

The OpenAIRE Research Graph Supporting Evidence-Based R&I indicators

Claudio Atzori lo CNR AT

Ioanna Grypari ATHENA Research Center

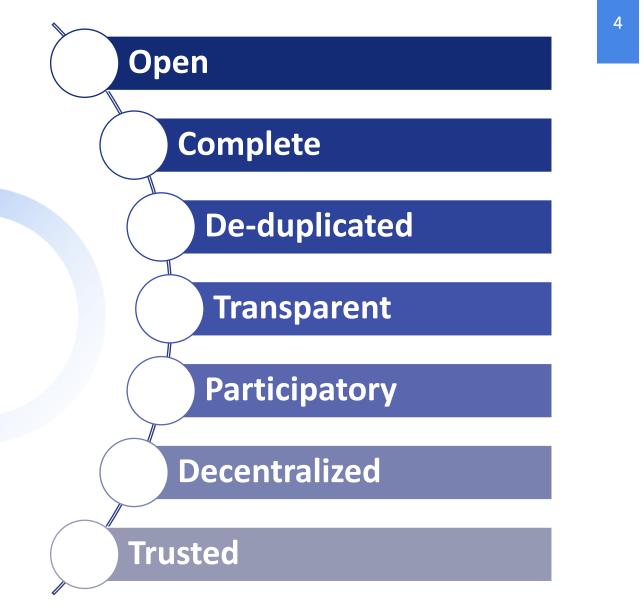

- 1. The OpenAIRE Research Graph
- 2. IntelComp: evidence-based R&I Policy Making

OpenAIRE Research Graph *putting research into context, making the connections*

What is it?

"A collection of metadata describing objects in the research lifecycle and relationships among them"

The OpenAIRE Research Graph: why?

Tracking open research

Reproducibility and transparency require tracking of all outcomes of science and related "context"

Discovering open research

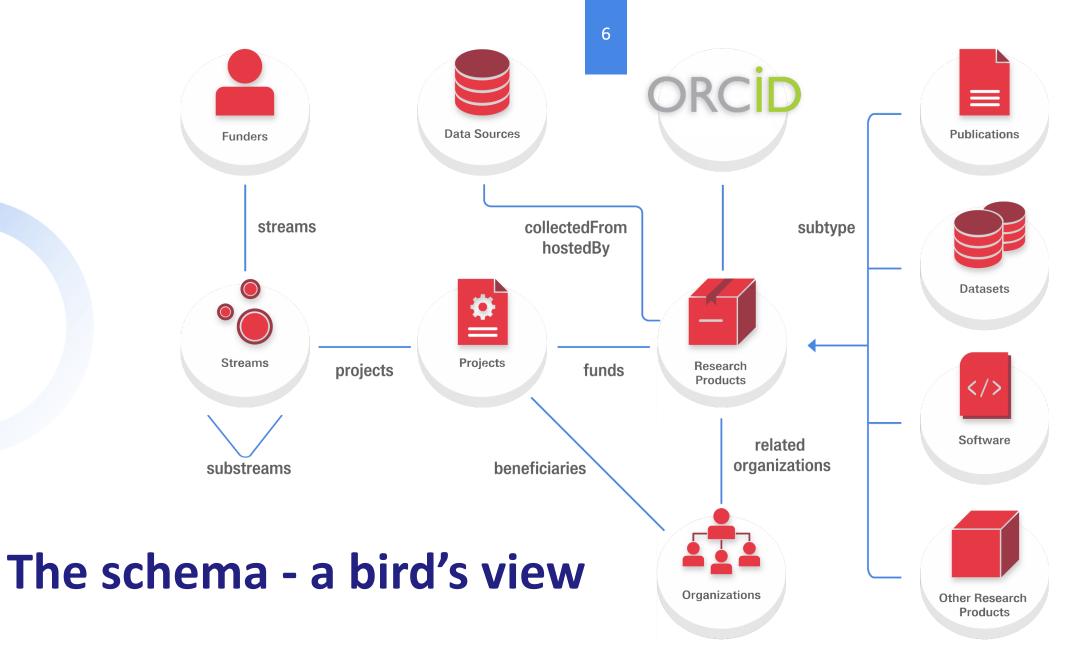

Discovery of **reproducible science** outcomes must find new ways, driven by "scientific intentions" that go beyond the "find articles related to a research topic"

