banjo  
drums  
harp  
Writing  
short stories

# 2 case studies: reports from the trenches

## Multimedia in Disney

- Cataloging media for interoperability
- Media management for physical & digital
- Intellectual Property management

## Multimedia in Pearson Plc

- Media evolution
- Relating assets
- Electronic versioning
- Incorporating Rights

# Selling semantics: adding value

(not the same as “information management”)

- **Metadata as perspective**
  - interpreting
  - translating

*prosperity in life is transitory  
and dependent on luck*

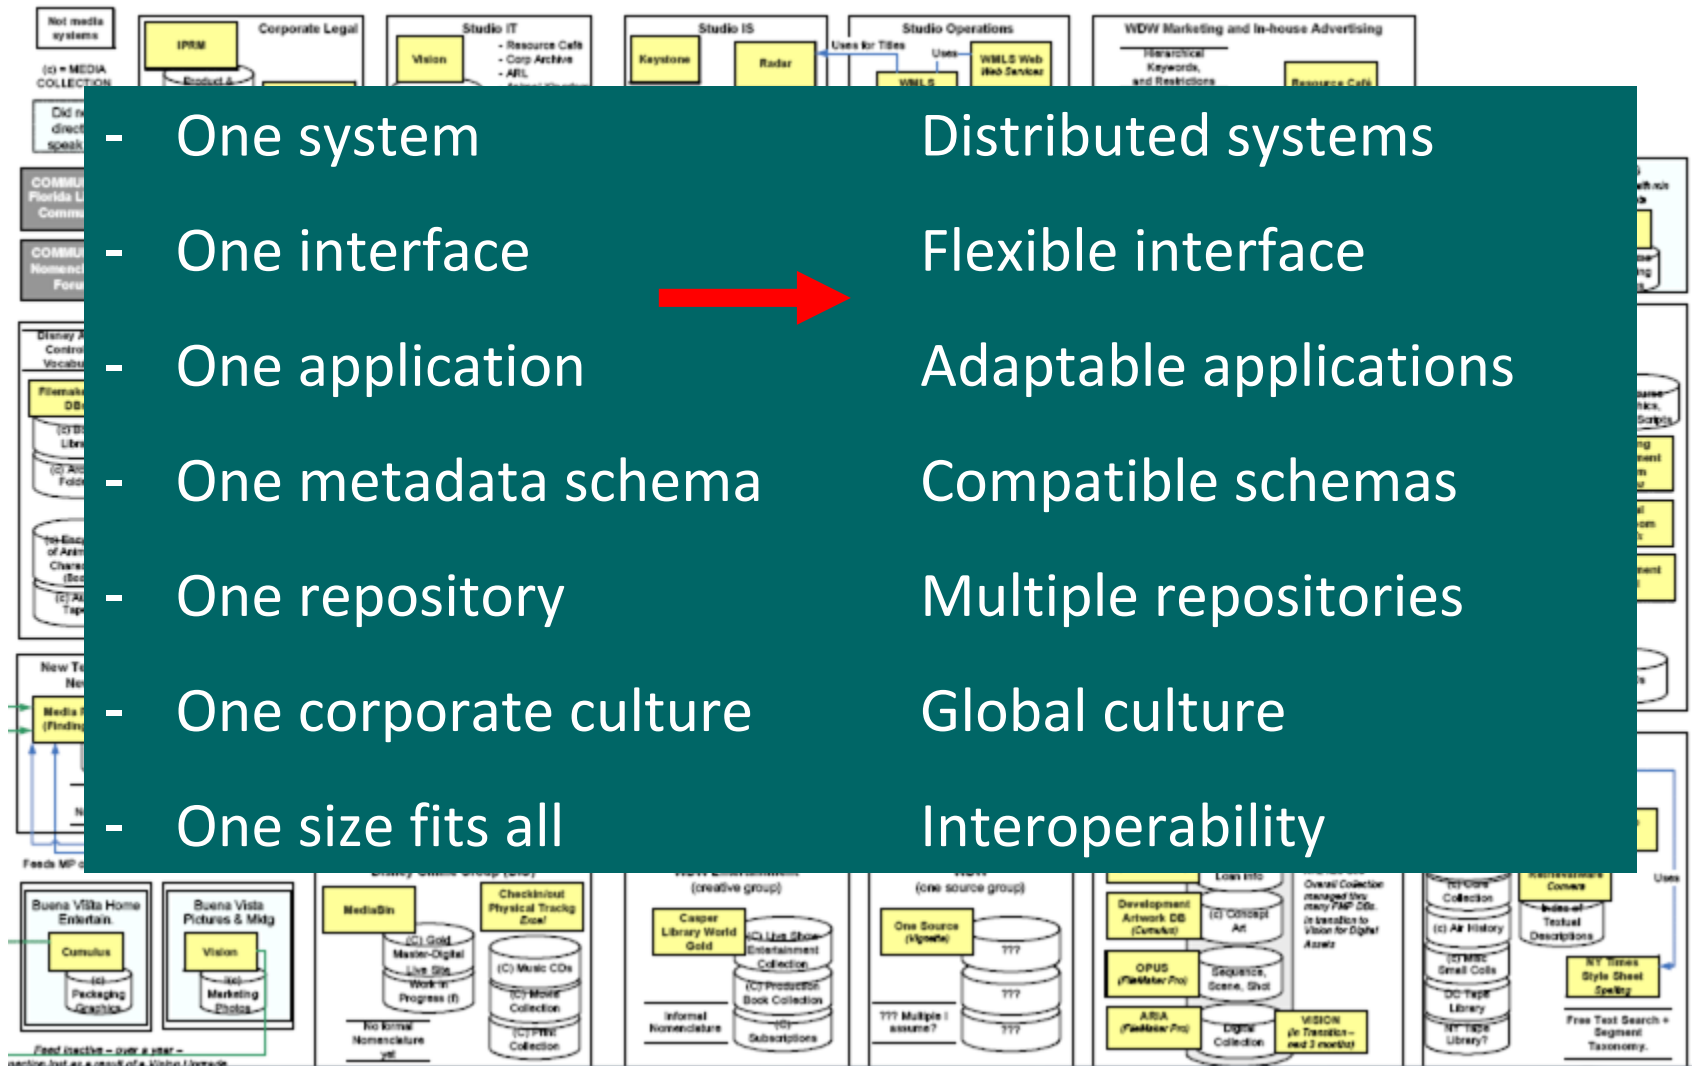

# Media Asset Management

Find, track and exchange media assets between global business units and business partners.

