TABLE OF CONTENTS

1.0   DESCRIPTION OF A TRADEMARK

A trademark is a word, symbol or design, or a combination of these, used to distinguish the goods or services of a person or organization from the goods or services of others in the marketplace. The Canadian Trademarks Database contains information on trademarks and trademark-related items. The related items are areas of information which are not by definition trademarks, yet may be important when determining if a new trademark application is registrable. A full description of what constitutes a trademark is provided in the *Trade-marks Act* and Regulations.

A copy of this publication may be requested from the following address:

2.0   OVERVIEW OF THE CANADIAN TRADEMARK DATA

Canadian trademarks data contain information on trademarks and related items. This section will give an overview of what information is supplied, the approximate volumes of information, the transfer media and a description of the file structures.

2.1   What information is supplied?

This subsection describes the information which is being provided. Where appropriate, volumes will be indicated as well as the volumes of updates and estimates of annual growth. These volumes will be rough approximations and are based on volumes at the time of this document's creation.

2.1.1   TRADEMARKS DATA

Trademarks data presently consists of all textual information captured by CIPO for a trademark. These trademarks may be pending, registered, abandoned, refused, cancelled or expunged. Not all inactive trademarks are contained within the information base. The information base does not contain all trademarks which were cancelled or expunged prior to 1979 or applications abandoned or refused prior to 1980. The collection does contain applications published under section 9 of the *Trade-marks Act*. These section 9 applications also include "6*ter*" marks approved under paragraph 9(1)(*i*) and subparagraphs 9(1)(i.1) and 9(1)(i.3).

2.1.2   OTHER TRADEMARK-RELATED DATA

The trademarks database is constantly being expanded to include other information related to trademarks. Although this information is not truly trademark data, it is related to trademarks in that a trademark application may be refused based on this related information. Examples of this are the symbols and badges of the Boy Scouts of Canada or the Girl Guides of Canada and the *Plant Breeder's Rights Act* which is registered with the Canadian Food Inspection Agency. This related information is combined with the other trademark data and is identified by the Act (legislation) under which the information is protected. A complete list is provided in the detailed record layouts later in this document. For the three examples provided above, the legislations are the *Scouts Canada Act*, "*an Act to Incorporate the Canadian General Council of Girl Guides*" and the *Plant Breeders' Rights Act*.

The following approximate volumes have been identified:

	Applications
Pending applications:	168,600
Registered trademarks:	573,500
Abandoned/Refused:	465,600
Expunged/Cancelled:	332,500
Section 9 applications:	29,600
Total:	**1,569,800**

Weekly new applications:	1,000
Weekly updates (apps/regn):	17,000
Deletion records (per week):	5
Annual new filings:	50,000
Annual growth:	5%

2.1.3 TRADEMARKS DESIGNS

The trademarks designs are also provided. The dissemination file will contain the image of the design mark in PNG format at 300 dpi. Most of the designs are in black and white, with approximately 30% being in grey scale. The format of the designs' names will be "nnnnnnn.PNG" with "nnnnnnn" being the application number of the trademark. There are presently over 400,000 designs. The trademark design file sizes range from 300 Kb for black and white and 800 Kb for grayscale.

2.1.4 UPDATE FILE DATA

An update file is supplied on a weekly basis. This file will contain information relating to trademarks that have been modified since the last update. The update file name is: CA-TMK-UPDATE_[start date]-[end date]_[first application number]_[last application number]_[sequence number].zip.

2.1.5 DELETION FILE DATA

A deletion file is supplied as needed. This file will contain a record for each application number extension counter which has been deleted from the collection. This file is most often used when an extension of goods/services is registered and merged with its original registration. The average volume for this file is 5 records per week. The deletion file name is: CA-TMK-DELETE_YYYY-MM-DD-00h00m00s.zip.

The deletion file will contain a record for each application or application for extension of goods/services which is to be deleted. This file is created when an application was created in error or an application for extension of goods/services is registered. When an extension is registered, the information from the extension is merged with the original registration, at which point the application for extension records are deleted. This file is created to inform the external data distributor when either of these situations occurs. All records for the supplied application number and extension counter combination should be removed from their information files.

