## Il progetto Interreg BIGWOOD

Gli edifici in legno sono in crescita in tutto il mondo e si sono già affermati dal punto di vista ecologico. Nel settore dell'edilizia a più piani, tuttavia, la fiducia nel legno come materiale da costruzione è ancora troppo scarsa in tutto il paese. Il progetto BIGWOOD si concentra sulla creazione di una rete sovraregionale per superare i pregiudizi e le barriere che esistono contro l'edilizia multipiano e di grandi volumi in legno.

BIGWOOD – think BIG in WOOD

### Durata del progetto

01/10/2019 – 31/03/2022

**ERDF:** 666.766,57 Euro

**Total Budget:** 883.831,28 Euro

- **Rete internazionale / sovraregionale** sul tema della costruzione in legno di grandi volumi tra i partner del progetto
- **Piattaforma** per i principali **stakeholders**, quali promotori immobiliari, pianificatori, politici, istituti di istruzione e di ricerca
- Creazione di **strumenti di progettazione** aggiornati allo stato dell'arte combinando soluzioni di sistema per strutture in legno a più piani
- Sviluppo e costruzione di un **mockup 1:1** a Bolzano e di modelli dimostrativi mobili

## Discriminating People's Attitude towards Building Physical Features in Sustainable and Conventional Buildings

Marco Caniato \* and Andrea Gasparella

Faculty of Science and Technology, Free University of Bozen-Bolzano, Bolzan 39100, Italy; andrea.gasparella@unibz.it

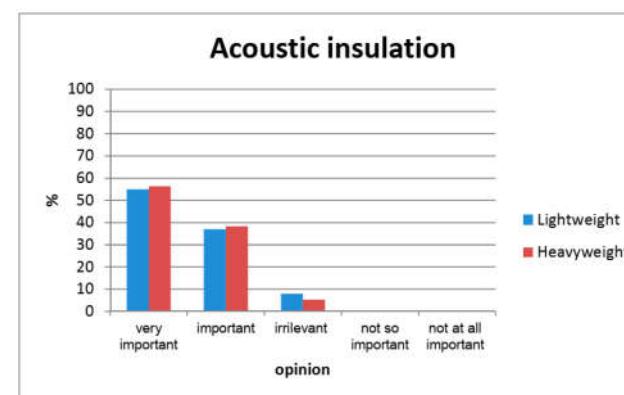

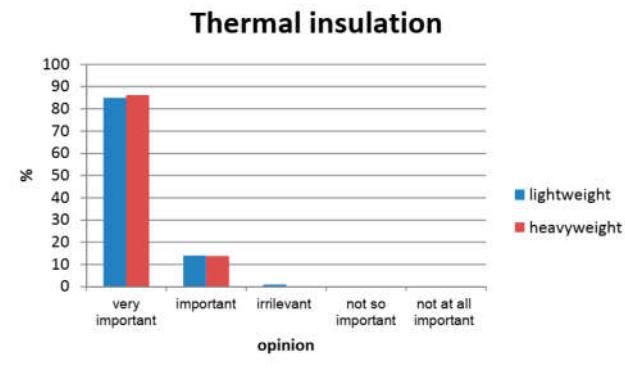

\* Correspondence: marco.caniato@unibz.it

Received: 7 March 2019; Accepted: 10 April 2019; Published: 13 April 2019

**Abstract:** At the present time, buildings technologies for residential constructions are essentially divided into two groups. The first one is associated to conventional techniques using concrete, masonry or in general heavyweight structures, while the second one is associated to timber, e.g., sustainable glulam, crosslam, etc. (lightweight structures). Technicians, scientists, designers and non-expert people have their own stereotyped ideas and attitudes, related to thermal and sound insulation, structural stability, fire resistance, service equipment, heating and cooling systems, etc.

Keywords: *timber; concrete; masonry; insulation; residential buildings; stereotypes*

