Nombre/Name: CENTRE FOR SCIENCE AND TECHNOLOGY ESTUDIOS (CWTS)
Dirección/Address: LEIDEN UNIVERSITY, PO BOX 9555, 2300 RB
Localidad/City: LEIDEN
País/Country: THE NETHERLANDS

3. Responsable del solicitante en el centro receptor/Responsible for the applicant at the host center

Nombre y apellidos/First name and family name: Dr. Henk Moed
Cargo/Position: Senior Researcher

October 2007 - February 2008

- During the period 15/10/2007 - 28/02/2008 DTS carries out a research stay at CWTS under the direction of HFM. "Library catalog analysis" is selected as a research topic: the possibilities of using online catalogs to determine the visibility of books are explored. Probably one of the first altmetrics before altmetrics.

A question related to library catalog analysis

Moed, Henk <hfm.moed@cwts.leidenuniv.nl> 21 de enero de 2008, 20:21
Para: Charles.Erkelems@springer.com, fr.vanberckelaer@springer.com
Cc: torressalinas@gmail.com

Dear Folco and Charles,

Best wishes for 2008. I hope this message finds you well. Please allow me to address the following question.

Currently Daniel Torres-Salinas, a post-doc student, and myself are working on a project aimed at exploring the potentialities of what could be termed "library catalog analysis". Charles may remember I mentioned this project at the EIRH seminar in November 2007 in Granada. The aim of this project is to analyse the extent to which scientific/scholarly books published by a particular group of scientific/scholars are available in academic institutions all over the world, and included in the catalogs of the institutions' academic libraries. The base idea underlying this project is that one can obtain indications of the "status", "prestige" or "quality" of scholars, especially in the social sciences and humanities, by analysing the academic libraries in which their books are available.

September 2008

- We publish our first results related to the use of catalogs in bibliometric contexts October 2008:
- Torres-Salinas, D y Moed, Henk, F. [Library Catalog Analysis is a useful tool in studies of Social Sciences and Humanities](#). 10th International Conference on Science and Technology Indicators, Vienna, 17-20 septiembre de 2008.

Abstract:

This paper explores the use of Library Catalog Analysis (LCA), defined as the application of bibliometric or informetric techniques to a set of library online catalogs, to describe quantitatively a scientific-scholarly field on the basis of published book titles. It focuses on its value as a tool in studies of Social Sciences and Humanities, especially its cognitive structures, main book publishers and the performance of its actors. The paper proposes an analogy model between traditional citation analysis of journal articles and library catalog analysis of book titles. It presents the outcomes of an exploratory study of book titles in Economics included in 42 academic library catalogs from 7 countries. It describes the process of data collection and cleaning, and applies a series of indicators and thematic mapping techniques. It illustrates how LCA can be fruitfully used to assess book production and research performance at the level of an individual researcher, a research department, an entire country and a book publisher. It discusses a number of issues that should be addressed in follow-up studies and concludes that LCA of published book titles can be developed into a powerful and useful tool in studies of Social Sciences and Humanities.

Keywords: Library catalogs; scientific-scholarly books; research performance; social sciences and humanities; book publishers; bibliometric indicators; thematic mapping; on-word analysis; economics.

January 2009

- HFM and DTS finally managed to publish our results in the first issue of the newly launched "Journal of Informetrics".
- Torres-Salinas, Daniel; Moed, Henk F. [Library Catalog Analysis as a tool in studies of social sciences and humanities: An exploratory study of published book titles in Economics](#). *Journal of Informetrics*, 2009, Vol 3 (1): 9-26Publication of Library Catalog

October 2015

- Henk returns to Granada to give a lecture at the invitation of the Bibliometrics Unit (directed by DTS at that time).
- [Does open access publishing increase citation or download rates?](#)
- The conference provided an overview of open access to science with a focus on its effects on the impact of publications. He discussed "Open Access Citation Advantage" and presented preliminary results on the impact of open access journals based on Google Scholar data. [Source](#)

January 2017

- Henk becomes a visiting scholar at the University of Granada thanks to the following funding programme:
- [Visiting Scholar - Disentangling Gold Open Access](#). Principal researcher: Daniel Torres-Salinas. Team: Nicolás Robinson-García and Wenceslao Arroyo-Machado Call: Visiting Scholars Programme, Universidad de Granada. Duration: 01/02/2017-31/12/2017. Type of participation: PI. Funding: 10.000 €.