2.1.6 ENUMERATION VALUES AND SCHEMA

Enumeration values in WIPO Standard ST.96 are provided in English. CIPO will distribute enumeration values in both official languages for terms used by Canada. The values will be provided in an XML file, CAEnumerationTranslation_V3_0_YYYY-MM-DD.xml, which will be included in the global schema package CA-TMK-GLOBAL_YYYY-MM-DD_Schemas.zip. The corresponding schema for this file is CAEnumerationTranslation_V3_0 _YYYY-MM-DD.xsd.

2.1.7 COUNTRY AND OFFICE DATA

The international standard ISO 3166-1, "Codes for the representation of names of countries and their subdivisions – Country Codes", is used to represent countries for postal addresses. The WIPO standard ST.3, Two-Letter Codes for the Representation of States, Other Entities and Intergovernmental Organizations, is used to indicate the name of the country or the office with which the earlier filing was made when trademark applicants claim priority filing.

When the country is missing for a postal address, the address information will be provided in an unstructured format.

2.1.8 DATES

Most dates contained in the file are in the format YYYY-MM-DD. When the dates cannot be distributed in this format, they will be made available in an unstructured format. This situation is found in the claims section.

For certain claim dates, the day or the month and day may be zeros (i.e. 19421100 or 19420000). In these cases the day or the month and day will be blank for display purposes (i.e. Date of first use in Canada Nov/Nov 1942 or Date of first use in Canada 1942). If the day is zero (i.e. 19421100 Date of first use in Canada, Nov. 1942) the end of the month is assumed. If the month and day are zero (i.e. 19420000, Date of first use in Canada 1942) the end of the year is assumed.

2.2   Trademark information included

The following list will highlight the types of information which are available for a trademark. Not all information is available for all trademark(s); it depends on the status of the trademark application. All applications are assigned a unique application number. Any application to extend goods/services will have a unique extension counter. Within the data will be codes for certain information. The expanded versions of the codes are described in the detail record layout. If the expanded code values are to be shown in both official languages, both language versions of this manual are required.

2.3   Description of media

The trademark and related information is supplied in UTF-8 format where ZIP is the compression used for dissemination.

Backfile products

Trademarks back file data are available on DVD. Back file data provides the means to build an initial database. Trademark back file designs, sounds and videos are available in non-compressed PNG, MP3 and/or MP4 format on DVD.

Weekly updates

Weekly updates of trademark data, designs and sounds are available as an automated file transfer by FTP every Tuesday. They include changes to existing data and new applications. The designs are supplied in non-compressed PNG format, the sounds in MP3 format and the videos in MP4 format. The update and deletion files containing specific application numbers/extension counter numbers for deleted applications and matured extensions are sent to the data distributors on a weekly basis.

Semi-annual updates (global refresh)

Trademark data, designs and sounds are updated semi-annually to refresh an existing database. The semi-annual updates are provided on DVD. The semi-annual update file name is: CA-TMK-GLOBAL_[extraction date]_[first application number]_[last application number]_[sequence number].zip.

The semi-annual update will also contain a schema folder named CA-TMK-GLOBAL_[extraction date]_Schemas.zip.

2.4   Description of file structure

CIPO's trademarks data is distributed in the XML schemas as defined in the WIPO Standard ST.96 version 3.0. All information regarding this standard as it relates to the file structure and technical specification can be found on the WIPO website at:

13.	ST.13 Application Number	<com:ST13ApplicationNumber>*300000010269700*</com:ST13ApplicationNumber>	The trademark application number format recommended in WIPO Standard ST.13. The ST.13 Application Number format is made up of the following elements:
			
			• <type> <year> <serial>:
			
			   o **<type>: the type of industrial property right (2 digits)**
			
			   o **<year>: the year designation (4 digits)**
			
			   o **<serial>: the serial number (9 digits)**
			
			• **For the <type> the value for trademarks is 30**
			
			• **CIPO does not use the <year> designation so this will always be 0000**
			
			• **The <serial> will be comprised of the File (application) Number and an Extension Counter**
			
			This key is unique for each application and includes an Extension Counter which will make each extension of goods/services unique.
			