Monitoring (open) research

Monitoring quality, impact, and openness of science should be a transparent, reproducible process for all, inclusive of research "context"

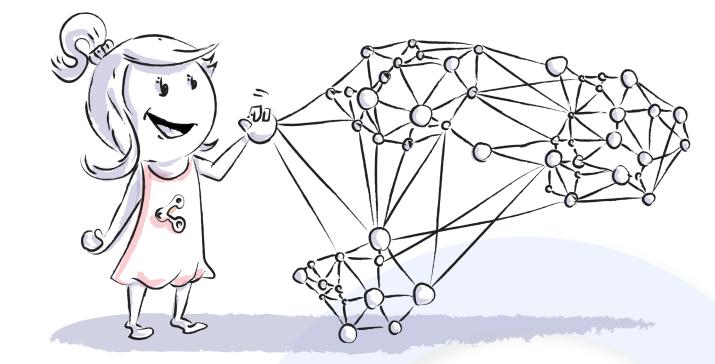

OpenAIRE Research Graph in numbers

- 25 funders
- ~2k direct data sources
- 3Mi projects
- 144Mi publications
- 304k software
- 17Mi research data
- 6.7Mi other research products

(EOSC) Users of the Graph

Direct

- Content providers: publishers, libraries
- Content consumers: data scientists and service providers
- Indirect (via services)
 - Funders, institutions, research infrastructures, policy makers, industry, researchers

Services

- EOSC marketplace, Commission Participant Portal
- Elsevier Scopus and SciVal, Springer, ORCID
- Institutional and thematic repositories
- MANY others...

Bonis, Michele; Artini, Michele; Ottonello, Enrico; Lempesis, Antonis; 💿 Mannocci, Andrea; Ioannidis, Alexandros This dataset contains the metadata records about research products (research literature, data, software, other types of research products) with funding information available in the OpenAIRE Research Graph produced on May 2022. Records are grouped by funder in a dedicated archive file (<funder acronym>.tar).

😰 Manghi, Paolo; 😰 Atzori, Claudio; 😰 Bardi, Alessia; 😰 Baglioni, Miriam; Schirrwagen, Jochen; Dimitropoulos, Harry; 😰 La Bruzzo, Sandro; Foufoulas, Ioannis; 😰 Czerniak, Andreas; Horst, Marek; Kiatropoulou, Katerina; 😰 Kokogiannaki, Argiro; De

Fields of Science

SUSTAINABLE GALS

FoS Classification in the Graph

- Growth of # scientific publications
- Need for policy-makers, funders, publishers, scholars, companies to classify it according to Field-of-Science Taxonomies
 - organization, search engines
 - monitoring (evolution of trends, identification of new fields, ..)
 - evaluation (funding allocation, weak spots, opportunities, ..)
 - policy-making
 - recommendation systems

What

- ~15Mi DOIs classified
- Classification based on a 3 level hierarchy taxonomy
- Based on "SciNoBo: A Hierarchical Multi-Label Classifier of Scientific Publications" 10.1145/3487553.3524677

Level of FOS	Number FOS Labels
Level 1	6
Level 2	42
Level 3	174

SDG classification in the Graph

Why

- Societal priorities (partly) set by UN Sustainable Development Goals
- Need for policy-makers to classify research according SDGs
 - monitoring
 - evaluation (societal impact)
 - policy-making

What

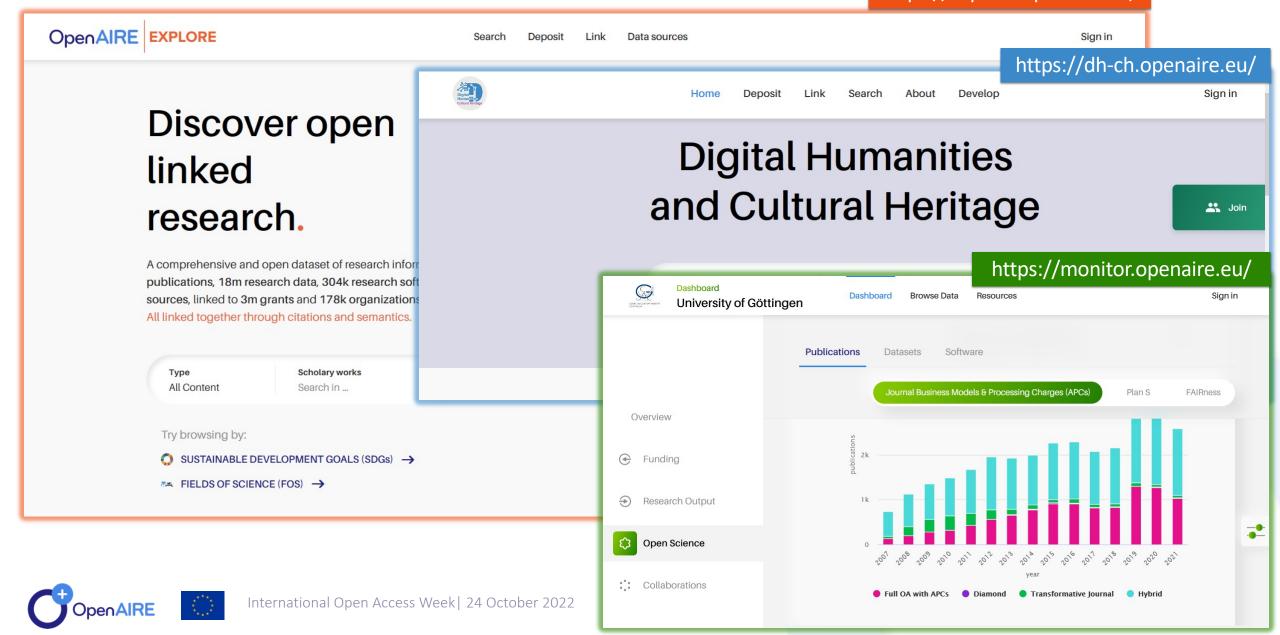

- ~8Mi DOI classified
- SDG Classification system
 - Build an SDG Silver Corpus of Keywords & Keyphrases
 - uses publication title and abstract to classify it to (potentially multiple) SDGs

Related OpenAIRE Services

Can I trust the indicators?

a.k.a can I trust the processes for their calculation? a.k.a can I trust the underlying data?

Challenges

- Data incompleteness
- Data format inconsistencies
- Default values
- Duplicate data
- Old / stale data
- Inconsistent keys
- Coverage

"Not everything that counts can be counted, and not everything that can be counted counts."

ORG as a trustable resource

- Vocabulary based cleaning
- Automation of the aggregation processes
- Provenance information
- Transparency of the processes
 - Documentation (WIP)
- Repeatability

Thank you for your attention so far!

Evidence-based R&I Policy Making The Role of the OpenAIRE Research Graph

Why?

R&I activities

- 310Bi EUR: EU expenditure in R&D in 2020 (EC)
- a priority across different players

- drive large share of Europe's economic growth
- new and better jobs
- key in addressing societal challenges

Why?

R&I policy making

- align with priorities
 - sustainable development goals (social, economic, environmental dimensions)
- open and inclusive
 - "transparent, evidence-driven, accessible and responsive to as wide a range of citizens as possible" (OECD)
- up-to-date with state of play in R&I activities
 - Speed, complexity, interconnectedness, growth and size

Why?

DpenAIRE

From agenda setting

- where should I invest in next?
 - research topic, organization, country, etc.
 - opportunities or room for improvement
 - alignment societal goals

to **evaluation**

- what is the impact of R&I activities on the society
 - different sectors/areas
 - timing (short, medium, long-term)
 - enabling factors and pathways
- how did (my) funding/policy/approach contribute

navigate the R&I data and knowledge space and make evidence-based decisions.