October 2017

5. La selección de indicadores depende del contexto de la aplicación

- ¿Cuál es la **unidad de la evaluación**? ¿Un país, una institución, un grupo de investigación, un individuo o un campo de investigación o una red internacional? ¿En qué disciplina (s) está activo?
- ¿Qué **dimensión** del proceso de investigación debe evaluarse? Impacto científico-académico? ¿Beneficio social? Multidisciplinariedad? Participación en redes internacionales?
- ¿Cuál es el propósito y los **objetivos de la evaluación**? ¿Asignar fondos? ¿Mejorar el rendimiento? Aumentar la participación regional?
- ¿Cuáles son las **características** relevantes, generales o "sistémicas" de las unidades de evaluación? Por ejemplo, ¿en qué medida están orientados hacia el frente de investigación internacional?

September, 2018

- Henk worked along with DTS, NRG and WAM on Open Access and presented some preliminary findings at the STI Conference held in Leiden between the 12th and 14th of September.

Queridos Dani y Nico,

Estoy pensando en los próximos pasos en nuestra colaboración y mi beca visitante en la UGR

Tengo la siguiente idea.

Me gustaría presentar una serie de conferencias sobre mi libro.

1. Conferencias introductorias al campo: estas son las diapositivas presentadas en los Capítulos 13-17 de mi nuevo libro.
2. Una conferencia sobre el libro en sí.

October 2018

- Participation in the conference organized by Vicerrectorado de Investigación: [La reputación de la UGR en los rankings: situación actual y políticas de futuro](#).
- [Options for an academic policy towards university ranking systems](#)
- [Video](#)

2019

- Henk edited the [Springer Handbook of Science and Technology Indicators](#) along with Wolfgang Glänzel, Ulrich Schmoch and Mike Thelwall. In it, he published along with DTS and NRG the chapter:
- [Disentangling Gold Open Access](#).
- [Link](#)

Concluding Remarks

In this chapter we have explored how the meaning of scientometric indicators can vary depending on the policy context in which they are applied. We have focused on the topic of globalisation of science and the use of scientometric indicators that countries make to support or introduce internationalisation policies. **The chapter is inspired by H. F. Moed's oeuvre in three different ways.** First and most importantly, his conceptualisation and emphasis on the importance of policy context as a nec-

2019

- Wolfgang Glänzel and Cinzia Daraio invite DTS and NRG to participate in the book [Evaluative informetrics – the art of metrics based research assessment. Festschrift in honour of Henk F. Moed](#).

UNIVERSIDAD DE GRANADA DANIEL TORRES SALINAS <torressalinas@go.ugr.es>

Visit to Granada on 29 Sept.

Moed Henk <hfm.moed@gmail.com> 10 de agosto de 2021, 13:39
Para: Daniel Torres-Salinas <torressalinas@go.ugr.es>, Nicolás Robinson <erobin@ugr.es>