			For the original application/registration, this extension counter will be '00'. For an Application to extend the Goods/Services to exist (Extension Counter > 00), the original Registration must exist (Extension Counter = 00). The extension counters for an application do not need to be sequential.
			
			The Application Number range is from 0000001 to the latest filed application. There are gaps in the range before application number 0417000, as not all old inactive applications were originally data captured. All applications from 0417000 to the latest filed application are included. Certain special application number ranges exist:
			
			 – 09nnnnn Section 9(1)(e) and (n) applications
			
			 – 097nnnn Section 9(1)(i) applications
			
			 – 0980nnn Boy Scouts, Girl Guides, and Royal Canadian Legion

APPENDIX G — CIPO OFFICE ACTIONS

The values of the codes are:

01   **Created:** The very first step in the automated trademarks registration process is to create a paper file in order to store all related paper documents.

02   **Transferred:** This action is created when a partial ownership occurs or when an application to extend the goods/services is moved to its own file. In either situation, the old file/application status is set to "transferred". The old file/application is maintained for reference purposes.

03   **Inactivated:** The application has become inactive.

04   **Re-activated:** The application has become reactivated from its previous inactive status prior to formalization.

05   **Withdrawn by Owner:** The application has been withdrawn by the applicant.

06   **Abandoned - Section 36:** The application has been abandoned by the **Trademarks Office** for being in default (failure to comply with an Office request in the allocated time) in the prosecution of an application filed under the *Trade-Marks Act.*

07   **Abandoned - Subsection 40(3):** The application for the registration of a proposed trademark is deemed to be abandoned for failure to provide a declaration of use to the Registrar stating that the applicant is using the specified goods and/or services as outlined in the application.

08   **Cancelled - Subsection 16(3):** The proposed goods and/or services have been cancelled for failure to provide a declaration of use to the Registrar stating that the applicant is using the specified goods and/or services as outlined in the application. This action is created if, after the proposed goods/services are cancelled, there remain goods/services which have been used; otherwise the entire application would have been abandoned, in compliance with section 40(3).

09   **Refused:** The application for the registration of a proposed trademark has been refused by the Registrar of trade-marks.

11   **Abandonment Removed:** The "abandoned" status has been removed.

12   **Extension of Time:** An extension of time has been granted to the applicant in order to respond to a request by the **Trademarks Office**.

13   **Default:** The application for the registration of a proposed trademark is in default for failure to respond to a request by the **Trademarks Office**. If the default is not corrected the next step would be "Abandoned - section 36".

14   **Default Notice Sent:** A notice of default has been sent to the applicant

15   **Correspondence Created:** The Trademarks Office has generated correspondence to the applicant/registrant.

17   **Abandoned:** The application for the registration of a trademark has been abandoned. This is an old code from the previous computer system which did not identify under which section the abandonment took place (section 36, 40(3), section 38). While this code exists

for old abandoned applications, it should not occur for ongoing abandonments.

18   **Extension of Time Refused:** The Trademarks Office has refused a request for an extension of time by the applicant.

19   **Extension of Time Refused - No Fee:** The Trademarks Office has refused a request for an extension of time by the applicant for failure to pay the required fee.

20   **Examiner's First Report:** The examiner has completed the first report on the application for the registration of a trademark application.

21   **Examiner's Letter:** The examiner has completed the report on the application for the registration of a trademark application.

22   **Search Recorded:** A detailed search for any potential impediments to the successful registration of the trademark application has been completed.

23   **Default Removed:** The "default" status has been removed from the application.

24   **NUANS Search Recorded:** A NUANS search (Innovation, Science and Economic Development Canada's corporation's database search engine) has been completed for the application. This is an old code and the NUANS search is no longer performed by the Office.

25   **Search Removed:** The "search" action has been removed.

26   **Approved:** The application for the registration of a trademark has been approved by the **Trademarks Office**.

27   **Approval Notice Sent:** An approval notice was sent to the applicant or his agent for his review of the information in the application for the registration of a trademark.

