1 Executive Summary

This document is the final report for CoAct's consortium Communication and Dissemination (WP8) activities led by the Global Innovation Gathering e.V. (GIG).

The Deliverable D8.1 - Communication, Dissemination and Exploitation Plan guided communication and dissemination activities, including objectives, target groups, outreach and engagement tools, channels, and tactics.

During the last 36 months, CoAct delivered the Citizen Social Science concepts and practices to more than 1,6 million people, using a wide range of communication strategies and tools, combined with intense resilience and creativity during the COVID-19 pandemic.

Furthermore, a strategy focused on constant feedback between global and local using digital communication tools contributed to the disseminated ideas and actions reaching a far wider audience than the ones around consortium partners.

This document includes partners' communication and dissemination activities and analyses CoAct actions, channels, and tools to convey the project and disseminate its results. It also presents WP8 overall progress based on the key performance indicators related to communication and dissemination.

2 Introduction

CoAct (Co-designing Citizen Social Science for Collective Action) proposes a radically new approach to facing global social issues by engaging vulnerable citizens as co-researchers. The strategy represents a reinvigorated understanding of Citizen Social Science, understood here as participatory research co-designed and directly driven by citizen groups sharing a social concern. CoAct's research approach, where citizen groups and their problems are at the core of the research questions, requires translating those attributes for its communicative and dissemination activities. CoAct's shared values – Inclusiveness, Horizontality, Equity, Trust and Respect, Open Science, Co-ownership, Empowerment, and Reflexivity – underlined the direction and structure of CoAct's communication, dissemination and exploitation plan (D8.1). This document (D8.6) describes and evaluates the communication and dissemination actions and provides reflections and recommendations for future projects. As previously emphasised, CoAct's communication, dissemination and exploitation plan (D8.1) and the interim report (D8.3) were the reference points for this evaluation.

2.1 Communication and Dissemination Strategy

The objectives of CoAct's communication and dissemination strategy were to support all coalition partners to use communicational tactics and tools that allowed them to achieve the following goals:

- To engage vulnerable citizens and local civil society groups in R&I initiatives and to place them at the centre of the R&I cycle;
- To increase scientific literacy, skills, competence, and public awareness regarding science;
- To disseminate CoAct and build a sustainable citizen social science community of practice.

The communication, dissemination and exploitation plan (D8.1) built on the ethical framework underlying CoAct by establishing guiding principles for all communication and dissemination-related decisions, thus addressing all WPs. The project was designed modularly, providing guiding steps to develop context-driven tactics managing the communication and dissemination activities underlying the eight WPs of CoAct.

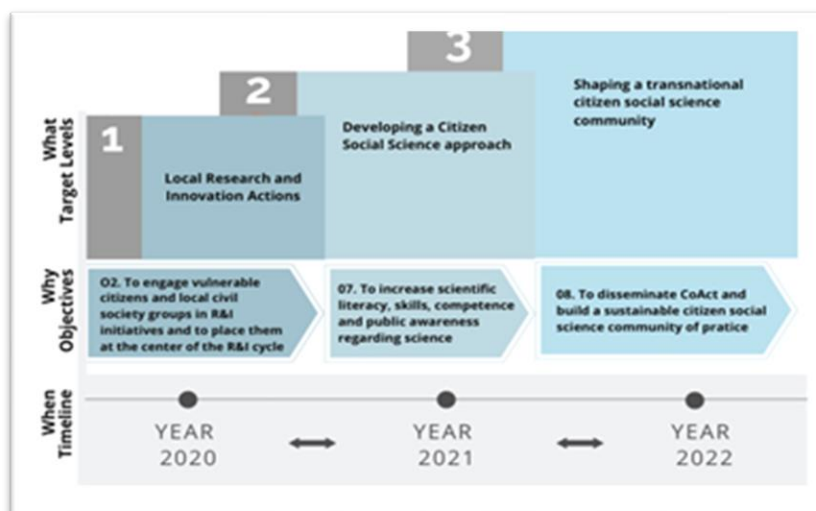

The plan consisted of the following elements:

1. A strategic normative framework for decision-making
2. Strategy Design Guidelines supporting all consortium partners to align decisions and objectives on their communication and dissemination practices and materials
3. Visual Identity for all communication and dissemination materials
4. Results dissemination plan (Media planning templates)

Different milestones guided CoAct’s communication and dissemination activities. The context-driven guidance structure of the planning plan provided the crucial flexibility to evolve specific dissemination tools, and their content as necessity emerged throughout the process, overall and within the eight WPs.

Figure 1. Communication and Dissemination Timeline

The first year of CoAct (2020) focused on developing the project's communication and dissemination strategy alongside its corporate identity and design elements. A guideline manual was prepared with basic templates for presentations, reports, and social media posts on Twitter, Instagram and Facebook, enabling all partners to design their communication and dissemination materials.

On the overarching project level, communication and dissemination activities focused on raising awareness about the project and its methodology and actively engaging potentially relevant external actors to grow an international CSS community beyond the R&I Actions performed by CoAct. On the R&I action level, activities ranged from local outreach and engagement exercises to assembling Knowledge Coalitions, engaging relevant stakeholders, and creating awareness about the R&I Actions and respective developments. D8.3 further elaborates on this process.

The second year focused on additional engagement alongside the publication and spreading of first outcomes, lessons learned, and the concentration of different actors in conversations about the various project's thematic areas. Those activities' outreach and engagement multiplied through CoAct's and consortium partners' websites and social media channels. For example, the first outcomes of scoping studies and R&I Action outcomes were blog posts reflecting and sharing perspectives on CSS, inviting and engaging external communities of practice. To a large extent, these were likewise the outcomes of online events CoAct organised, combining formal webinars, immersing invited speakers, or informal hangouts, providing an open space for conversation on project-relevant topics.

These events aimed to disclose the shaping of the Citizen Social Science approach from diverse perspectives and geographies. These activities partially belonged to the project's dedicated community-building workstream, seeking to co-create discourse and formats deriving from the articulated needs of interested civil society actors. As a starting point, an open community call set an agenda and created a CSS messenger chat group. These co-

created and iterative processes could organise frequent thematically focused gatherings. Lessons learned from the external feedback alongside co-evaluation informed the adaptation of methodological steps. These learning processes are documented in written and audio-visual materials and disseminated via various communication channels.

The third year continued to communicate and discuss CoAct activities and learnings via internal and external events. Exposure was through publicity via the website and interior and institutional social media channels, whilst blog posts summarised and disseminated internally hosted webinars, hangouts and other activities. Findings from the R&I Actions and the co-evaluation processes are in policy briefs, whitepapers, academic articles, and the final report. Experienced methods are available in a toolkit accessible on the project website, including additional data and details. A significant contribution to achieving a diversified reflection on CSS has been co-creating a Global Perspectives publication, bringing civil society actors from around the world and sharing their thoughts and local community practices. A final event week brought together community members, partners, co-researchers, and the general public to reflect upon the outcomes in two dedicated panel discussions. An online video premiere showcasing CoAct's work of the last three years celebrated results furthermore.

3 Communication and dissemination tools

3.1 Website

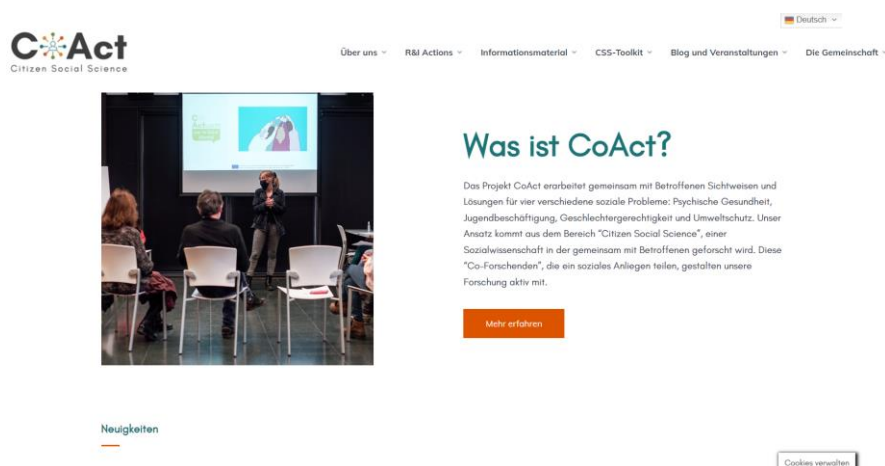

CoAct's central communication and dissemination environment is its multilanguage website (English, Spanish, German, and Catalan), www.coactproject.eu. All information about the

project, including all materials and news updates, are centrally shared on the website, from where they are further distributed throughout the project's social media channels and the consortium member's institutional channels.

A project website is a crucial communication tool to inform its activities, news and events while disseminating the gathered knowledge and its results to a wide range of target groups, including civil society organisations, worldwide researchers, international networks and associations, and EU policymakers.

Figure 2. Welcome Page CoAct website

All the content on the website is under an Attribution-ShareAlike 4.0 International License (<https://creativecommons.org/licenses/by-sa/4.0/>). This licence lets others remix, tweak, and build upon the work, including for commercial purposes, as long as they credit it and licence their new creations under identical terms. Consortium partners co-created and further

co-developed the website structure over the years, acting upon new outputs and emerging needs. The current website structure is as follows:

3.1.1 Landing page

The landing page is the central news hub of the project. It presents a brief about CoAct with a learn more button, blog posts with the latest news related to the project, an overview of the consortium partners involved, and links to CoAct's social media channels, besides legal terms and content.

3.1.2 About page: What is CoAct, our ethical values, partners and advisory board

1. The "What is CoAct" section explains how the consortium understands social science and through which core activities the project seeks to enact such understanding, such as thematic and local integration, citizens as equal stakeholders, and bottom-up collaboration for robust social knowledge production. The site also entails a short video introducing CoAct and its approach.
2. The "ethical values" section introduces the coalition-wide created and embraced values underlying the project and its activities, namely inclusiveness, horizontality, equity, trust and respect, open science, co-ownership, empowerment, and reflexivity.
3. The "partner" section introduces the consortium members. It outlines the respective expertise each partner brings to the project, including the responsibilities each member holds throughout the project, deriving from their disciplinary focus, such as Participatory Action Research, Computational Social Science, Citizen Science, Research Policy and Development,

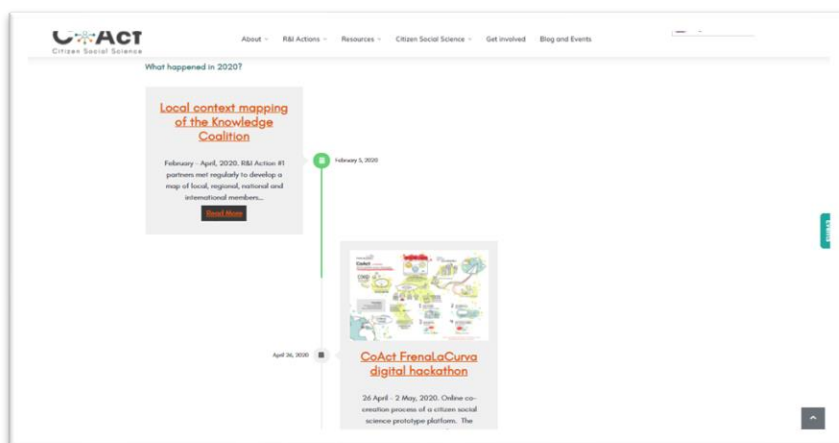

Digital Transformation, Social Movement Studies and Participatory Development Communication.

4. The advisory board section presents the international group of experts responsible for overseeing the project's activities and outputs and providing timely and relevant feedback on processes and results.

3.1.3 R&I Actions page

Each R&I Action has its section page (Mental Health Care in Barcelona, Youth Employment in Vienna, Environmental Justice in Buenos Aires and Gender Equality in Europe as research pilots on which the respective R&I Action introduces the relevance of CSS in the separate thematic area, how it will be implemented, and a timeline showcasing the activities undertaken within the R&I action over time.

Figure 3. Activity Timeline R&I Action Mental Health Care in Barcelona

3.1.4 Resources page: Publications, Videos, Policy briefs and whitepapers, Global Perspectives, CSS School Open Materials, Project reports, Readings, Zenodo Community

The resources section provides a comprehensive, easy-to-search overview of all outputs generated throughout the project period.

1) Publications

It is a selection of 12 CoAct project scientific publications. They are all open access, hosted in scientific publishers' platforms committed to open science.

2) Videos

A collection of all videos published by CoAct Consortium Partners. Themes and R&I Actions categorise them. There are 36 videos published in December 2022

3) Policy briefs and whitepapers

A page to share the four policy briefs and two whitepapers produced by CoAct project after three years.

4) Global Perspectives

This page is a CoAct online co-publication that brings together voices from around the globe to unpack what Citizen Social Science needs to account for to be truly inclusive. In a series of blog posts, voices from diverse contexts share what science should look like when accounting for multiple voices, needs, and traditions worldwide.

5) CSS School Open Materials

A space is presenting the results from the Citizen Social Science School. Its main goal was to offer academic researchers a commonplace and shared time to reflect, discuss, learn, and receive practical guidelines to explore social

dimensions behind a broad set of Citizen Science practices related to social issues and when involving groups and persons in a vulnerable situation acting as co-researchers. The page brings information about the course and its participants, the learning outcomes and all the school reference material. Furthermore, it presents seven workshop videos and links to all panellists' presentations.

