PSSOH

- Started in 2018
- With the aim to nurture national gatherings with international participation
- To promote free software, open hardware, and women in engineering and computer science
- But, also to promote open science, open data, and other relevant topics
- From the first day we envisioned that no fees will be ever paid @PSSOH
- For two years we had hybrid events
- Today, we come again as live event
- Organized and generously supported by the University of Belgrade – School of Electrical Engineering

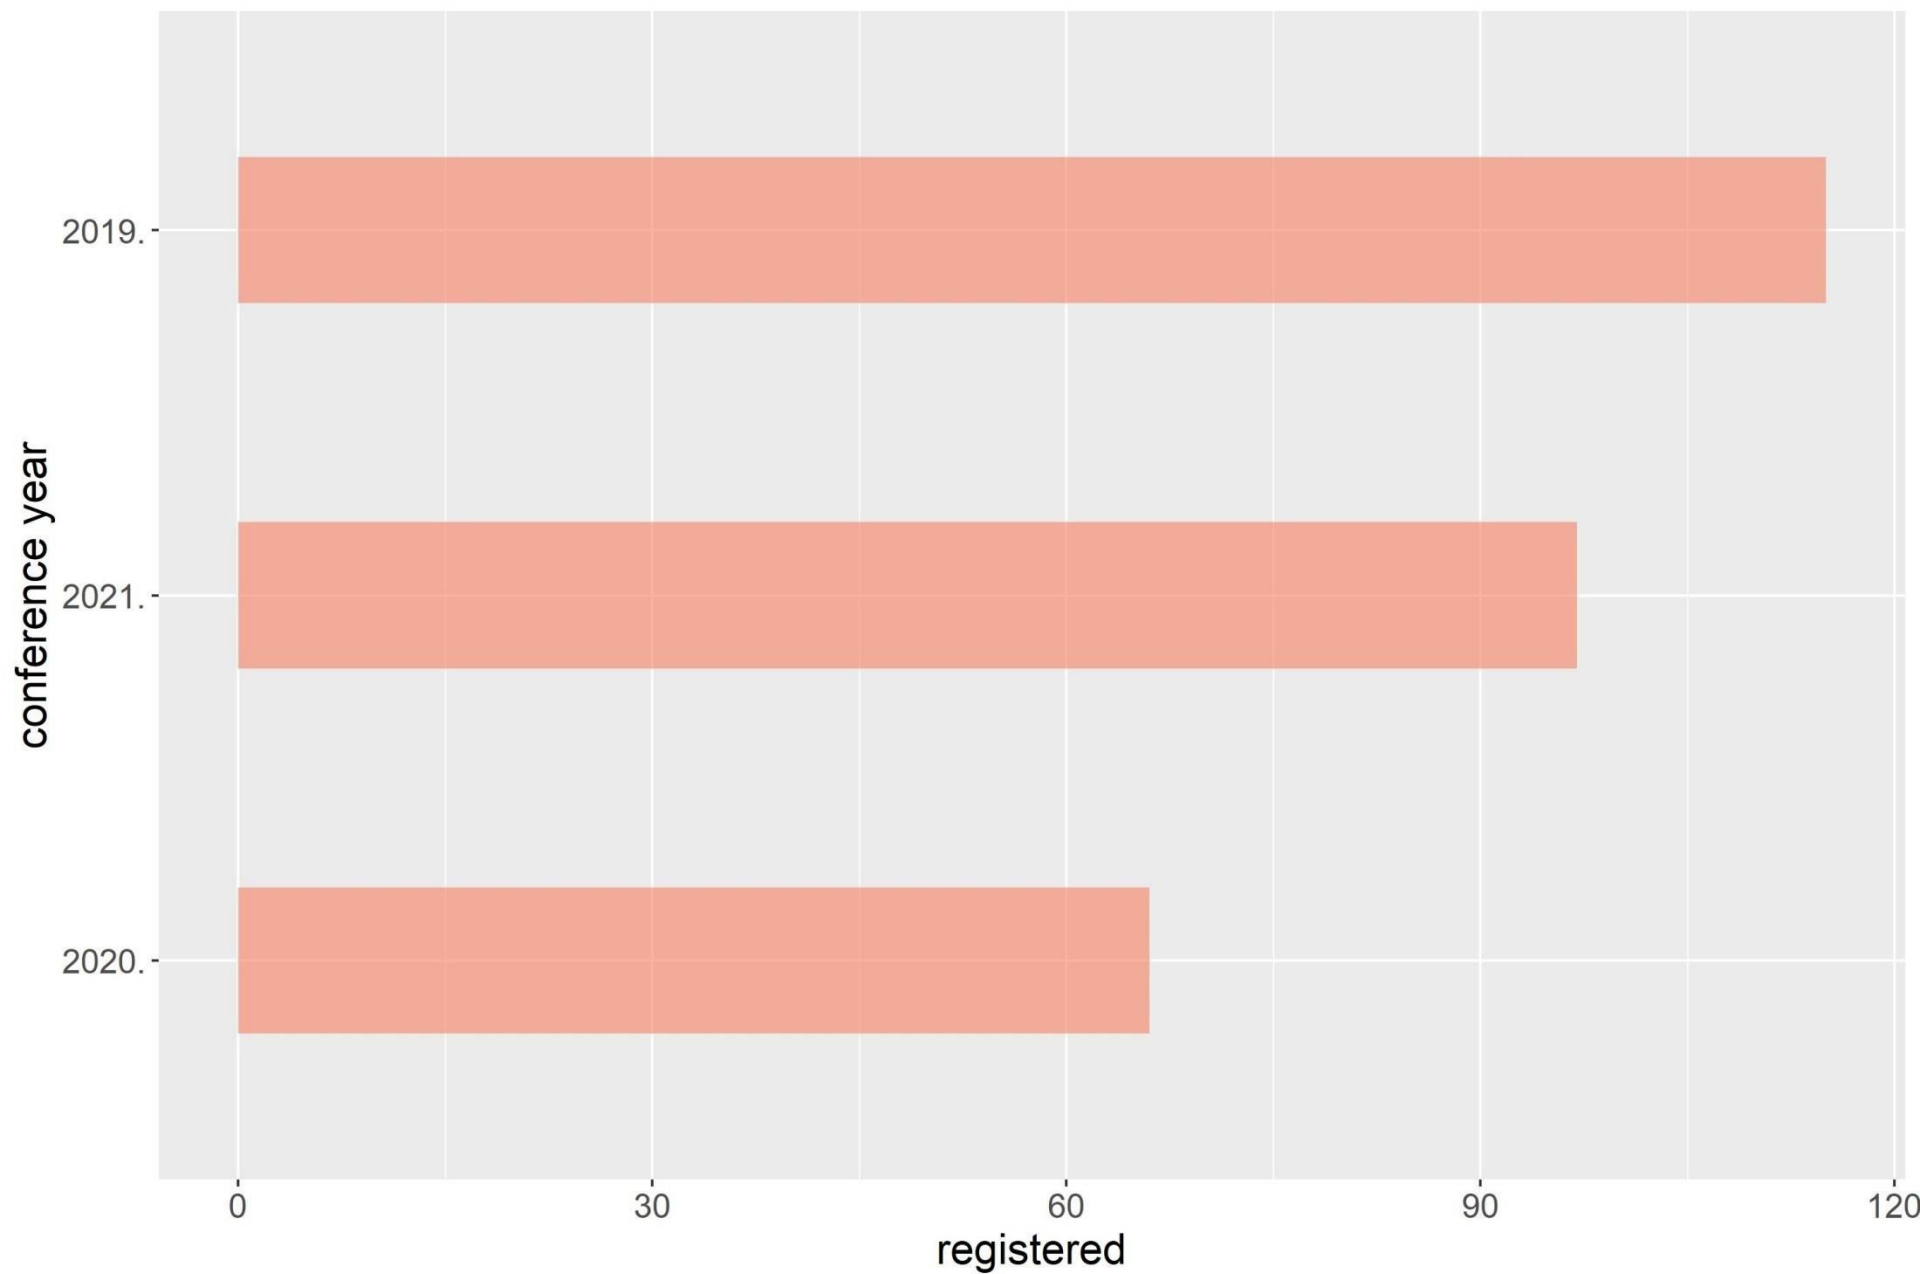

The beautiful building of Technical faculties!