Dear Dani and Nico,

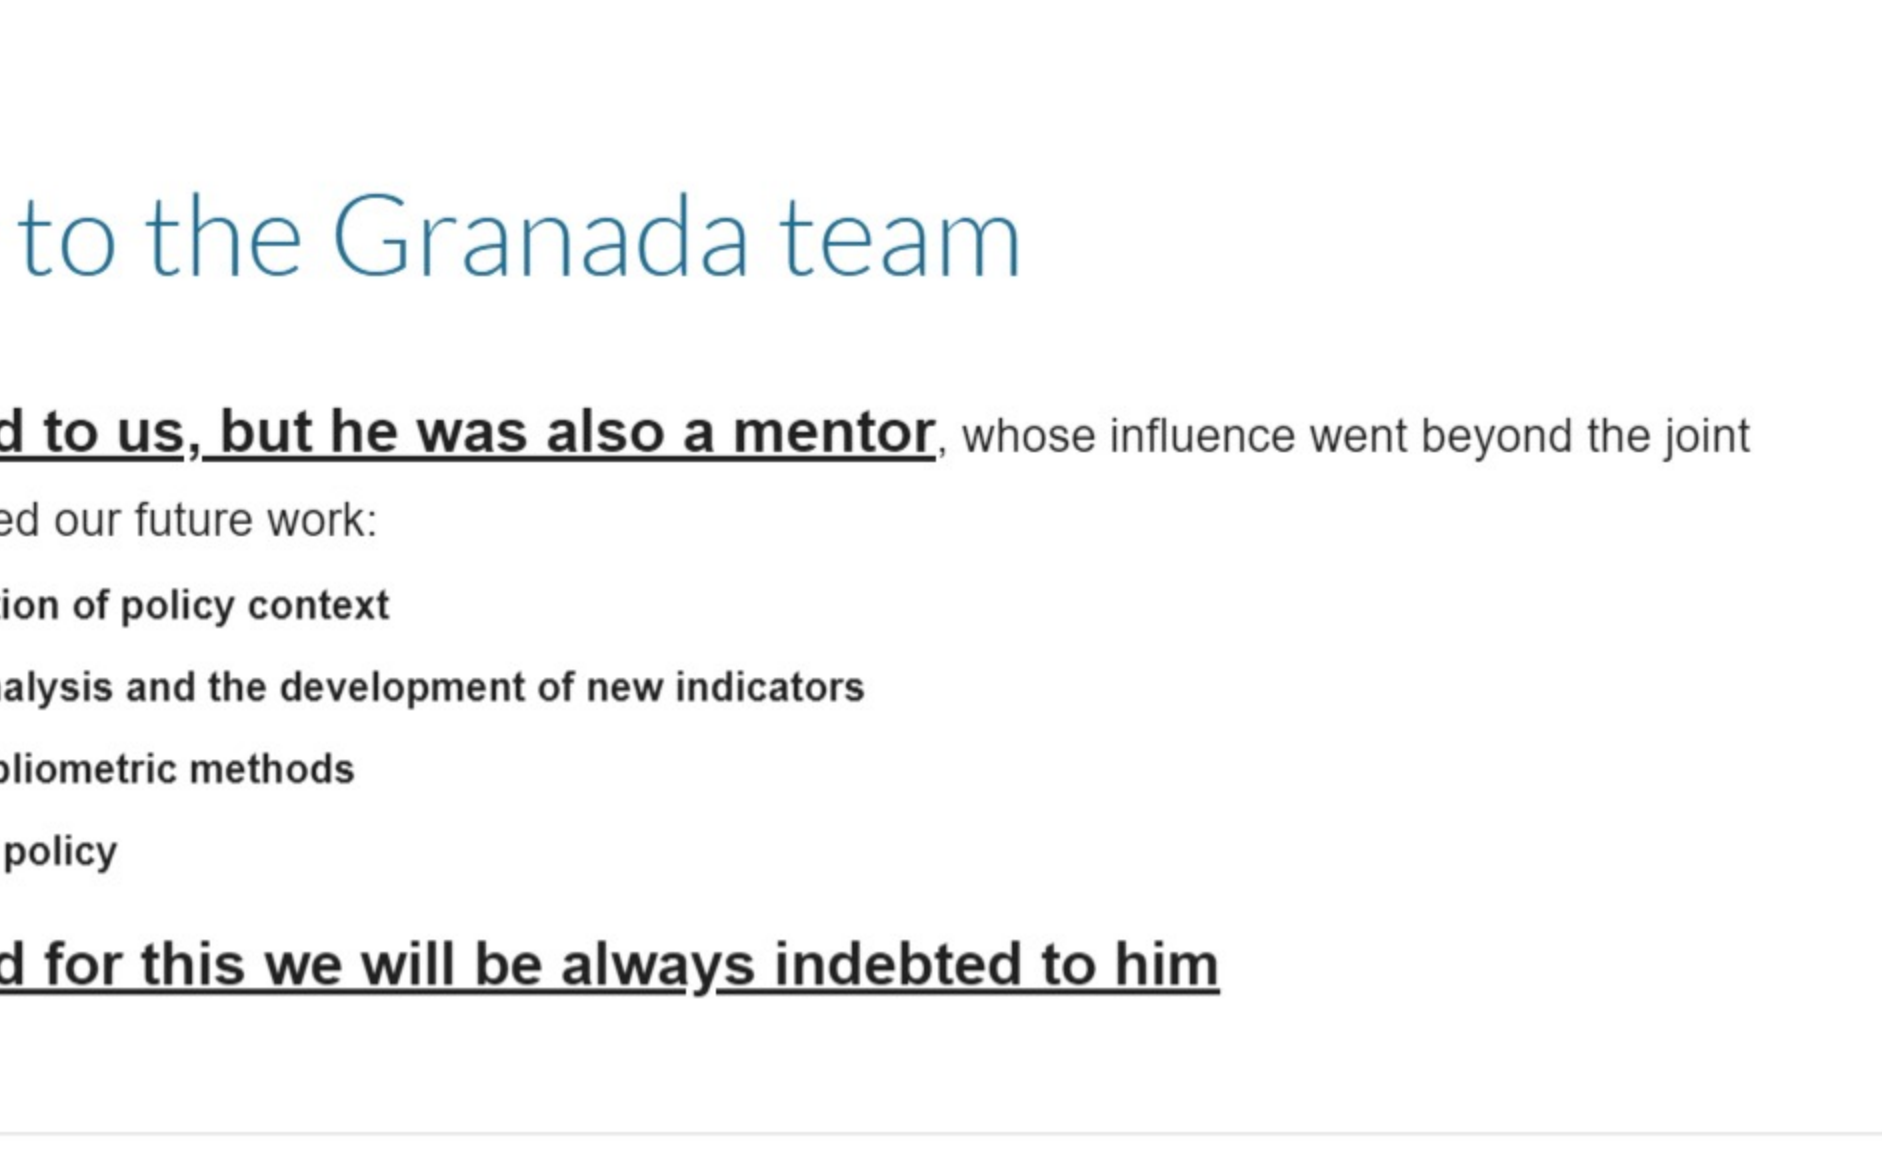

On Wednesday 29 September in the afternoon I will arrive in Granada and stay for one night in Hotel Triunfo. I have a meeting with Felix Moya on Thursday 30 Sept in the morning. After that I will return to Madrid.

It would be great if we could meet in the late afternoon / early evening of 29 Sept for a chat and una copa y tapas, if you are available.

Best wishes,

September, 2021

- DTS and NRG last met Henk on September 29th where they went to Henk's favourite place in Granada, famous for its fried fish where he shared his plans and we had the opportunity to interview him.

An extract of Henk's interview, the rest at STI in Granada

Henk's legacy to the Granada team

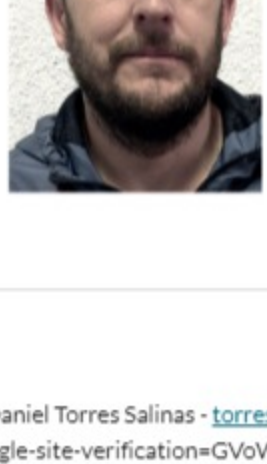

Henk was not only a friend to us, but he was also a mentor, whose influence went beyond the joint activities we did together, but inspired our policy work:

1. Evaluative bibliometrics and the notion of policy context
2. Proto-altmetrics: Library Catalog Analysis and the development of new indicators
3. Scientific mobility and the use of bibliometric methods
4. Institutional evaluation and science policy

And for this we will be always indebted to him