6) Project Reports

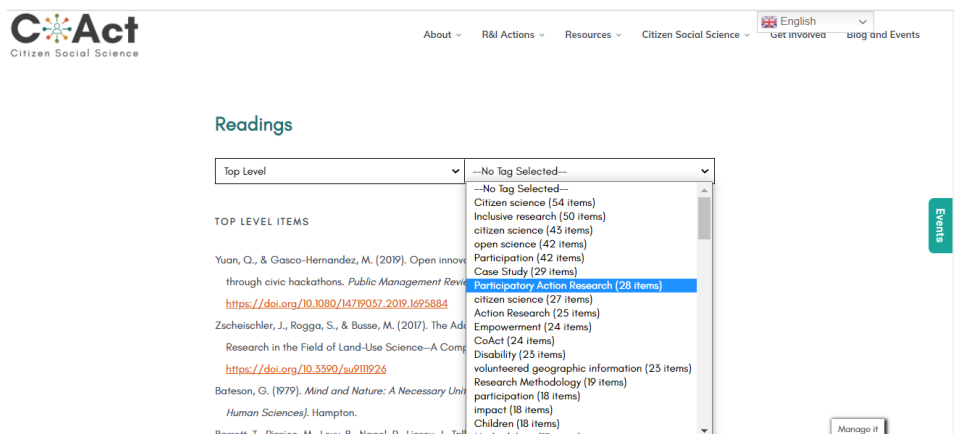

This page conveys public WP deliverables. It presents 18 deliverables from different WPs.

7) Readings

CoAct's academic resources are organised by tags and categories (e.g., citizen science, inclusive research, open science, participatory action research). One thousand fifty articles and scientific resources are available, all connected to the CSS landscape. The texts are indexed in Zotero, a free and open-source reference management software to manage bibliographic data and related research materials, such as PDF files (<https://www.zotero.org/>).

8) Figure 4. Zotero reading on CoAct's website

9) Zenodo Community

Zenodo is a general-purpose open repository developed under the European OpenAIRE program and operated by CERN (<https://zenodo.org/>). It allows researchers to deposit research papers, data sets, research software, reports, and other research-related digital artefacts. For each submission, a persistent digital object identifier (DOI) is minted, which makes the stored items easily citeable. The platform also helps keep track of documents' views and downloads. In December 2022, CoAct's Zenodo has 59 publications.

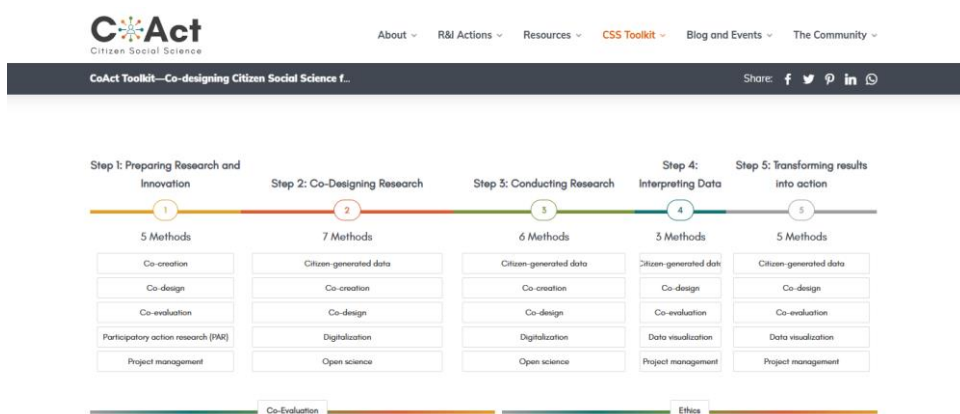

3.1.5 Toolkit page

The Toolkit section is an open resource introducing the CoAct research cycle. For each research step, the Toolkit makes methods available that the coalition partners use in their work. The toolkit also provides valuable resources, for instance, elaborating on how specific

procedures have been used in practice and videos with CSS experts. It allows for the easy adoption of the CSS approach by civil society organisations, NGOs, public bodies, and social innovators. The Toolkit provides academic and non-academic researchers, community partners, and citizen initiatives with tools and methods to develop their CSS projects in local settings. It provides a framework to practice community-based research and collective action for citizens. One can find more information about the Toolkit in the Deliverable 2.4

Figure 5. Toolkit Main Page

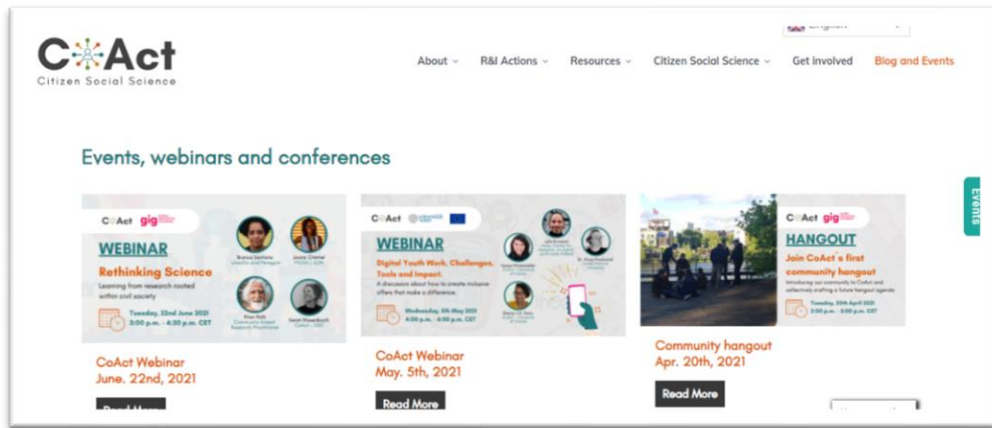

3.1.6 Blog and events page

This section lists all the events and the latest news about the project. While the events section announced hangouts, webinars and conferences organised or attended by CoAct members, the blog was a living record of information, reflections and actions on Citizen Social Science.

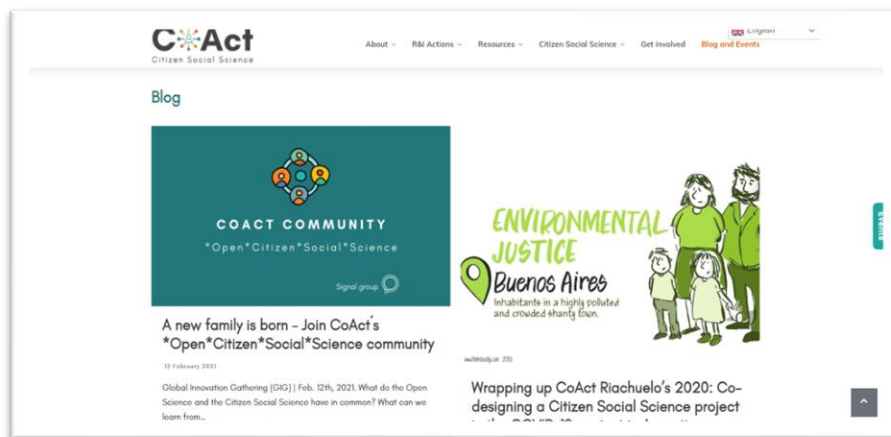

Figure 6. Event Section

Blog entries written by different partners share their lessons learned and experiences from activities they have participated in or activities within their R&I Actions.