28   **Approval Removed:** The "approval" status has been removed from the application.

29   **Accepted for Publication:** The application for the registration of a section 9 mark has been accepted for publication in the *Trade-marks Journal*.

30   **Filed:** The date a complete application for the registration of a trademark has been filed with the **Trademarks Office**.

31   **Formalized:** This action will come after the "filed" action. At this stage, the application has adhered to all of the rules and regulations for the format and content on the application. The information can now be made available to the general public.

32   **NUANS Report Removed:** The NUANS search report has been removed from the application.

33   **Security Interest / License Agreement Recorded:** A security interest or license agreement has been received and recorded by the **Trademarks Office**.

34   **Partial Ownership:** Partial ownership by two parties sharing part or all of the rights to the use of the trademark.

35   **Accept for Publication Removed:** The acceptance for publication in the *Trade-marks Journal* has been removed for the application.

37   **Amendment to Goods or Services:** A change has been made to the goods and/or

services for the registration.

42   **Advertised:** The mark is advertised (published) in the *Trade-marks Journal*.

43   **Re-advertisement Requested:** Re-advertisement in the *Trade-marks Journal* has been requested for the application. This normally occurs due to a significant error in the original publication of the application.

44   **Erratum Requested:** An erratum or mention of some minor correction to the application in the *Trade-marks Journal* has been requested.

45   **Erratum Published:** The erratum or mention of some minor correction to the application has been made in the *Trade-marks Journal*.

46   **Subsection 37(3) Notice Sent:** A notice is sent to the owner of an existing registration by the **Trademarks Office** when the Registrar is in doubt whether the new trademark application is registerable based on the existing registered mark.

47   **Advertisement Removed:** The "advertised" status has been removed for the application.

48   **Agent Changed:** The agent for the application has changed.

49   **Extracted for Advertisement:** The application has been extracted from the Intrepid database for inclusion in the *Trade-marks Journal*.

50   **Allowed:** The application for the registration of the trademark has been allowed. This occurs after the 2-month opposition period from advertisement has passed if no opposition has been filed or resolved.

51   **Allowance Notice Sent:** An allowance notice has been sent to indicate that the application for the registration of the trademark has been allowed. Any additional registration requirement by the **Trademarks Office** that needs to be fulfilled for registration will be included in the allowance notice. This could include part or all of the following:
   a)   request for registration fee payment;
   b)   request for declaration of use for any proposed goods and or services included in the application.

52   **Allowance Removed:** The "allowance" status has been removed from the application.

53   **Document Placed on File:** Records that a document has been placed on the trademark file.

54   **Rights Revoked:** The rights granted under the *Plant Breeders' Rights Act* have been revoked/removed by the Canadian Food Inspection Agency.

55   **Registered:** The trademark has been registered.

56   **Registration Removed:** The "registered" status has been removed for the application.

57   **Amendment to Registration:** An amendment has been made to the registration. This can consist of:
-   The addition or removal of goods and or services.
-   A correction or change in the name, address or description of the registered owner or his representative for service.
-   A cancelation of the registration.
-   The addition of a disclaimer which does not extend the rights in any way.

58   **Refusal Removed:** The status "refused – awaiting appeal" has been removed for the application.

59   **Second Renewal Notice Sent:** A second renewal notice has been sent to the representative for service / current owner requesting renewal fees. This may occur when the Office sent the original renewal notice to an incorrect address while the correct address was on file.

60   **Renewal Notice Sent:** A renewal notice has been sent to the representative for service / current owner requesting renewal fees.

61   **Renewed:** The registration has been renewed by the **Trademarks Office**.

62   **Expunged—Failure To Renew:** The registered trademark has been expunged by the **Trademarks Office** for failure to renew.

63   **Renewal Removed:** The renewal action was recorded in error. The renewal date will be rolled back to its previous date. The registration may be in a position to be expunged for failure to renew.

64   **Expungement Removed:** The "expungement" status will be removed for the registration.

65   **Cancelled by Owner:** The registration has been cancelled by the owner.

66   **Cancellation Removed:** The "cancellation" status has been removed for the registration.

