# Problem: Global Does Not Include the Whole Planet

Concept: Madhu Pai (@paimadhu)  
Art: Sophie Lane (ScEYEnceStudios.com)

# World Scaled by Number of Papers, Web of Science (2016)

## Actions to address these challenges

- Acting locally while thinking globally
- Network
- Capacity building
- Increased self-worth and visibility
- Sitting at decision-making tables
- Making room for other Latin Americans
- Acting for diversity, equity and inclusion in the Global South

# Advance innovation with a local perspective for Spanish-speaking communities

About the Events

Our Vision

Our Mission

To advance innovation with a local perspective that responsibly builds scientific and technical capacities through the co-creation of networks, learning spaces, and accessible resources for Spanish-speaking communities.

**MetaDocencia** was born in the wake of the COVID-19 pandemic as a response to the need and urgency for incorporating tools for a quick and effective switch to educational online events, understanding that isolation increased limitations in accessibility and inclusion both for students and instructors in Latin America.

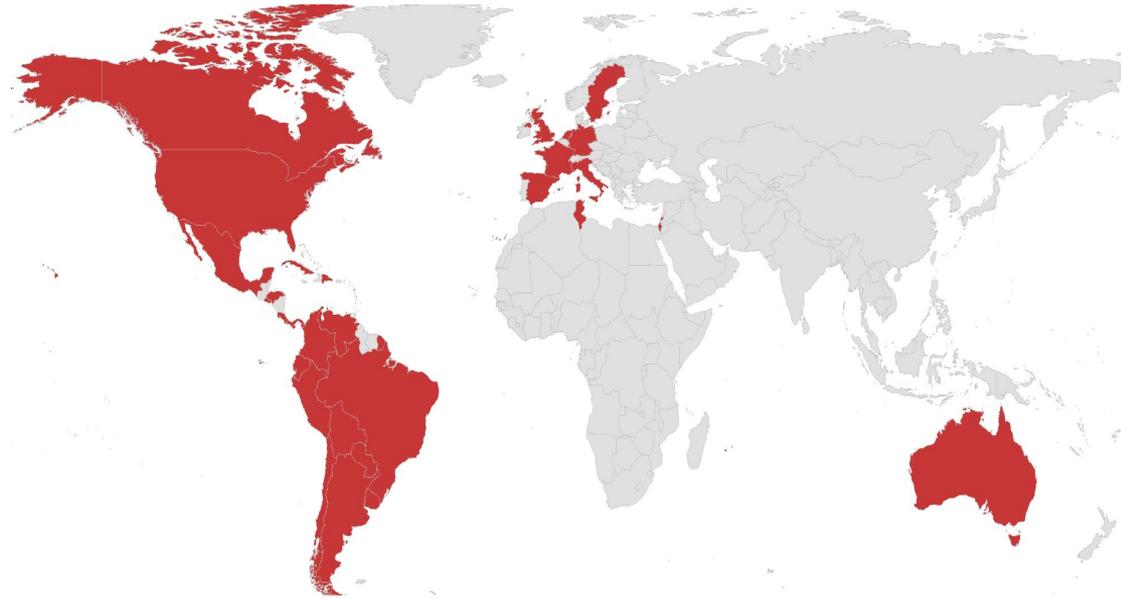

# Who have we reached?

Between March 2020 and November 2022 we conducted **81 workshops**.

Reaching more than **2,000 people** across **30 countries**.

**All of what we do is open, reusable, free, and in Spanish.**

Our courses and materials are shared with an **open CC BY-SA 4.0 license** and **all the events are free** to attend.

98% of workshop participants completed our post-workshop survey and expressed **high satisfaction**.

**Working together is better.** That's why we enjoy working with others and participating in other local and global communities.

## Contributors

**Laura Ación**  
General Coordination

**Mónica Alonso**  
Governance Team

**Laura Ascenzi**  
Communication and Communities Manager