Figure 7. Blog section

In total, there are 59 publications among blog entries and events shared, as listed below:

Final event week is a particular sub-page dedicated to promoting the last week's event dissemination campaign.

3.1.7 The Community page

The community page was set up together with CoAct's first activities to grow a diverse and geographically dispersed community of civil society actors seeking to critically discuss what is required to raise a genuinely inclusive CSS approach. Via the page, visitors can join the dedicated signal group. The page also hosts a section about the CSS summer school that took place in 2021 and was an effort to create a community of young academics. Lastly, the page hosts a section showcasing a series of videos that several members had made to showcase their understanding of CSS and its effect on their work.

3.1.8 The manual website page

The manual page provides seven videos on editing and publishing on CoAct's website. It also contains further links to WordPress publishing procedures. It is available (not to the general public) at <https://coactproject.eu/manual/>.

3.1.9 Website numbers

Access to the project website is monitored and reported upon using the [WP Statistics](#) and [Matomo](#) tools. Although both open-source tools provide impressive statistics while providing

sufficient privacy for the visitors, the use of two different analytics software is due to the possibility of improving personal analytical capabilities.

The Project Key Performance Indicator for the website sets at 200 visits/month with an average session of 2 minutes. A summary of the number of current users and average session of CoAct website follows.

From the website launch (March 2020) to December 13, 2021, CoAct website had 179,058 visits from 81,967 visitors. It means around 2.561,46 visitors per month, beyond the 500 visits proposed in the Grant Agreement. The rise in visits during hangouts, webinars and hangouts promotion campaigns is notable, especially **from December 2020** onwards.

Figure 8. Visits to CoAct website

Matomo average analyses show that visits had **a 1 min 58s** average duration, **two** actions per visit (like page views, PDF downloads, out links or internal site searches), and that **68%** of the visits have bounced, meaning visitors left the website after one page.

Figure 9. Matomo analysis overview details: average visits to CoAct website and visitors' behaviour

Further observations from the website statistics analysis are worthy of presenting. First, when not directly typing CoAct URL on the browser's address bar, most of the visits to the website come from Google (4.449), Twitter (1.106) and Facebook (229, in the sum of the desktop version and the mobile version). The following referring sites are CoAct Project hot site at the University of Vienna (173 visits); Baidu, the most famous Chinese search engine, with 158 visits; and the EU Citizen Science portal, with 122 visits, ahead of prominent social media or search engine platforms, like LinkedIn (122 visits) or Bing (89 visits).

Furthermore, the Gender Equality Open Call page (2657 visits), What is CoAct page (2576), and the CSS Sumer School page (1.829) were the most visited ones, after the homepage, with 17,063 visits.

Figure 11. Most Visited Pages

The top 15 countries where visitors come from are headed by the USA, with 22,152 visitors, followed by Germany (8,945), France (6,165), United Kingdom (3,850), and, in the fifth position, China with 2,967 visitors.

Figure 12. Top Visitors' Country

Rank	Flag	Country	Visitor Count
1		United States	22,152
2		Germany	8,945
3		France	6,165
4		United Kingdom	3,850
5		China	2,967
6		Spain	2,850
7		Singapore	2,725
8		Netherlands	2,663
9		Italy	2,548
10		India	2,114
11		Austria	1,783
12		Canada	1,756
13		Russian Federation	1,524
14		Viet Nam	1,498
15		Brazil	1,126

The website KPI for the 3rd year of the project is 500 visits a month with an average session of 2 minutes. Currently, the number of visitors to the platform is three times higher, with around 2500 visitors per month. But the average session is 2min and 58sec, meaning it is 2 seconds below the proposed parameter.

3.2 Social Media

Social media channels are vital for communication and dissemination as they facilitate two-way communication and further distribution of CoAct information and materials through other users. The CoAct project engaged a diverse audience of academic, policy, and civil society actors on its Twitter, Facebook (both @CoActeu) and Instagram (@coact.eu) pages. The social

media account's posts revolve around the associated areas of citizen social science, citizen science, open science, and other related topics. They also promote blog posts, events, hangouts, webinars, conferences, and R&I Actions activities. All consortium partners can contribute by sharing their news.

Twitter, Instagram, and Facebook provide tools for each channel metrics analysis. Currently, the number of followers on Twitter is 568, on Instagram is 131, and on Facebook, 77. All consortium partners play an essential role in the dissemination strategy: from sharing updates and news to collectively shaping the social media agenda to reposting CoAct social media posts via their institutional channels to multiply reach, diversify the audience, and potentially engage the community further. For example, UNIVIE's Instagram account (@coactvienna) in German is a channel with 205 followers to directly communicate with their target groups, young people, youth workers and Austrian organisations.

Through the joint engagement of all partners, redistributing CoAct's activities via their social media channels, we can count followers to CoAct's actions as presented below:

Table 2. CoAct's social media channels and followers

Social Media Channel	Followers
CoAct Social Media Channels	
Instagram	131
Facebook/Meta	77
Twitter	568
Partners' Social Media Channels	
University of Barcelona/Open Systems Twitter	2058

Zentrum für Soziale Innovation (ZSI) Twitter	1329
Zentrum für Soziale Innovation Reesearch Twitter	1576
University of Wien CoAct Twitter	36
University of Wien CoAct Instagram	203
Global Innovation Gathering Instagram	577
Global Innovation Gathering Facebook	2245
Global Innovation Gathering Twitter	2213
Linkedin GIG	1075
Total	12088

Social Media Channel	Total Followers
Total Instagram	911
Total Facebook	2322
Total Twitter	6451
Total Linkedin	1075

The expected number of followers per channel for M24 was 1.5K followers on Twitter, 1.5K on Facebook, and 300 on Instagram. Consortium partners constantly support sharing CoAct-related news, events, and project updates on their social media channels, plus the CoAct channels' activities made it possible to outnumber the expected followers. In addition to a qualitative approach, focusing on activities building a sustainable community of practice, like instant message groups, webinars, hangouts, co-authorship on blog posts, physical meetings, and YouTube playlists, CoAct's activities reached thousands of people. Moreover, Twitter impressions, just in CoAct channel alone, got more than 55,700 people since May 2020. It means that each Twitter receives an average of almost 1800 visualisations every month, as impressions include the times a Tweet appears in one of your followers' timelines and non-followers timelines.

CoAct's Twitter, Facebook, and Instagram timelines share more than 650 posts and reach more than 60,000 people. By adding numbers from all other partners' social media channels, CoAct posts outreach is more than 200,000 people.

3.3 Press Releases, newsletters and direct emails

Among communication tools, CoAct and its consortium partners used regular newsletters, press releases and direct e-mails to keep its members informed about its activities, news and events.

