This page visualizes a large image collection within an interactive WebGL scene. Each image was processed with an [Inception](#) Convolutional Neural Network, trained on [ImageNet 2012](#), and projected into a two-dimensional manifold with the [UMAP](#) algorithm such that similar images appear proximate to one another.

DON'T BLAME THE MOTORIST FOR ALL THE AUTOMOBILE ACCIDENTS IN CITY STREETS. LOOK AT SOME OF THE THINGS HE IS UP AGAINST:

There are the boys, for instance, who use an asphalt thoroughfare for a ball-ground, and who never watch anything but the ball. And there are the little devils who dart out in front of you and dare you to run over them. There is the man who makes a "Dutch crossing" in and out of traffic; the chap

who leaves a trolley-car and comes around behind it; and the absent-minded mortal who looks neither up nor down, but steps off the curb intent upon his newspaper. And there are others — yet the motorist always gets the blame when anybody is hurt! The reckless pedestrian is as bad as the reckless motorist.

Joyously Toying With Death

DON'T JAY WALK
