

PaNOSC Closing Event

Paving the way towards the PaN FAIR Data Commons

29-30 November 2022

Grenoble - France

Training Catalogue and e-learning: Post project plans

Andrew R. McCluskey

European Spallation Source ERIC

2022-11-29

PaNOSC has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no. 823852

Work Package 8 (e-learning)

Andy Götz
Marius Retegan

Miguel Gonzalez

Fabio Dell'Antonia

Aljosa Hafner
Nicoletta Carboni

Thomas H. Rod
Peter Willendrup
Andrew R. McCluskey
Stella d'Ambrumenil
Mads Bertelsen
Wojciech Potrzebowski

Teodor Ivanoaica
Mousomi Upadhyay Kahaly
Jirí Bartoš
Martin Dostál
Dora Vörös

Petra Aulin
Fredrik Bolmsten
Alexandre Stefanov
Kareem Galal
Brian L. Jensen
Jesper R. Selknaes
Lottie Greenwood

Work Package 8 (e-learning)

- The development and delivery of an e-learning platform that can be used across the neutron and photon facilities
- Staff training in data stewardship and the e-learning platform
- User training in PaNOSC services and facilities

Platform

Staff Training

User Training

What we have achieved

Platform

- e-neutrons.org has become e-learning.pan-training.eu
- The new platform is significantly more **maintainable**
- Added functionality; such as **Jupyter notebook** integration
- Good engagement from the **community**

What we have achieved

Platform

- e-neutrons.o
- The new plo
- Added funct
- Good engag

The screenshot shows a web browser window displaying the e-learning platform. The browser's address bar shows the URL `e-learning.pan-training.eu`. The website has a dark blue header with navigation links: Catalogue, e-Learning, Events, and About. A user profile for Andrew McCluskey is visible in the top right. A dark blue sidebar on the left contains a menu with items like Dashboard, Calendar, Content bank, Quiz Taster, and various course titles. The main content area features the 'Photon and Neutron eLearning' logo, a welcome message, a search bar, and a list of course categories. On the right, there are three informational boxes: 'First time here?', 'PaN-Wiki', and 'Contact'.

