
4
Thematic Analysis

Braun and Clark's thematic were used to analyze the results (2006).

FINDINGS

Benefit of Canvas

straightforward scoring system

2

versatile and up-to-date

4

promptly managing student grades

6

1

an easy-to-use

3

effective and full functionality

5

enhancing student independent learning

7

students receiving updates about upcoming assignments, and very flexible medium
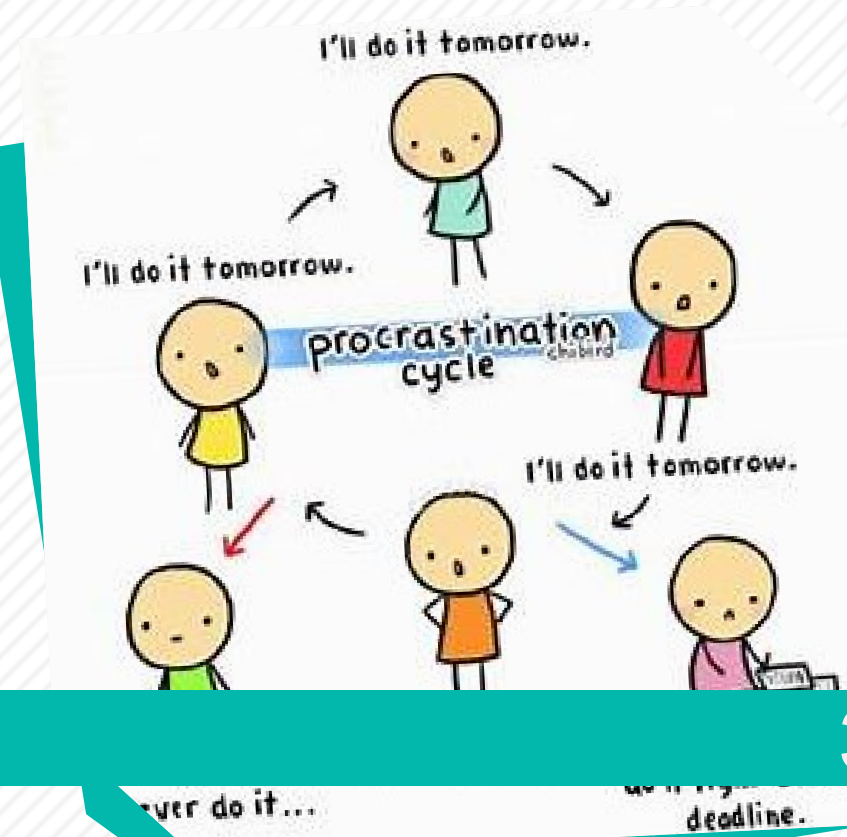

FINDINGS

Drawback of Canvas

1 Being confusing for first-timers.

Struggling with certain technical issues.

Students procrastinating

3 Rarely open or use the LMS canvas.

CONCLUSION

The integration of the LMS Canvas in the EFL Classroom in the Literature in ELT course is very appropriate and useful because it can generate students independent learning by optimizing the features contained in the LMS Canvas.

It can recommend the use of LMS Canvas be one of the LMS that can be applied in the teaching and learning process to gain interactive learning in EFL Classrom.
