

PaNOSC Closing Event

Paving the way towards the PaN FAIR Data Commons

29-30 November 2022

Grenoble - France

What PaNOSC changed for us at ESS

Author: Thomas Holm Rod on behalf of the ESS contributors

Affiliation: ESS

30th Nov, 2022

PaNOSC has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no. 823852

Collaborations

Better network throughout Europe,
facilitated collaboration

Better understanding and
integration with our sister facilities

Shared solutions with other
facilities for the benefit of users

AAI, VISA, federated search

PaNOSC has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no. 823852

From open to FAIR data

Moving from Open data to FAIR data

- Updated data policy to comply with FAIR
 - SAC engagement and endorsement
- Ontology for techniques
- Better search for SciCat
- Federated search
- DMP platform implemented - **Improved Reusability**

} **Improved Findability**

Started to consider (3rd party) users of FAIR data

1 TABLE OF CONTENTS

1	General Principles	2
2	Raw data and associated metadata	4
3	Processed data and associated metadata.....	5
4	Auxiliary data	5
5	Results.....	5
6	Glossary	5

Simulations and training

- Improved UI for McStas and moving towards digital twinning
- Sustained e-neutrons
 - Embracing photon community
 - Integrated in pan-training.eu
- Strengthened opportunities for teaching data science aspects through Jupyter
- Convinced us that we should have a data / software focused ESS summer school.

PaNOSC has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no. 823852
