

Data Management WG (RDM WG):

Workshop

*LIBER RDM Working Group
1 December, 2022
LIBER Winter Event, Amsterdam*

Workshop introduction

This workshop will show the mapping of **skills and qualifications that library staff would need for successful data management**, and a training development will follow.

Agenda:

10:30 Welcoming words

Introduction to RDM WG – Liisi Lembinen,
University of Tartu

10:45 - 1-2-4-All group work

Collecting list of skills

11:45 - “National roadmap for the
qualifications for RDM experts” - Mari Elisa
Kuusniemi, University of Helsinki

11:55 - discussion on skills and qualifications

12:30 - end of the workshop

LIBER RDM Working Group

RDM WG was established out of two motivations.

- 1) to help libraries secure a **critical role** in the 21st century **scholarly information infrastructure** and,
- 2) to **recognize research data** as valuable academic resources that need to be managed, shared and preserved to foster research and science.

The following library professionals from the LIBER network participate in this working group.

The Research Data Management Working Group is part of the Research Infrastructure section of our 2018-2022 Strategy.

For questions about the group's work, please see the [Research Data Management Working Group page](#) or contact the group chairs, [Mari Elisa Kuusniemi](#) and [Liisi Lembinen](#).

Mari Elisa Kuusniemi
Science Information Specialist,
Helsinki University Library

Contact

Liisi Lembinen
Development Director, University of
Tartu Library

Contact

Philipp Konzett
Academic librarian, UIT The Arctic
University of Norway

Contact

Dr. Žilutė Petrauskienė
Director of the Scholarly
Communication and Technologies
Department, Vilnius University Library

Contact

Thomas JounEAU
Research Data Administrator,
University of Lorraine

Contact

Miriam Braskova
Data Steward, Erasmus Research
Institute of Management

Contact

Claudia Kramer
Karlsruhe Institute of Technology

Contact

Rob Grim
Economics (Data) Librarian, Erasmus
University Rotterdam

Contact

Kirsten Krogh Kruuse
Librarian, AU Library, Royal Danish
Library

Contact

Dr Márta Virágos
University of Debrecen, Hungary

Contact

Dragan Ivanović
Associate Professor, University of Novi
Sad

Contact

Dr Ana Petrus
Associate Professor, University of
Applied Sciences of the Grisons

Contact

Naeem Muhammad
KU Leuven

Contact

Resources

Research libraries can have a key role in Research Data Management (RDM), consisting of supporting the entire data life cycle through knowledge, skills, infrastructure and tools.

WG activities in 2023

- Data Curation in libraries **videos**
- Data stewardship curriculum development **webinar**
- **Webinar** on FAIRification tools
- DMP basic knowledge for “regular” librarians **factsheet**
- **Factsheet** on implementing RDM policies
- Cooperating with LIBER and other WGs on **trainings**
- **Workshop** in LIBER Annual Conference in Budapest

JOIN RDM WORKING GROUP

Broaden your network.

Share your knowledge.

Work on RDM topics.

Find out more: [LIBER Research Data Management Working Group - LIBER Europe](#)

Everyone working in a LIBER library is welcome!

1-2-4-All group work

1 - Think about the question alone for - 10 minutes - write down your ideas

2 - Find a partner - discuss your findings - 15 minutes - agree on ideas

4 - Find a pair - discuss your findings - 15 minutes - agree on ideas, be ready to present

All - Share your ideas with everybody - 20 minutes

Discussion questions

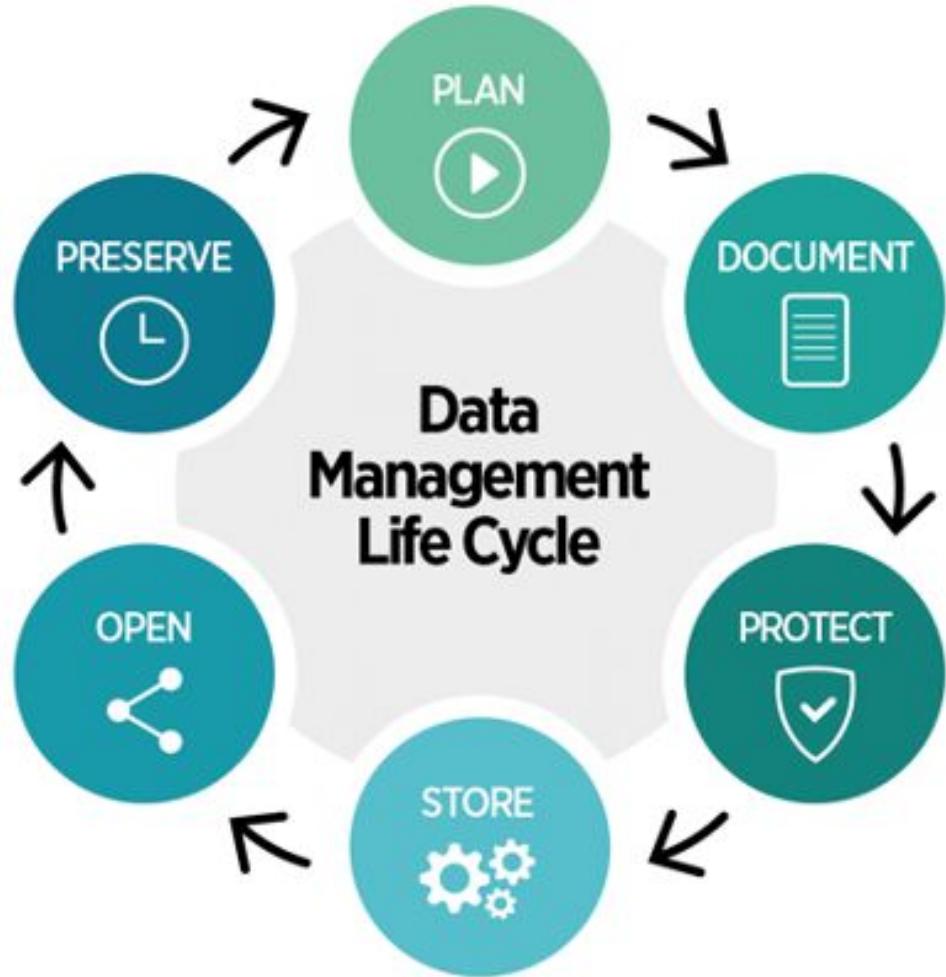

1) What are the **skills** that librarians **need** for data management support?

BONUS: 2) What are the **skills** that we don't need to develop because librarians **already have** these skills?

Look at **data management life cycle**.

Research Data Life Cycle

Discussion

Topics of RDM curriculum?

Training with qualification?

How can these skills be developed into a LIBER training programme? Which LIBER WG should be involved in training development?