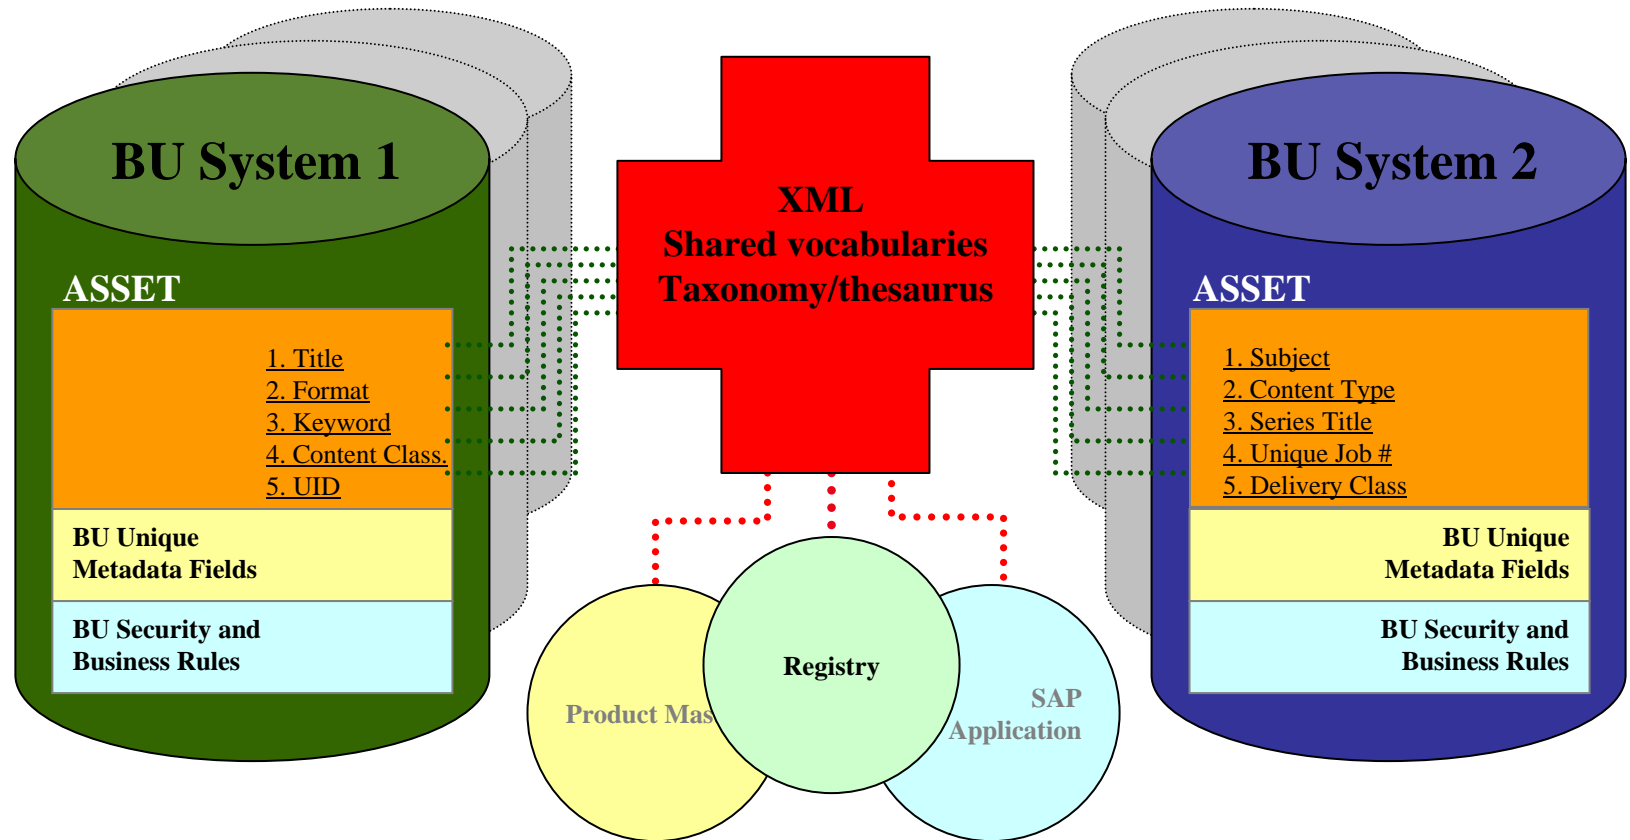

# Over 60 major media repositories across the businesses

## Merging Media and Management™

- One system → Distributed systems
- One interface → Flexible interface
- One application → Adaptable applications
- One metadata schema → Compatible schemas
- One repository → Multiple repositories
- One corporate culture → Global culture
- One size fits all → Interoperability

# Controlled Access Points: Names, Titles, Identifiers

**XML and taxonomy conduit expresses the common data model in a standard format, and provides the mapping between systems.**

# A word about governance and compliance

40% creating, building, reviewing,  
assessing,

60% steering, cajoling, campaigning,  
listening, educating

80% diplomacy after 2 years

# Grassroots organising

- Ratified a Core Metadata
- Standardized cataloging: *Best Practices*
- Used a common nomenclature: *controlled vocabularies*
- Constructed a taxonomy
- Used thesaurus functions to bridge dialects

Disney Toon Studios  
Disney Video Premiers  
Disneyland Advertising

## The **Media Technology**

**Board** was formed one year later.

- Approved a 5-year roadmap for media interoperability
- Identified Priority-1 projects
- Dedicated funds
- Promoted cooperation at business unit level

# Bottom up, Top down

**strategic**

Identify principles

Identify business drivers & obstacles

Ensure on-going funding

Define priorities

**tactical**

Identify tools, workflow, best practices

Publish standards

Confirm processes/technical infrastructure

Initiate projects

Monitor, track, and report

Coordinate tactics across divisions

**execute**

Awareness of emerging/existing industry standards

Launch project

Form governance sub-entities

Communicate & educate

Track source data

Track content through systems

Report recommendations

*metadata standards, network standards, registry standards, encoding standards, etc...*

**Knowledge Hub**

## **Global Content Mngmt Council**

Authorizes standards  
Determines implementation priorities  
Champions & promotes

## **Standards Committee**

Govern standards  
Have authority  
Test Standard  
Communicate to businesses

## **Work Teams**

Source of all Standards  
Have specific goals  
SC member involvement

# Collective shifts in our perception of knowledge

# 2006: The new mission

- Expand the taxonomy to a *media ontology*
- Provide more flexibility
- Provide a schema that can serve as mapping utility
- Provide a model that can support multiple instantiations of a single property
- Provide a schema that can be applied to an integrated model.