67   **Agent Name Changed:** Indicate that the name of the agent has changed. While action code 48 is an agent change, this action (67) indicates that, while the actual agent remained the same, there was a change in the agent name information.

68   **Rep for Service Name Changed:** Indicate that the name of the representative for service has changed. While action code 87 is a rep for service change, this action (68) indicates that, while the actual representative for service remained the same, there was a change in the representative for service name information. NOTE: this code will be removed in a future release and can be ignored until then.

70   **Opposed:** The application for the registration of a trademark has been opposed.

71   **Opposition Removed:** Any opposition against the trademark has been removed.

72   **Abandoned - Section 38 Opposition:** The application for the registration of a trademark has been abandoned by the applicant during the opposition process.

APPENDIX K — CIPO TRADEMARK STATUS

The values of the codes are:

01 - Pre-formalized
An application is deemed pre-formalized as soon as it is created, and before all of the components that make up a complete trademark application have been received.

02 - Formalized
An application is deemed formalized when all of the components that make up a complete trademark application have been received.

03 - Abandoned Section 36
Abandoned due to failure to comply to specific requests by the Registrar to the applicant. The Registrar may, after giving notice to the applicant of the default, treat the application as abandoned, unless the default is remedied within the time specified in the notice.

04 - Abandoned Section 40(3)
In case of failure to respond to requests for a declaration of use, the application will be deemed abandoned under subsection 40(3).

05 - Refused
Generic refusal (see also code 31 - Refused - Subsection 38(8))
The **Trademarks Office** has the right to refuse an application for a trademark under various grounds.

06 - Default - Searched
Applications with this status have failed to comply to a request by the trademarks examiner.

07 - Approved
The application has been approved by an examiner in the Examination section for publication.

08 - Accepted for Publication
When a section 9 mark/application has been reviewed for compliance to section 9 and is acceptable for publication.

09 - Advertised
The application has been published in the *Trademarks Journal*.

10 - Opposed
The application has been opposed and is being held in opposition until a decision has been rendered by the Trademarks Opposition Board. Any opposition must be filed within 2 months of the mark being advertised.

11 - Allowed
After the 2-month opposition period from advertisement has passed or any opposition have been resolved in the applicants favour, the application will be allowed. In this status, the Office is awaiting the registration fee and/or a declaration of use (for proposed use).

12 - Registered
Once all requirements for an acceptable application have been met, the mark will be registered. The registration will be in effect for a period of 15 years, with subsequent renewals being allowed.

13 - Expunged

Expungement can occur if the registrant / current owner fails to renew the trademark or specific requests made by the **Trademarks Office** for proof of use have not been actioned.

14 – Cancelled by Owner

The owner of a trademark can at any time request cancellation of the trademark, after which point the trademark is considered inactive.

15 - Withdrawn

A section 9 mark can be withdrawn on request of the owner, after which it is deemed inactive.

17 - Inactive - Partial Transfer

This status is created when a partial ownership occurs or when an application to extend the goods/services is moved to its own file. In either situation, the old file/application status is set to "transferred". The old file/application is maintained for reference purposes.

18 - Merged

This status will occur in two situations. The first is where an Application to Extend Goods/Services has been processed to registration and the extended goods/services are added to the original registration. At that time the Application to Extend Goods/Services will have its status set to Merged. The second situation is where two registrations that had originated from a Division are merged. In this case the new registrations goods/services will be combined with the older registration and the new registrations status will be set to Merged.

19 - Abandoned

Generic "abandoned" status. Applications where the owners have ceased to pursue the process for registration. Applications prior to 1997 which have been abandoned are grouped into this status. In November 1996, the **Trademarks Office** added status 20 (abandoned voluntary) and status 22 (abandoned under Subsection 38(7)) in order to distinguish between the different forms of abandonment.

20 - Abandoned – Voluntary Withdrawn by Owner

Applications where the owners have voluntarily chosen to abandon/withdraw their application.

21 - Withdrawn

22 - Abandoned - Section 38(7)

Applications where the owners have chosen to abandon their right to proceed with the process to register their application for a trademark during the opposition stage.