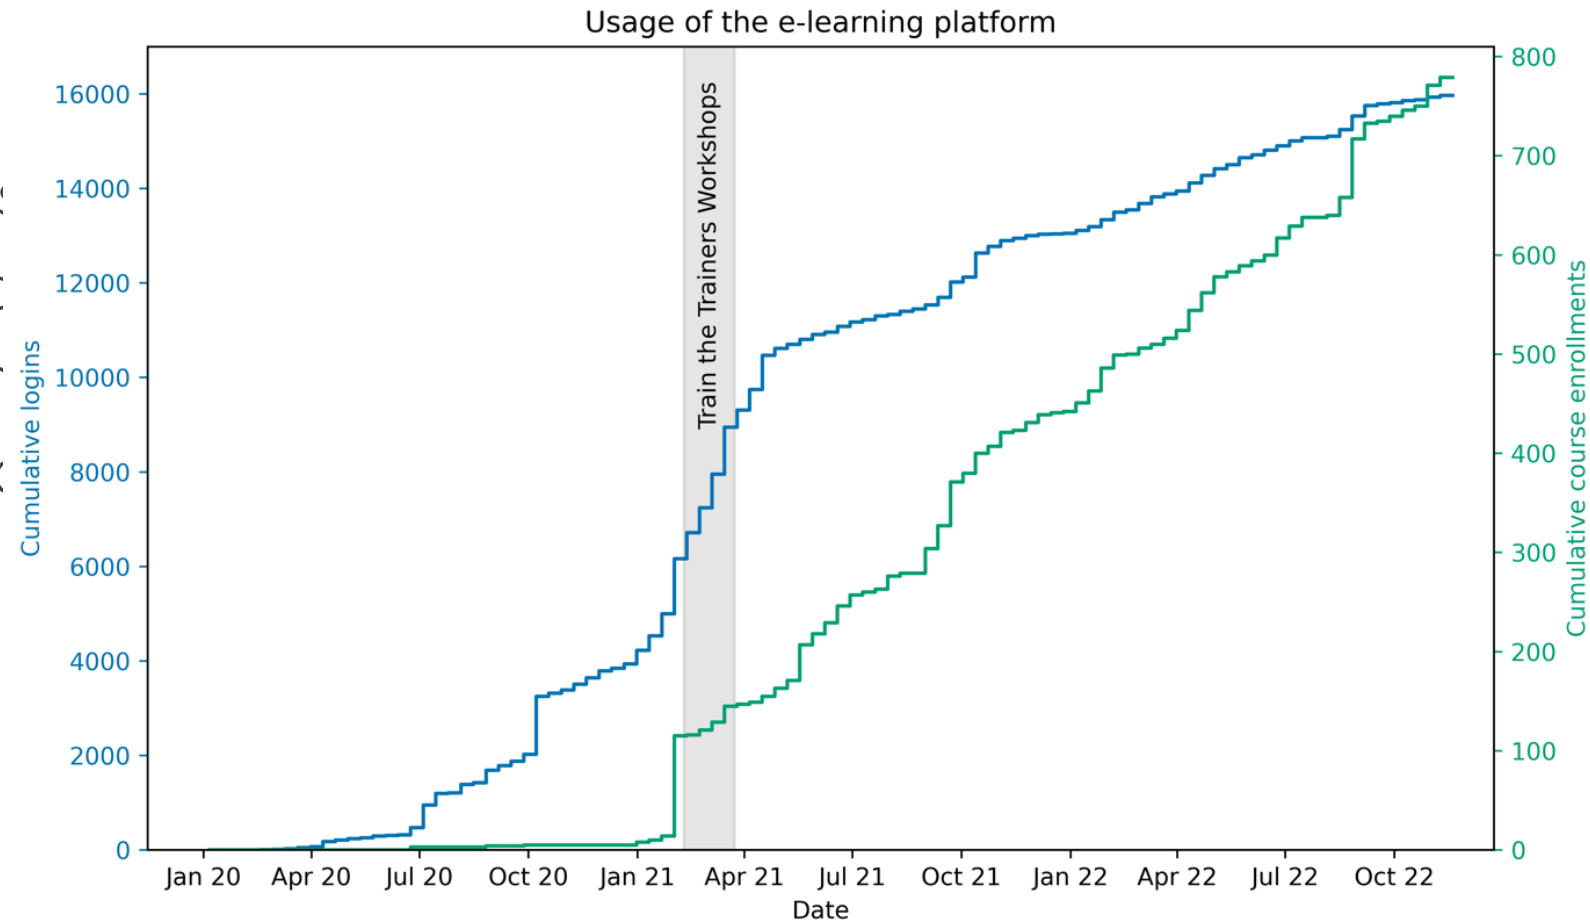

Platform features and content shown in the screenshot:

- Navigation: Catalogue, e-Learning, Events, About
- User: Andrew McCluskey
- Sidebar Menu:
 - e-Learning
 - Dashboard
 - Calendar
 - Content bank
 - Quiz Taster
 - Introduction to Muon Spin Spectroscopy
 - Advanced Topics in Neutron Scattering
 - Introduction to Neutron Scattering
 - Neutron Scattering Library
 - PaNOSC summerschool FAIR session
 - Site administration
- Main Content:
 - Photon and Neutron eLearning logo
 - Welcome to the e-Learning platform
 - Text: *This e-Learning platform hosts free education and training for scientists and students. Below you will find courses on both the theory of photon and neutron scattering and how to use python code or software for data reduction and modelling.*
 - Search courses
 - Course categories:
 - Archive (5)
 - For Teachers (3)
 - For Testing (6)
 - High Intensity Lasers (2)
- Right Sidebar:
 - First time here? Click to request an account.
 - PaN-Wiki: Find Wikipedia-style articles on neutron science along with example problems and solutions.
 - Contact: admin@pan-training.eu

What we have achieved

Platform

- e-neutron:
- The new p
- Added fur
- Good eng

What we have achieved

Staff Training

- Train the trainers workshops in February/March 2021, led by University of Copenhagen Department of Science Education
- Courses on the platform introducing pedagogical topics

Figure 1. Distribution of participants' affiliations among the 31 participants at the Train-the-Trainers workshop.