## Industry bodies

- Open Language Archive Community (**OLAC**), Cataloging Policy Committee
- SMPTE RP210, DMS-1
- ISAN Best Practices
- Resource Description and Access (**RDA**) Draft Review
- Public Broadcasting Core Metadata (**PBCore**)
- International Press and Telecommunications Council (**IPTC**)
- Dublin Core
- Visual Resources Association
- **Functional Requirements for Bibliographic References (FRBR)**

# FRAD relationships

- Persons
- Families
- Corporate Bodies
- Works

- Persons and names
- Families and names
- Works and names
- Access Point relationships (within and between)

## Types of Relationships:

- Between works
- Sequential relationships
- Derivative relationships
- Descriptive relationships
- Whole/Part relationships
- Genus/Species relationship
- Accompanying relationship (part to part)
- Shared characteristic relationships

## Attribute relationship:

- Collaborative
- Sibling
- Parent/Child
- Membership

## 4 kinds of relationships:

1. Components of a whole  
(instances to entity)
2. Equivalents (entity to entity)
3. Accompanying relationships  
(part to part)
4. Conceptually related items  
(entities to entities)

# Components of a Whole

**Title:** *Jamie Oliver's Ministry of Food*

**Content Class:** *whole product*

**Content Type:** *cookbook*

## Ingredients

- a handful of Parmesan, grated
- 2 x 250g tubs of mascarpone
- 100g taleggio cheese, grated
- zest and juice of 2 lemons
- a handful of chopped walnuts
- 180g bag of baby spinach, chopped
- sea salt and freshly ground black pepper
- 20g pack of fresh sage
- 2 knobs of butter
- 1 packet of fresh lasagne – 12 sheets

## More Pasta and pizza

## baked cannelloni

Serves 6

*Try these simple cannelloni – they're great as a vegetarian alternative.*

Preheat the oven to 190°C/375°F/gas 5. Mix half the Parmesan, the mascarpone, the taleggio, the lemon zest and juice, and the walnuts. Put ¼ of the mixture to one side, then combine the remaining cheese mixture with the spinach and season to taste.

Fry the sage leaves in hot butter and crumble ½ into the cheese and spinach mixture, saving the rest for the top. Put a good spoonful of the cheese and spinach mixture along one of the longer edges of each lasagne sheet and roll up. Put them in a flat oven dish, dot with the leftover cheese mixture, drizzle over ¼ of a glass of water and sprinkle with the remaining Parmesan and crispy sage leaves. Cover with foil and bake in the preheated oven for 20 minutes.

# Customisable Content

The screenshot displays a digital library interface with a search bar at the top containing the text "SEARCHED: NEUROLOGY". To the right of the search bar, there are icons for a magnifying glass, a document, and a brain, with red arrows pointing to them. Below the search bar, a filter bar shows "FILTER BY:" with checkboxes for "Images", "Audio", "Video", "Documents", and "Animations", all of which are checked. The main content area displays a grid of asset thumbnails, each with the placeholder text "Asset Title" and an "Average Rating" of five stars. The thumbnails include a baseball player, a microscopic image of a cell, a document titled "The Structures of the Brain Document", a document titled "Flapping Inside the Air", a document with a blue cover, and a diagram of a neuron. On the left side, there is a "Categories" sidebar with a list of items: Images (53), Online Activities (9), Class Activities (8), Video (5), Lecture Discussion (2), Time Magazine Articles (5), Student Voice Questions (2), Audio (3), Handout Masters (10), ASP Reader (5), and Web Resources (11). At the bottom of the sidebar, there are sections for "Favorites", "My Books", and "Keywords". The top right corner of the interface shows "ITEMS PER PAGE: 36" and "PAGE 1 OF 12".