23 - Granted

PBRA, "*Plant Breeders' Rights Act*" applications where the owners have been granted permission to the use of a specific plant denomination name.

24 - Surrendered

PBRA, "*Plant Breeders' Rights Act*" applications where the owners have surrendered their right to the use of specific plant denomination name.

25 - Default - Allowed

The application has come into default for failure to respond to a request made in the allowance notice.

26 - Searched
Applications with this status have had their requested trademark searched for registrability prior to being examined by a trademark examiner.

27 - Entered on the List
Geographical indication that has been entered on the list of protected geographical indications.

28 - Removed
Geographical indications that have been removed from the list of protected geographical indications.

29 – Cancelled

30 – Expunged Section 45(3)
Expunged for failure to comply to a request by the **Trademarks Office** to provide an affidavit or a statutory declaration showing, with respect to each good or service specified in the registration, whether the trademark is in use in Canada.

31 - Refused - Section 38(8)
Refused while in opposition (see also code 05 - Refused).

32 - Inactivated
Generic "inactive" status for a trademark application. Generally this status will be used when a file is created in error. This situation could occur when a revised application was accidentally handled as a new application and put in its own file. Instead of deleting the file (this would cause a missing application number and the file may have been accessed/referenced by the public) the status is set to inactive to indicate that it is not an active/valid application.

33 - Protected
Indicates that a national flag of a country of the Union is protected under paragraph 9(1)(i.2) of the *Trade-marks Act*. While these flags do not need to be published to obtain this protection, certain flags have been included in the database for reference.

34 - Default - Pre-formalized
The application has come into default for failure to respond to a request for information to complete the initial application.

35 - Default Formalized
The application has come into default for failure to respond to a request for information.

36 - Refused - Awaiting Appeal
The application has been refused by the Office (either in Examination or by the Trademarks Opposition Board). However, either the 2-month appeal period has not passed or the refusal has been appealed to the Federal Court.

37 - Not Recommended
Indicates that an indication has not been recommended for entry on the list of geographical indications.

38 - Refused - Appeal in Progress
The application has been refused by the Office (either in Examination or by the Trademarks Opposition Board), However, the refusal has been appealed to the Federal Court.

40 – Registration Pending

41 – Default Registration Pending

42 – Inactive - Transferred

54 - Revoked
When the rights granted under the *Plant Breeders' Rights Act* (PBRA) are removed by the Canadian Food Inspection Agency.

55 – Deemed Never Filed
When an application did not meet all the filing requirements within the response time of the Office letter, it is deemed never to have been filed.

60 - Proposed Opposition
The application has been proposed for opposition, which means that an intention to oppose was raised but no statement of opposition has been received by the Office. Any proposed opposition must be filed within 2 months of the mark being advertised.

DEFINITIONS, ACRONYMS AND ABBREVIATIONS

The following table includes definitions for all the unique symbols or notations used in the document, of may cause confusion with the intended message, or may result in multiple interpretations of some key terms.

Term	Definition
6*ter*	The term 6*ter* refers to marks protected under section 6*ter* of the Paris Convention for the Protection of Industrial Property. These marks and symbols are protected by the *Trade-marks Act* (TMA) under section 9.1(i) and related subsections.
Abandoned	An application is viewed to be abandoned when the owner or appointed agent fails to respond to an Office request within the allowed time period, or the application is voluntarily abandoned. Depending on the Office request, the owner/agent may be allowed an extension of time to respond. The abandoned applications are important for searching purposes, for they may identify areas/reasons for an objection for a similar application.
Act pertaining to Trademarks	This was the first trademark legislation in Canada. This legislation is pre-Confederation, with the original owners' addresses mentioning Upper and Lower Canada. There are still two active trademarks filed under this legislation.
Agent	A person or firm who meets the requirements of the Office as specified under Regulations, section 21. The Office will correspond with the designated agent as if the correspondence were addressed with the owner. Any notices served on the designated agent will be viewed as being served on the owner. The designated agent may amend the trademark application as required.
Application	The application is the original filing for a trademark. The information on the application will be data captured along with any actions and changes which may take place during the life of the trademark application/registration. The application will normally be referred to as a "registration" when the application has been registered.
BF Date	Bring Forward date.
Boy Scouts	The references to Boy Scouts in this document are to the emblems, badges and decorations descriptive or designating marks and titles used by the Canadian General Council of Boy Scouts. These marks are protected under the *Scouts Canada Act*. New marks and symbols may still be filed under this act and have all the protection of any other trademark. A mark under this act is not registered, it is only approved.
Cancelled	A trademark registration is deemed cancelled when the Office has processed a request by the owner to cancel the registration, or the Federal Court of Canada has cancelled the registration under section 55 of the *Trade-marks Act*. Upon cancellation, the mark will be considered inactive.

Expunged	A trademark registration is deemed to be expunged for failure to respond to one of the following Office requests: – renewal (section 46) – failure to supply requested information (section 44) – failure to provide evidence of use (section 45)
Extension of Goods/Services	This is an application to extend the goods/services that are protected by an existing trademark registration. The trade-mark registration must be active at the time the extension of goods/services is filed. When the extension of goods/services is registered, the extended goods/services will be added to the original registration.
Extension of Time	The Office may at its discretion allow for an extension of time in which to comply with a notice from the Office. The extension of time is most commonly given when a declaration of use is required for proposed applications before the application may be registered.
Girl Guides	The references to Girl Guides in this document are to the emblems, badges and decorations descriptive or designating marks and titles used by the Canadian General Council of Girl Guides. These marks are protected under "*an Act to Incorporate the Canadian General Council of Girl Guides*". New marks and symbols may still be filed under this act and have all the protection of any other trademark. A mark under this act is not registered it is only approved by the Canadian Intellectual Property Office.
Inactive trademark	A trademark which is no longer in good standing with the Office. These will include applications which have been abandoned or refused, and registrations which have been cancelled or expunged.
INTREPID II	INTREPID II is a client-server architecture system that was designed to perform the administrative and data processing requirements of all the sections within the **Trademarks Office**, as well as controlling the workflow of a trademark application through the Office, from receipt through the opposition process, to registration of the trademark.
Newfoundland	The reference to Newfoundland in this document is to the trademarks protected under the Newfoundland Trade-mark Act. This act was in effect in Newfoundland prior to Newfoundland joining Confederation. Particular rules and restrictions apply to the trademarks protected under this act.
Pending Owner	This term refers to an entity (company, individual, organization) which has indicated that they are the new owners of the affected trademark(s), but due to some omission of information, the Assignment section is not able to officially record the assignment. This entity will be recorded as a pending owner until such time as the missing information has been provided. Examples of missing information would be associated marks which have not been assigned, or no supporting documentation to substantiate the assignment.
Plant Breeders' Rights Act	This term refers to the Canadian Food Inspection Agency's "*Plant Breeders' Rights Act*". This act protects the names of new plant breeds. No trademark may infringe on the rights given under the "*Plant Breeders Rights Act*". The trademarks collection will contain information on the names protected under this act.

Refused	A trademark application will be refused by the Office when the application is deemed to not satisfy the requirements of a trademark application, or the trademark application is not registrable, or the applicant is not the person entitled to the trademark registration because it is confusing with another pending trademark.
Registration	When a trademark application meets the entire requirement as laid out in the *Trade-marks Act* and Rules the application will be registered. The application at this point will be considered a registration.
Representative for service	A person or firm to whom the Office will send all correspondence after registration, with the same effect as having sent the correspondence to the owner. An owner who has no Canadian address is required to have a rep. for service upon registration. Although not required, the rep. for service may be an agent.
Section 9	This term refers to the section of the *Trade-marks Act* dealing with prohibited marks. The section 9 applications recorded on the trademarks collection are those protected under paragraphs and subparagraphs 9(1)(e), 9(1)(n)(i), 9(1)(n)(ii), 9(1)(n)(iii), 9(1)(n.1), 9(1)(i), 9(1)(i.1), 9(1)(i.3). A section 9 application is not registered; only allowed.