An e-mail newsletter is a powerful tool for staying connected with stakeholders. Newsletter tools used differ based on partners' preferable setups, the most common being MailChimp (<https://mailchimp.com>), SendingBlue (<https://pt.sendinblue.com>) and MailPoet (<https://www.mailpoet.com>).

Furthermore, press releases submitted to media channels could portray the project's activities in newsletters, blogs, magazines, radio and broadcasted TV programs.

All combined, those actions helped CoAct reach up to 650.000 people in its target groups. A comprehensive list of these actions is in [Annexe 1](#).

4 Events

CoAct has been organised and presented at European and international conferences, reaching an audience of approximately 20,000 people. (See Annexe 1 for the complete list of events and more details).

Highlights for presentations at the ECSA Conference in 2020 and 2021, sharing the latest ideas in the field with the citizen science community – citizen scientists and practitioners, researchers and policymakers; And for the active participation in 2 presentations and three workshops during the conference Knowledge for Change 2020. In 2021, a big shout to the involvement in the annual Citizen Social Science Association Conference.

In 2022, re:publica festival in Berlin was a landmark for the return of face-to-face events, and CoAct partners held a searing meetup discussion in June. Also, in 2022, a series of online hangouts lead to a joint online publication about global perspectives on citizen social science. Some of the activities carried out during the project are worthy of note, as follows:

4.1 CSS Summer School

From September 13–23, 2021, CoAct organised its Citizen Social Science School. The main goal was to offer academic researchers a common space and a shared time to reflect, discuss, learn, and receive practical guidelines to explore social dimensions behind a comprehensive set of Citizen Science practices related to social issues and when involving groups and persons in a vulnerable situation acting as co-researchers.

It was a rich program, including seminars with round tables, workshops, mentoring and working sessions. Those are the learning outcomes from the activity:

- Review of transdisciplinary aspects in the context of Citizen Social Science (e.g. Open Science, Ethical Research, Digital participation, Co-evaluation and Policy Impact)
- Practical examples of Citizen Social Science practices where groups in a vulnerable situation are acting as co-researchers
- Portfolio of collaborative, participatory research models (interdisciplinary, intersectoral and international)
- Practical tools to maximise success and minimise challenges of Citizen Social Science
- Development of an international network of peers
- Strategies to be inclusive in a citizen science project
- All the classes and content produced for the summer school can be accessed on the website: <https://coactproject.eu/open-materials-citizen-social-science-school/>

4.2 Webinars

In 2021, CoAct project adapted to the new COVID-19 regulations by organising a series of webinars, such as follows:

- On January 27th, 2021, the first public CoAct webinar took place: Co-shaping evaluation in Citizen Science? Towards more participatory approaches in evaluating Citizen Science in cooperation with ECSA and EU-Citizen.Science.
- On May 5th, 2021, the webinar theme was Digital Youth Work. Challenges, Tools and Impact, where experts in digital youth work shared how to include 'hard-to-reach' youth

in digital youth work, discuss best practice examples and address the question of impact evaluation.

Figure 13. Co-shaping evaluation in citizen science?

- In June. 22nd, 2021, CoAct’s third webinar discussed the framing of science by learning how scientific rigour research works outside academia. The first step to growing a global perspective which learning from participatory research initiatives in different contexts when asking questions.

4.3 Community Hangouts

In 2022, CoAct organised and hosted various online events, such as the Community Hangouts: A series of nine online community meetings that contributed to shaping a global bottom-up perspective on how science should/is be thought of and addressed, and how inclusive, bottom-up practices are enabled in the most diverse contexts worldwide. With participants from all continents, it highlighted best practices and lessons learned. Community Hangouts were a sharing knowledge space to support other actors shaping their respective communities while learning from their experiences.

Figure 14. Hangout Announcement

The meetings resulted in the co-creation process of a publication consisting of civil society contributions via blog posts addressing five core topics that the community had identified as crucial to address to develop a decolonial and genuinely inclusive approach to CSS. Between

April and November 2022, each hangout addressed a specific topic and invited people to contribute to the writing of a blog post. In December 2022, an online launch event for the resulting publication provided a platform for authors and readers to meet and discuss.

4.4 Jornadas CoActuem. Salud mental y justicia medioambiental

In May 2022, participants from the CoAct Justicia Ambiental team in Buenos Aires, Argentina, explained how they co-designed a digital platform promoting transformative actions in the Matanza-Riachuelo watershed. They presented their tool allowing meaningful participation of people directly affected by environmental pollution along the southern periphery of Buenos Aires, Argentina, where 5 million people live.

Learn more at

<https://comunitat.canodrom.barcelona/assemblies/comunitat/f/1651/meetings/2398?locale=es>

4.5 Consortium meeting in Barcelona

From May 30th till June 1st, CoAct hosted its annual consortium meeting in Barcelona. After two years of remote sessions due to the Covid pandemic, the three-day gathering marked a vital momentum for a direct encounter, engagement, and community strengthening. During that time, CoAct consortium partners set goals for the remaining project time, invested in 'hands-on' knowledge sharing about the R&I Actions and the Co-Evaluation process, and made final collective decisions about the toolkit, one of CoAct's core deliverables. Furthermore, partners co-designed Final Event Week objectives and the first program draft. Moreover, it was an opportunity to review the project's KPIs and to make crucial decisions about policy briefs and whitepapers.

4.6 Final Conference Week

In October 2022, CoAct organised a final event week consisting of three days with diverse activities. The event aimed to (a) Critically reflect upon what has been achieved and receive feedback from policymakers and civil society, (b) provide a platform to the winners of our open call on gender equality to share reflections from their experience on what the CSS approach can achieve, and (c) capture all highlights of three years of diverse activities in the strive to create a CSS approach in an easily accessible and informative short film.

- On October 18, GIG hosted an online panel discussion in which we unpacked several critical learnings from our CoAct experiences and received feedback from leading civil society members and policymakers.
- On October 19, OKF hosted a panel discussion, 'Citizen Social Science and Civic Organisations - Which tools for which results', in which the Open Call on gender equality mentors and the winners shared their experiences about this unique mentoring format.
- On October 20, CoAct partners hosted a live streaming event for the production 'CoAct - 3 years of research and learning', followed by a public online discussion forum for the audience to share their thoughts, ask questions, and further connect. The dissemination page was: <https://coactproject.eu/events/final-event-week/>

With these final events, CoAct achieved to engage its already-grown community as well as new participants. Especially the critical self-reflection on CoAct's learnings and the invitation to policy and civil society experts for an open and transparent feedback session attracted various stakeholder groups to engage. Other stakeholders who considered CoAct's CSS

approach a crucial contribution and worth building further activities got in contact with CoAct researchers during the event days. For instance, a professor from the International Institute of Social Studies at the University of Rotterdam was keen on learning from our experiences and exploring further opportunities to expand the CSS approach. The recorded online sessions are available on YouTube and CoACT's website video section and, on December 2022, reached 251 people.