How? Methodological Needs

Tracking and evaluating R&I activities must be

- data-driven & relevant use key aspects of big data available
- comprehensive & granular 360° view across multiple facets of R&I activities & their links, down to a fine level
- automated & timely
- sustainable tracking long-term & repeatedly
- **transparent & replicable** → trustworthy

How? Methodological Approach

Policy Intelligence

- leverage big data with AI-based systems
 - dynamic, multilingual and heterogeneous data
- human-in-the-loop
- state of the art technology
 - in computational power (High Performance Computing-HPC-, EOSC, commercial clouds),
 - AI techniques (e.g., NLP, ML, data mining)
- frequent updates

• Open & FAIR Data and Open, Transparent & Reproducible Methodologies

 \rightarrow discover, link, track propagation of R&I activities in the society and automate the process

 \rightarrow replicable assessment

What? The IntelComp Platform

An end-to-end platform, on a HPC environment, for evidence-based R&I assessment and policy-making

30

31

Lintelcomp

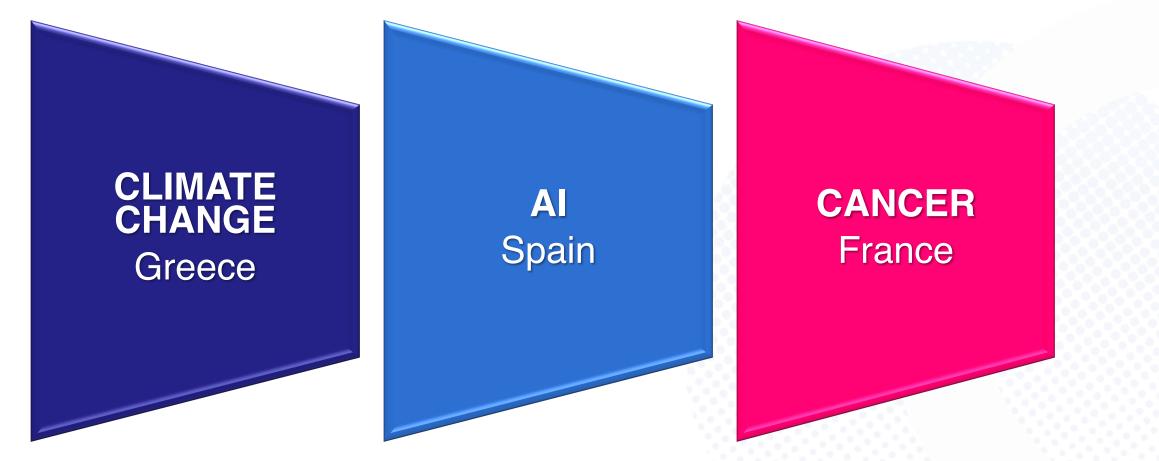

What? The IntelComp Platform

- Set of tools providing a cooperative environment where actors (mainly policy makers, funders, analysts and public administrators) can visualize, interact and analyze information
- Business intelligence R&I dashboards
- Search & browsing tools
- Project proposal evaluation tool
- Supported by
 - data lake
 - NLP pipelines & analytics workflows
 - interactive model trainer
 - catalogue of resources