What we have achieved

Staff Training

Creating a Video Mini-Lecture

e-Learning | Courses | For Teachers | **Creating a Video Mini-Lecture**

- Train the training staff at the University of Liverpool
- Courses on creating video mini-lectures

Recommendations and Tips

We recommend Open Broadcasting Software (OBS) as a great way to record yourself giving a presentation or lecture. It has more flexibility and results in a higher quality video than simply recording your screen on zoom/skype. It is easy to install and much easier to use than any video editing software.

Use the following four resources to help you:

1. **Introduction to OBS** and how it can be used.
2. Tips for good **video layout** (this is useful regardless of whether you chose to use OBS).
3. Links to **OBS download instructions** for Mac, Windows & Linux.
4. How you could **include live annotations** or a blackboard style presentation with OBS

What we have achieved

User Training

- Over 50 e-learning courses:
 - Neutron scattering (University of Copenhagen)
 - Small angle neutron scattering (Swedness PhD Training)
 - **Photosynthesis and Energy (University of Amsterdam)**
 - ISIS Virtual Reflectometry Training Source (ISIS/ESS)
 - Neutrons, X-rays and Positrons for studying microscopic structures and dynamics (TU Delft)
- Materials Science at European Large-Scale Infrastructures using Open and FAIR data (PaNOSC Summer School)

What we have achieved

User Training

- Over 50 e-learning courses
 - Neutron scattering
 - Small angle scattering
 - Photosynthesis
 - ISIS Virtual Reality
 - Neutrons, X-rays and dynamics
- Materials Science and FAIR data (PaNOSC Summer School)

structures

ing Open

What we have achieved

User Training

- Summer school feedback:
 - *The e-learning platform is very useful and the lectures/slides on it are very detailed, especially the hands-on parts are easy to follow up as they provide each step and its logic. It is worthwhile to preserve it since we can go on using and learning it after summer school.*
 - *This was my first international summer school that I have attended, I got a lot of information. The most important thing for me and what I like the most is the hands-on training, during which I learned a lot.*
 - *Very well-organized Summer School with clear talks*

Collaboration

- Throughout the project we have benefited heavily from the complementary WP5 in ExPaNDS:
 - The e-learning platform is included in the training catalogue "Register new content" workflow
 - The training catalogue automatically includes e-learning content in results
 - The e-learning platform and the training catalogue have a shared homepage

