Synchronisation Workshop 2022

Session 3 - Trustworthy and FAIR-enabling repositories

Tuesday 22nd November, 13.00-14.30 CET

Session 3 - Trustworthy and FAIR-enabling repositories

Maaike Verburg (DANS) - chair
Ryan O'Connor (UEDIN-DCC) - rapporteur

- Workshop series aim: discuss common challenges and priorities related to turning the FAIR principles into practice.
- Session's aim: gather as much information as possible about the current landschap across Europe
- We will hear from some actors to kick discussions off
- This is an interactive workshop - discussion and adding content is warmly welcomed!

Housekeeping

- The session will be recorded but only for internal use.

- Collaborative **spreadsheet** and **note taking document** for use in the session (and until November 28th (CoB)).
  - In the spreadsheet please keep information factual, short and include links wherever possible.
    - Please be careful when editing spreadsheet cells!
    - Don't worry about serial number
  - In the note taking document you may add more detail and narrative.
    - Please put your name/initials with your expressed views in the doc

Recommendation 1

Measure the percentage of the repositories in EOSC that (will) have a certification such as CoreTrustSeal

Questions:

- What is your project or initiative doing to increase the number of trustworthy, FAIR-enabling and/or certified repositories?
- In your project, initiative, or community, do you work with repositories that have a certification such as CoreTrustSeal?
  Please detail how many and who they are and the purpose of the connection to your work
- In your opinion, who are or should be the main actors in relation to this topic?

Recommendation 2

Provide continuous guidance and assistance to small repositories to engage with certification processes.

Questions:

- What guidance and assistance is needed to enable repositories to engage with certification processes or to become more FAIR-enabling?
- What challenges do Trustworthy Digital Repositories face in maintaining certification and becoming more FAIR-enabling?
  Think most of all of small repositories
- In your opinion, who are or should be the main actors in relation to this topic?

Next

- Continue populating the spreadsheet until **Nov 28 CoB**

Next sessions:

- **Thursday 24th November, 14.00-15.30** Metadata, semantics and interoperability

- **Monday 12th December, 13.00-14.30:** Concluding session
  - Presenting the draft findings and conclusions from the topic sessions

- **Early 2023:** First synchronisation workshop report will become available.