See Annexe 1 for the complete list of events and their reach.

5 Scientific publications

CoAct's scientific publications reached up to 460 thousand people, the majority of EU and international researchers. Three publications are responsible for the vast majority of the target audience.

The most significant one is the article compilation book "The Science of Citizen Science", an open-access publication providing a unique overview of citizen science. Up to now, it has 428.000 views. And two articles, "Participation and Co-creation in Citizen Science" and "Citizen Social Science: New and Established Approaches to Participation in Social Research", have 16.000 and 17.000 views, respectively.

CoAct's scientific researches have open access, and a complete list of published papers is on Annexe 1 and our website (<https://coactproject.eu/open-citizen-social-science-zenodo/>).

6 Online innovative materials

6.1 Videos

Movies are a terrific method to bring attention to a worthy cause. They allow imparting information about subjects significant to CoAct project. In addition, videos aid in spreading awareness and demonstrating the significance of the action, getting the attention it deserves and making people experience life-changing moments through watching them. Likewise, during the COVID-19 pandemic, online videos have become viral, from panels and debates to music concerts and dancing tik-tokers.

CoAct consortium partners produced 42 videos, from manuals and tutorials to online debates, conferences, and documentaries. One can find 37 videos on the website at <https://coactproject.eu/videos/>, and more are on the CSS summer school page <https://coactproject.eu/open-materials-citizen-social-science-school/>.

The complete video list and reach are in Annexe 1.

6.2 Flyer

Partners used a printed flyer to present the project at the beginning of the project. It included a snippet about CoAct, R&I Actions location and contact channels (website, social media and email). On its back, workshop participants can write ideas or answer questions in lines printed

for this purpose. Considering COVID restrictions, CoAct consortium partners shared the digital version of the flyer with participants at online conferences, workshops and meetings.

Figure 15. CoAct Flyer

Communication and dissemination actions included creating and sharing digital flyers containing infographics, like the ones for the Gender Equality Open Calls and The Hangout Series, among others. They are available online, on the website and social media cards.

Figure 16. Gender Equality Open Calls and CoAct Hangouts 2022 Flyers

6.3 Brochure and posters

CoAct created six brochures as projects' outcomes. They are four Policy Briefs and two Whitepapers. Policy Briefs provide policymakers, civil society organisations and research-performing institutions with recommendations on how to use Citizen Social Science to support and shape social change, laying out the benefits and challenges experienced by the consortium partners.

One of the Whitepapers presents a set of 6 core principles identified as highly relevant for implementing co-evaluation practices in citizen social science. It intends to guide the participatory approach to project evaluation and to sharpen the focus for impact assessment. The other Whitepaper aims to support civic organisations using Citizen Social Science (CSS) methods for gender-based projects.

The brochures are available on the Policy Briefs and Whitepapers page on the website at https://coactproject.eu/category/resources/policybriefs_whitepapers/. Furthermore, CoAct consortium partner ZSI distributed 20 printed copies of the Co-evaluation Whitepaper during the ECSA 2022 conference.

Two posters were designed to showcase the Platform co-developed to support Environmental Justice R&I actions in Buenos Aires, Argentina. They are 1,90m high and describe how to use the platform. The posters lie on the walls of San Martín University in Buenos Aires. They are available at <https://coactproject.eu/blog/environmental-justice-in-argentina-new-poster-launched/>.

Figure 18. CoAct Poster for Environmental Justice R&I Action (Argentina)

OPR **CoAct**

¿Qué pasa, Riachuelo?

CALIDAD DE AGUA

¿Qué pasa, Riachuelo? (OPR) es una herramienta de ciencia ciudadana social. A través del mapeo colaborativo permite organizar, sistematizar y compartir las visiones y el conocimiento acumulado a lo largo de los años por organizaciones sociales, científicas y actores sociales. Fue co-diseñado entre distintas personas y organizaciones interesadas en la justicia ambiental en la CUENCA MATANZA-RIACHUELO.

¿Quiénes pueden participar?
Cualquier persona con experiencia y conocimiento sobre un tema puede participar activamente en el proyecto.

¿Qué es la ciencia ciudadana social?
Investigación participativa co-diseñada por un grupo de ciudadanos que comparten una preocupación social para proponer medidas científicamente fundamentadas para promover el cambio social.

¿Qué entendemos por calidad del agua?
Estado de las características químicas, físicas y biológicas del agua. La calidad del agua depende del uso que le damos. Por eso, además, puede ser útil para alguna actividad para no para beber. La plataforma OPR permite registrar lo que se observa en la superficie o cercanos de los cuerpos de agua de la Cuenca.

ASPECTOS SOBRE LA CALIDAD DEL AGUA:

- 1. Estado del agua:**
La turbidez es causada por pequeños partículas sólidas, en suspensión o disueltas.
Agua clara / Agua turbia / Turbia / Muy turbia / Otro.
Ejemplo: LIMPIA / TURBIA.
- 2. Color:**
Son variados los colores que puede adoptar, entre ellos se encuentran los siguientes:
Sin color / Verde (debido a la posible presencia de algas) / Marrón (debido a la presencia de sedimentos en suspensión) / Gris (aguas grises o descargas domésticas) / Negro (presencia de hidrocarburos) / Rojo (presencia de aguas residuales de la industria química o posible presencia de agua) / Otro color.
- 3. Fuentes potencial de contaminación cercana:**
Existen diferentes tipos de fuentes de contaminación. Entre son algunos ejemplos: Industrial, Doméstica, Fieles, Clorado.
- 4. Presencia de vegetación en las márgenes y en el cuerpo de agua:** Sí/No
- 5. Presencia de fauna:** Sí/No
- 6. Presencia de olores:** Sí/No
- 7. Materiales flotantes:** Plásticos, Restos de vegetación, Paños, Cables y textiles, Madera, Voluminosos, Otros.

¿Qué entendemos por Hidrometeorología?
La hidrometeorología es la disciplina que estudia el ciclo del agua entre la superficie de la Tierra y la atmósfera, en sus distintos etapas: evaporación, condensación, precipitación, intersección de la lluvia, infiltración y escurrimiento superficial.

Aspectos de la situación hidrometeorológica:

- 1. Situación hidrológica actual:**
Nivel del agua: Alto (cerca del borde o de desbordado) / Medio (niveles mayores a los habituales pero que están lejos de la posibilidad de desbordado).
- 2. Situación hidrológica previa:**
Estado del tiempo en días anteriores al reporte: ¿En los días previos o durante el momento de la observación existieron vientos fuertes (tormentas)? - Sí/No / ¿Llovió en los días previos o durante el momento de la observación? - Sí/No / ¿Qué tipo de lluvia se produjo? / Involana / Brevísima intensa / Brevísima sostenida / Lluvia intensa sostenida.