Instructions:		Not at all									
Please indicate on the following how much noise from neighbours disturbs or annoys you when you are at home.											
If you hear a small amount of noise from your neighbours, choose 1; if you are disturbed by moderate amounts of noise, choose 2; if you are disturbed by a large amount of noise, choose 3; if you are disturbed by extremely large amounts of noise, choose 4; if you do not hear anything at all, the situation does not annoy you at all, choose 5; if you do not know, choose "Don't know".											
Thinking about the last 12 months in your house: how much are you bothered, disturbed or annoyed by:											
1. Noise in general e.g. from neighbours, technical installations		<input type="checkbox"/> Not at all <input type="checkbox"/> Somewhat <input type="checkbox"/> Quite <input type="checkbox"/> Very <input type="checkbox"/> Extremely									
Thinking about the last 12 months in your house: how much are you bothered, disturbed or annoyed by these sources of noise?											
2. Neighbours; daily living e.g. people talking, audio, TV through the walls (what's heard)		<input type="checkbox"/> Not at all <input type="checkbox"/> Somewhat <input type="checkbox"/> Quite <input type="checkbox"/> Very <input type="checkbox"/> Extremely									
3. Neighbours; daily living e.g. people talking, audio, TV through the floors (what's heard)		<input type="checkbox"/> Not at all <input type="checkbox"/> Somewhat <input type="checkbox"/> Quite <input type="checkbox"/> Very <input type="checkbox"/> Extremely									
4. Neighbours; Music with bass and drums		<input type="checkbox"/> Not at all <input type="checkbox"/> Somewhat <input type="checkbox"/> Quite <input type="checkbox"/> Very <input type="checkbox"/> Extremely									
5. Neighbours; footstep noise i.e. you hear when they walk on the floor		<input type="checkbox"/> Not at all <input type="checkbox"/> Somewhat <input type="checkbox"/> Quite <input type="checkbox"/> Very <input type="checkbox"/> Extremely									
6. Neighbours; rattling or tinkling noise from your own furniture when the neighbours move on the floor above you		<input type="checkbox"/> Not at all <input type="checkbox"/> Somewhat <input type="checkbox"/> Quite <input type="checkbox"/> Very <input type="checkbox"/> Extremely									
7. Internal access (corridor etc., people talking, doors being closed)		<input type="checkbox"/> Not at all <input type="checkbox"/> Somewhat <input type="checkbox"/> Quite <input type="checkbox"/> Very <input type="checkbox"/> Extremely									
8. Staircases, access balconies etc., rattling or other impact sounds		<input type="checkbox"/> Not at all <input type="checkbox"/> Somewhat <input type="checkbox"/> Quite <input type="checkbox"/> Very <input type="checkbox"/> Extremely									
9. Water redistributors, plumbing, Leaking or Raining WC, shower		<input type="checkbox"/> Not at all <input type="checkbox"/> Somewhat <input type="checkbox"/> Quite <input type="checkbox"/> Very <input type="checkbox"/> Extremely									
10. Climate installations, heaters, air condition, air terminal devices		<input type="checkbox"/> Not at all <input type="checkbox"/> Somewhat <input type="checkbox"/> Quite <input type="checkbox"/> Very <input type="checkbox"/> Extremely									
11. Service installations; elevators, laundry machinery, ventilation machinery		<input type="checkbox"/> Not at all <input type="checkbox"/> Somewhat <input type="checkbox"/> Quite <input type="checkbox"/> Very <input type="checkbox"/> Extremely									
12. Internal passage, steps, effects, public restaurants, quantify rooms or other, heard indoors with windows closed		<input type="checkbox"/> Not at all <input type="checkbox"/> Somewhat <input type="checkbox"/> Quite <input type="checkbox"/> Very <input type="checkbox"/> Extremely									
13. Traffic (cars, buses, trucks, trains or aircraft), heard indoors with windows closed		<input type="checkbox"/> Not at all <input type="checkbox"/> Somewhat <input type="checkbox"/> Quite <input type="checkbox"/> Very <input type="checkbox"/> Extremely									
14. Own terrace, heard within your dwelling with doors closed		<input type="checkbox"/> Not at all <input type="checkbox"/> Somewhat <input type="checkbox"/> Quite <input type="checkbox"/> Very <input type="checkbox"/> Extremely									
Before moving to the assessment, how important was this sound insulation to you, with respect to:											
15. Noise in general e.g. from neighbours, technical installations		<input type="checkbox"/> Not at all <input type="checkbox"/> Somewhat <input type="checkbox"/> Quite <input type="checkbox"/> Very <input type="checkbox"/> Extremely									
16. Noise in general e.g. from neighbours, technical installations		<input type="checkbox"/> Not at all <input type="checkbox"/> Somewhat <input type="checkbox"/> Quite <input type="checkbox"/> Very <input type="checkbox"/> Extremely									
Comments (describe important sources of noise, type of processes, neighbour activities etc.)											

5. Neighbours; footstep noise, i.e. you hear when they walk on the floor        |
6. Neighbours; rattling or tinkling noise from your own furniture when the neighbours move on the floor above you        |

## Parametri