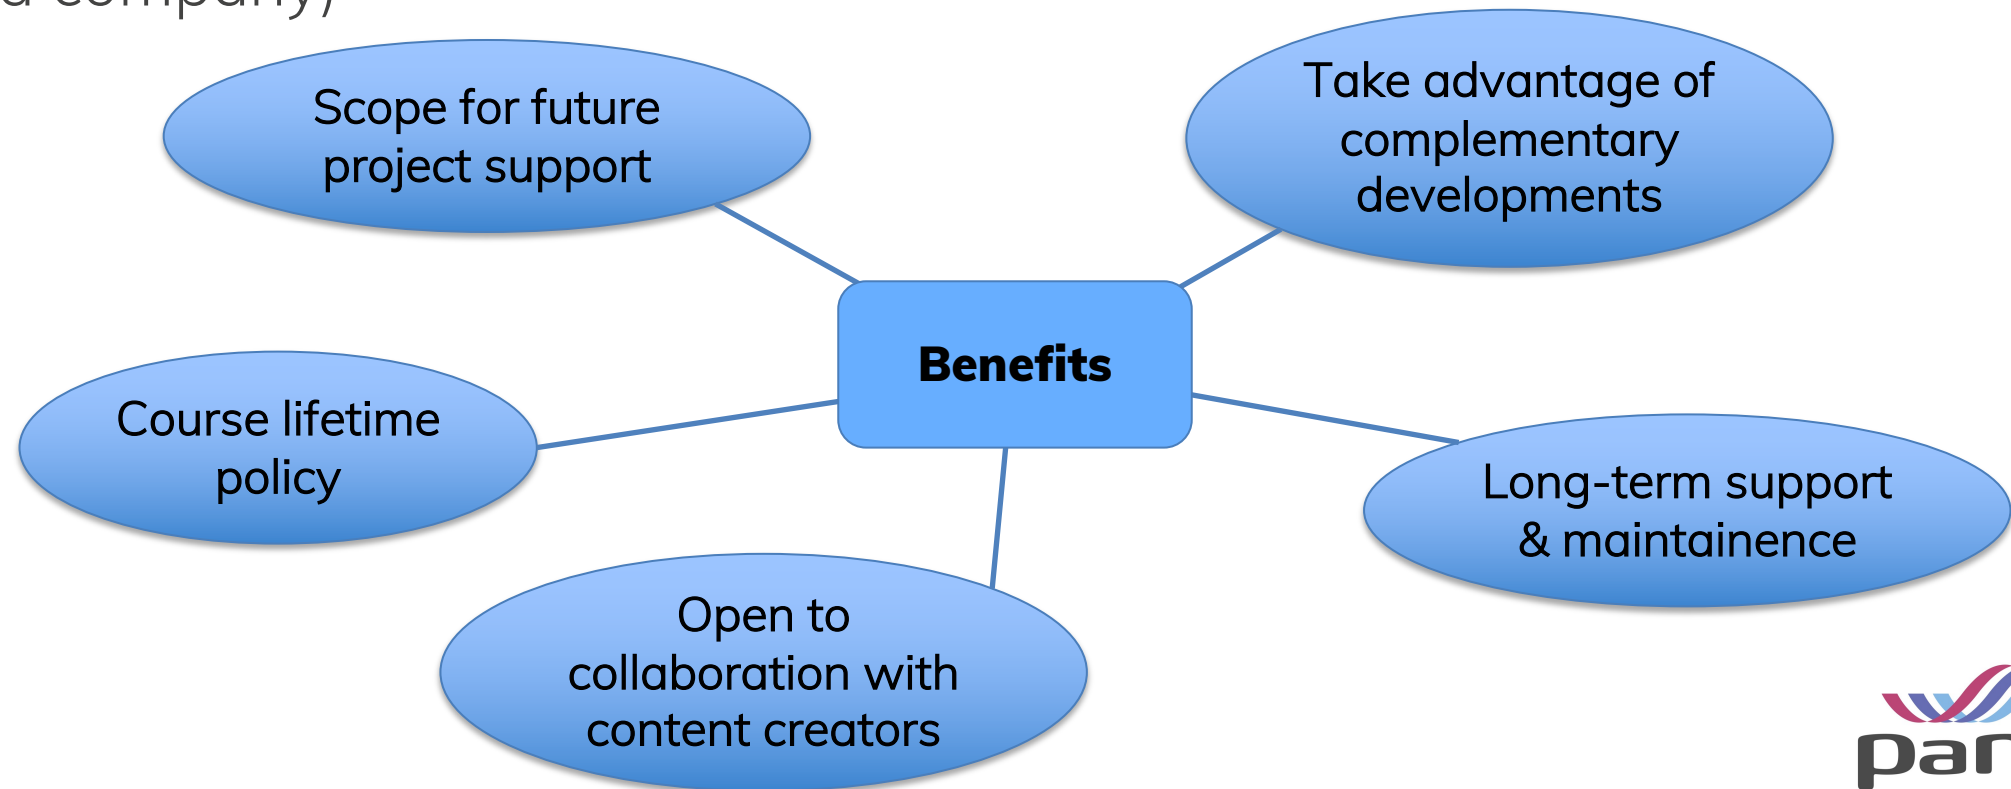

pan-training.eu

What will happen next

Sustaining the e-learning platform

- The e-learning platform will come under ownership of the ESS DMSC's Scientific Web Applications team (i.e. Fredrik Bolmsten, Max Novelli, and company)

PaNOSC Closing Event

Paving the way towards the PaN FAIR Data Commons

29-30 November 2022

Grenoble - France

Thank you