¿Cómo podemos participar en la investigación sobre la calidad del agua?
A través de observaciones in situ de cuerpos de agua, como ríos, canales y arroyos, y también de partes vitales del sistema de desagües. En la Cuenca para compartir experiencias en OPR CALIDAD DEL AGUA, podemos encontrar información para identificar situaciones vinculadas a la calidad del agua y realizar un reporte en la plataforma ¿Qué pasa, Riachuelo? Puedes descargar la guía de <https://quepasaenriachuelo.fam.org.ar/>. Además, si la registras en OPR, podrás subir fotografías, documentos y enlaces.

¿Para qué puede servir la información generada entre todos y todas?

- Los datos serán vitales la situación de la calidad del agua superficial en todo lo cuencas, incluso en zonas no monitoreadas por AGUAMAT.
- Para las comunidades, el involucramiento permite comprender mejor la dinámica de la cuenca e identificar situaciones críticas.
- Para las autoridades, los datos permiten evaluar la efectividad de los programas de gestión y caracterizar los puntos contaminados en fuentes específicas o desconocidas.
- Para la investigación científica, los datos generados por los ciudadanos permiten ampliar el análisis de la evolución temporal y espacial de los parámetros de calidad del agua.

Logos: European Union, CENIT, FARM, MINISTERIO DE RECURSOS NATURALES.

<https://mapaop.fam.org.ar/>

A magnificent poster was designed for Mental Health R&I actions, describing the co-researchers' journey. The illustrator drew the images in real time during an after-research interview.

Figure 19. Detail of the poster – Mental Health R&I Action (Barcelona)

The poster can be accessed at <https://coactproject.eu/blog/the-co-researchers-journey-in-coact-for-mental-health/>

6.4 CSS Global Perspectives

The Global Perspectives Publication is the critical reflection of a group of global makers and innovators on the Citizen Social Science concept. These actors, who are all deeply rooted in projects fostering local engagement in change processes, raised some critical concerns, ranging from western framings of science to the often somewhat limited enactment of actual participation, as in local ownership. The publication is online on CoAct website at <https://coactproject.eu/css-global-perspectives/>

The five topics are:

- Locally driven protocols and local traditions
- The Ownership of Science
- Decolonising our educational/institutional influences
- Overcoming false representation in participatory processes
- Ethical standard setting

With every topic, a driving question showcased how those issues are addressed in people's local community work or through think pieces that provide a more overarching reflection. The contributions received from numerous actors, mainly from Latin American, African and South East Asian contexts, guide rethinking institutional silos and provide concrete examples and lessons learned from how to address those issues in practice. In this way, Global Perspectives offers various contributions to sustainability:

1. It broads the concept of Citizen Social Science by demonstrating how local engagement in scientific processes is done around the world
2. It demonstrates how CSS is narrowing itself in an academic conceptualisation of science.
3. It provides examples from different socio-political contexts, thus diversifying and helping non-western actors to identify with the concept.

Shaping the CSS approach in a participatory manner requires engaging a broad and diverse community in the entire debate. In this way, CoAct community gradually strengthened itself

through the tools used for community building, and community participation embraced CSS to flourish inside and outside academia. Furthermore, it provided an inclusive approach to the concept, openly and equally acknowledging different communities of experts and their crucial roles.

Local contexts and interests drove community participation to emancipate and disseminate the CSS approach beyond CoAct, crafting a community that will be owned and carried on beyond CoAct's project timebound. Moreover, creating a CSS community that collectively holds and shapes the CSS approach is intrinsically connected to the values CoAct stands for.

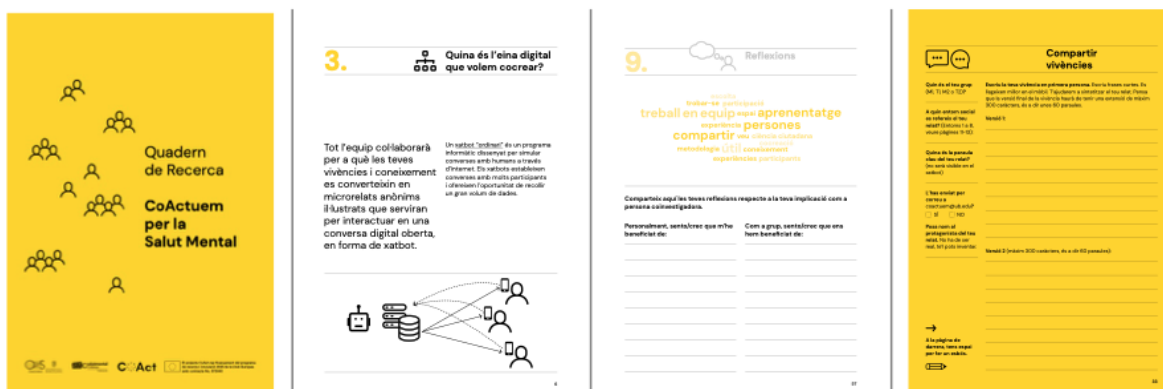

7 Printed products

The COVID-19 pandemic urged the consortium partners to postpone paper-printed material for future in-person meetings. The rationale for this decision was to avoid piling printed materials and being unable to distribute them for just a couple of months (without being sure when it would be). Still, considerations about sustainability and the world environment rose during the pandemic, pointing to the intense harms of mass media printed papers. Furthermore, communication materials for CoAct actions become digital and online, as most things during the lockdowns.

Flyers created and printed before the lockdowns were distributed at the beginning and end of the project and intensively used in online campaigns and blog posts. On a local level, Mental Health Care R&I Action created and printed a research notebook distributed at the kick-off of a co-creation session with Co-Researchers. They've got 30 notebooks in total.

Figure 20. Research Notebook R&I Action Mental Health Care

In Vienna, the consortium partner distributed ten printed flyers to young co-researchers at the Introduction Day in the AusbildungFit Institution. Furthermore, UNIVIE printed essential documentation called the 'Partizipative Forschung zur AusBildung bis 18' report in small numbers and distributed it to Knowledge Coalition members and researchers visiting UNIVIE's exhibition. It is available at <https://zenodo.org/record/7390893#.Y6Q-K-KZOE.s>.

Finally, ZSI partners distributed 20 printed versions of the Whitepaper on Citizen Social Science Evaluation during the ECSA conference in 2022.

A complete list of printed material and distribution is in Annexe 1.

8 Dissemination activities numbers

During the last 36 months, CoAct delivered the Citizen Social Science concepts and practices to more than 1,6 million people, 1 million (65%) from civil society and almost 500 thousand (28%) EU and international researchers worldwide. This analysis used several tools to grab these numbers. First and foremost, the consortium partners used a collective data spreadsheet to log their press, media and social media publications constantly, add scientific papers when published, and report on events organised and co-organised and printed materials distributed. Moreover, partners reported the number of participants for each activity correspondingly.