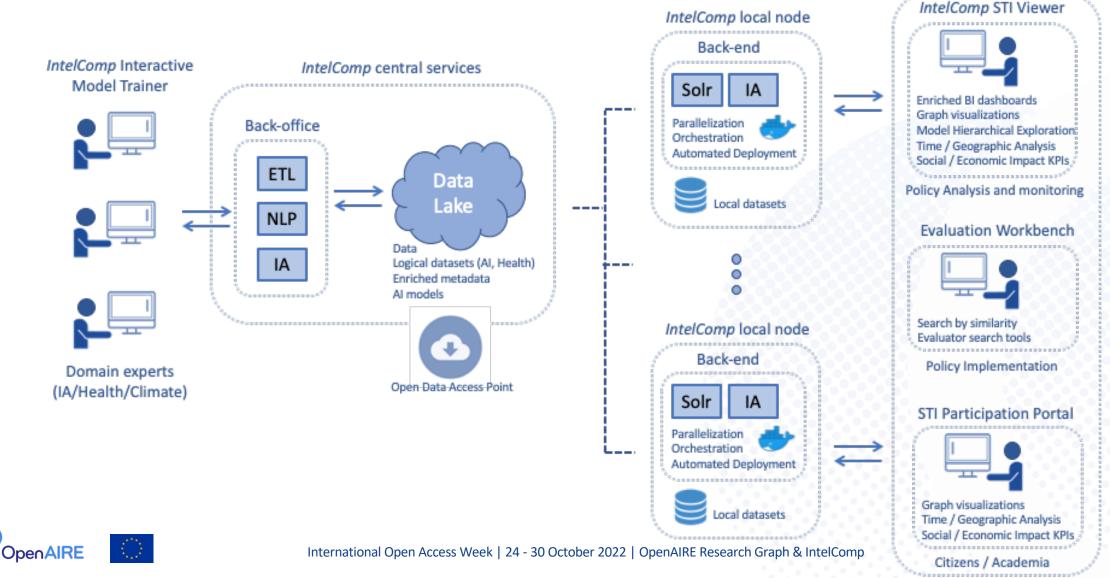

What? The IntelComp Platform

• CO-CREATED using a Living Labs approach

The OpenAIRE Research Graph in IntelComp

WHY a Research Graph for Scientific Products?

- KEY
 - as a major data source for agenda setting (what's going on in science?)
 - as step # 1 in impact assessment (what did this project directly create?)

WHY the OpenAIRE Research Graph?

- Coverage, Readiness, Timeliness
 - scientific research outputs + links to each other and projects
 - rich metadata (organizations, data sources, citations, APCs, etc.)
 - fully operational big data infrastructure
- All about open science and open data
 - inclusive, transparent, replicable

The OpenAIRE Research Graph in IntelComp – How?

Major data source

- in NLP pipelines & analytics workflows
 - extract information to enrich research outputs
 - Topic modelling, FOS & SDG classification
 - innovation extraction, claim/evidence, etc
- linkages across R&I products, actors (networks)

→ R&I indicators, broken down in a granular level

The OpenAIRE Research Graph in IntelComp – What? A sneak preview of the STI Viewer

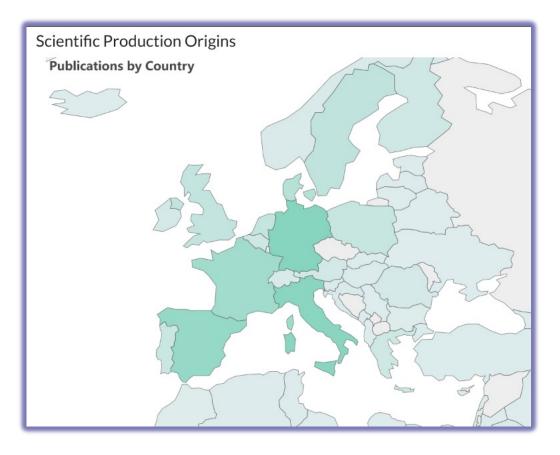

- One of three IntelComp platforms for end-users
 - STI policy participation portal, Evaluation Workbench
- Target audience: R&I (policy) analysts

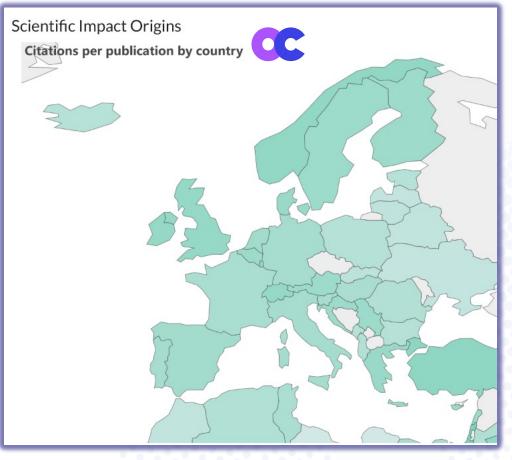

• Analyze, compare and visualize a comprehensive set of R&Irelated KPIs for Agenda Setting, Evaluation

TAKE AWAYS Evidence-based R&I Policy Making

- Importance of
 - policy intelligence
 - open, transparent & replicable KPIs
- Leveraging the OpenAIRE Research Graph
 - links and metadata
 - to create new ones
 - for policy making in R&I
 - timely, comprehensive, granular views
