### KEYWORDS

GDP, PQ-104, PQ-5113, the  
volume of services has grown

### ABSTRACT

The reason for the development of the service sector is to ensure employment by creating new jobs, as well as a sphere with great potential in the development of the country. The real increase in incomes of the population in places can also be clearly seen, first of all, from the development of services. In this regard, we will focus on the development of the services sector and strengthening its role in the structure of the economy. This area is able not only to provide jobs in rural areas, as well as increase the income of the population, while remaining in urban areas.

<sup>1</sup> Assistant, Jizzakh branch of the National University of Uzbekistan, Jizzakh, Uzbekistan

The service sector is one of the largest reserves in ensuring employment of the population. In our country, its share in the gross domestic product (GDP) is 36.3%, and the number of people employed in the industry is 50.1%. Considering that now there are great opportunities for creating jobs in this area in our republic, this is still a very low indicator.

In order to develop this sphere, decisions, various measures and projects are being developed by the head of our country. In particular, in the decree of the president of the Republic of Uzbekistan dated 11.05.2021 PQ-5113, in order to increase the share of the services sector in the economy of our country, to fully launch existing opportunities in the field of services on the ground, to solve problematic issues awaiting their solution to expand the range of services:

In 2021-2023, the main areas of development of the services sector in the Republic of Uzbekistan were defined as:

- ▶ making the services sector an important driver in ensuring economic growth and doubling the volume of services by 2023;

- ▶ to provide the population with ready-made business plans and projects, to organize the provision of "complex services" covering the stages from training them in the profession to the establishment of entrepreneurial activity;

- ▶ increase the efficiency of the activities of state bodies and organizations in this regard and strengthen the responsibility of officials by introducing a system for assessing the development of the services sector in the Republic;

- ▶ elimination of excessive bureaucratic barriers in the field of services, expansion of the range of services based on the specifics of each area, expansion of the coverage of transport, financial, as well as banking, tourism and trade services in the regions, especially in rural areas;

- ▶ to increase the potential of existing educational and health services in all regions of the Republic, to improve their quality, to create favorable economic and infrastructural conditions for attracting the private sector[1], the resolution of the president of the Republic of Uzbekistan No. 27.01.2022 PQ-104[2], projects such as "New Uzbekistan" have been developed, and, it is no exaggeration to say that in our country, which is developing day by day, there will be tremendous changes.

As a result of ensuring the implementation of Resolution No. 5113 PQ, the volume of services in 2021 increased by almost 20%.

At the same time, by introducing new approaches to the development of the services sector, there will be opportunities to increase the volume of market services by 1.5 times this year and create an additional 1.5 million new jobs.
