

This document is to acknowledge the contributions of 213 undergraduate students from VCU, JMU and UMBC towards the annotation and submission to Genbank of 16 bacteriophage genomes. These phage genomes have been described in a publication “Evidence of a set of core-function genes in 16 *Bacillus* podoviral genomes with considerable genomic diversity”, with a link to this document as part of the acknowledgement. We would like to thank the following undergraduate students for their contributions to bacteriophage annotation, as listed below:
