

Mapping

| Original name | CT | LC |
|---------------|----|----|
| Fallowland | 0 | 10 |

Validity time

Took attribute Survey_dat

IRR

Took attribute Water_Reso (rainfed linked to IRR = 100)

Filtering

This dataset was extracted from the overall dataset.

Correction

No corrections carried out

Geometry transformations

Dataset was first transformed to projected coordinate system **WGS_1984_UTM_Zone_36N** to calculate the area in square kilometre and later transformed to **EPSG:4326-WGS1984**. It should be noted that during the course of projection transformations, the area or shapes of the entire dataset was preserved in its original state.

Spatial accuracy

The spatial accuracy was validated manually using Google Satellite Image basemap in QGIS and World Imagery basemap in ArcGIS.

| Spatial accuracy class | Selected |
|------------------------|----------|
| 0-10 | X |
| 10-30 | |
| 30-100 | |
| 100-250 | |
| 250-500 | |
| >500 | |
