Blue-Cloud

Marine Environmental Indicators

In a Nutshell

Massimiliano Drudi⁽¹⁾, Francesco Palermo⁽¹⁾, Antonio Mariani⁽¹⁾, Rita Lecci⁽¹⁾, Andrea Garcia Juan⁽²⁾, Kevin Balem⁽²⁾, Guillaume Maze⁽²⁾, Loic Bachelot⁽²⁾, Jan Willem Noteboom⁽³⁾, Benjamin Pfeil⁽⁴⁾, Steve Jones⁽⁴⁾, Rocío Castaño-Primo⁽⁴⁾ and Julien Paul⁽⁴⁾, Renaud Dussurget⁽⁵⁾ and Alain Arnaud⁽⁵⁾

(1) Ocean Predictions and Applications Division, Centro Euro-Mediterraneo sui Cambiamenti Climatici, Italy
 (2) LOPS (Laboratory for Ocean Physics and Satellite Remote Sensing), Ifremer, France
 (3) KNMI, Netherlands
 (4) RI ICOS and Bjerknes Climate Data Centre, University of Bergen, Norway
 (5) Mercator Ocean International, France

Blue-Cloud Open Conference

Brussels, 8 December 2022

Blue-Cloud has received funding from the European Union's Horizon Programme call BG-07-2019-2020, topic: [A] 2019 - Blue Cloud services, grant Agreement number 862409.

2021 United Nations Decade of Ocean Science for Sustainable Development

13 CLIMATE ACTION

5.

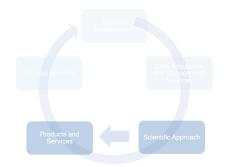

- Scientific support to policy makers and decision makers
- Calculate and distribute environmental information and indicators
- Analyze the quality of marine areas, anticipate undesired states
- Innovative approaches for the analysis of Big Marine Data

08/12/2022

14 LIFE BELOW WATER

Blue-Cloud Open Conference

Methodology

- Sharing of algorithms and scientific references with Jupyter notebooks
- Advancement of the framework for a easy transition, research to operations
 Specification for the interoperability among services for data access and processing
 Toolkit for the software development with implemented common functionalities
 - Guidelines to accelerate the implementation and deploy to production
- Implementation of the new integrated service in production environment
- Exploitation of sustained research infrastructures

08/12/2022

Blue-Cloud Open Conference

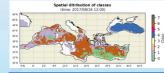

Service Workflow

- added value data

environmental information
indicators and indexes

New knowledge with innovative solutions:

- ✓ Machine Learning
- ✓ Big Data methodology

Input

- physical parameters
- biogeochemical parameters
- essential ocean variables

Temperature, Salinity reanalysis

- Wind reanalysis
- Inorganic Carbon data

Current implementation exploits local copy of input datasets published by Copernicus, EuroArgo, EMODnet
