

**This dataset reports:**

Examples of internal radiologic restaging of four representative patients before and after TAS-102 first (QV, TR) or regorafenib first (MA, PR).

Representative modalities of ascertaining and confirming the death date of these four patients who underwent to sequential treatments with TAS-102 and regorafenib (QV, TR) or *viceversa* (MA, PR). Due to privacy restrictions, the unique identification code (fiscal code) of patients is "altered" with red spots.