When activities had the digital as a medium, this analysis considered numbers and data provided by the respective tool, like the number of visitors or views. However, when none of the techniques succeeded in gathering numbers, it added a value based on an average of the lowest reach in the same categories of actions. So, for example, even though some scientific papers reported from 16000 to 17000 views on their published pages, similar scientific articles published on similar platforms, but without a public report on page access, the analysis considered and added a value of reach = 50. This minimum average allows a way of assuming how actions reached the target public.

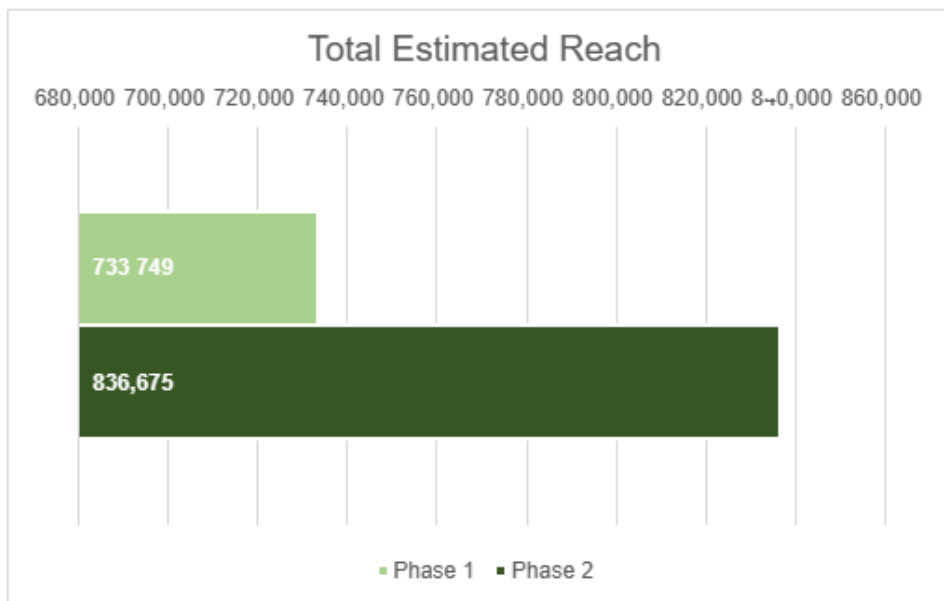

Figure 21. Target Groups reached

Dissemination's second phase (April 2021 to December 2022) reached most of the public. Scientific publications in the first phase (January 2020 to March 2021) delivered CoAct's ideas to most of the acquired target audience.

Figure 22. Total estimated reached per phase

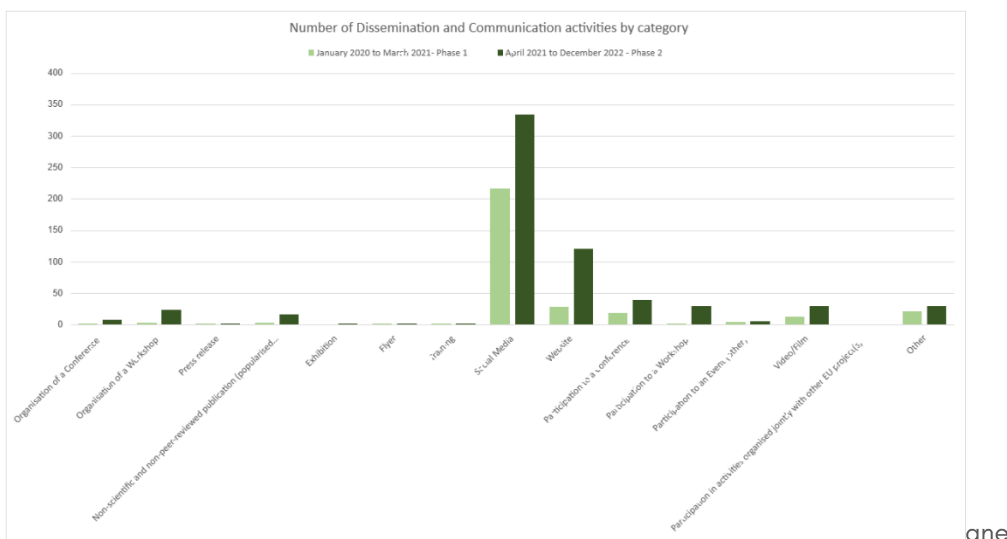

Social media channels, scientific papers and actions on non-scientific media channels, like TV programs and podcasts, were responsible for most of this target group's reach. Newsletters and the website also contributed to the high number of people reached but demanded more actions to be done.

Table 3 – Number of people reached by activities per phase

Number of Persons reached by activity		
Activity	Phase 1	Phase 2
Popularised publication	2,160	380,450
Press release	2,045	250
Social Media	199,425	251,673
Video / Film	1,868	2,526
Website	10,851	95,685
Other	25,949	99,464
Flyer	45	10
Scientific Papers	466,500	1,053
Events organised	919	1,116
Events participated	23,207	4,188
Material Distribution	780	260

Figure 23. Reach by activity

A detailed and comprehensive data analysis on all CoAct's Communication and Dissemination Actions is in Annexe 1.

9 Conclusion and outlook – building a community of practice

The objectives of CoAct's communication and dissemination activities were:

- To engage vulnerable citizens and local civil society groups in R&I initiatives and to place them at the centre of the R&I cycle.
- To increase scientific literacy, skills, competence, and public awareness regarding science.
- To disseminate CoAct and build a sustainable citizen social science community of practice.

The consortium worked towards achieving these objectives, facing and overcoming the unpredictable pandemic with creativity in its actions. Communication and dissemination campaigns met expected KPIs, even outnumbering them. The number of webinars, community hangouts and blog series, gender equality open calls, the available citizen social science toolkit, informative videos, scientific papers published, and many other activities all emphasise those efforts. In addition, they could engage civil society in R&I initiatives while increasing scientific literacy, skills, competence, and public awareness regarding science and citizen science. CoAct's dissemination and communications strategies gradually raise knowledge about citizen social science in its target groups, as planned.

But, the most crucial detail is that, during the project, CoAct emphasised activities to build and support sustainable Citizen Social Science communities of practice that are inclusive, diverse, and transdisciplinary. A set of participatory activities gradually built this community:

- Open calls for videos: an initial step, providing a platform for CSS initiatives to present their work and for the different initiatives to learn about and from each other. Answering questions like "What does CSS mean for you?", "What would you need to make a CSS approach meaningful to civil society?" and "How would a CSS community of practitioners from civil society and academia ideally look like?" the contributions are on the CoAct website (<https://coactproject.eu/community-videos-contribution/>).
- Citizen Social Science Meetup: an active meeting of global citizen scientists around the topic. It was a basis for gathering proposals and suggestions to establish a community. One can find the complete documentation and the meetup recording here: <https://coactproject.eu/news/a-new-family-is-born-join-coacts-opencitizensocialscience-community/>.
- Citizen Social Science Community chat group: an outcome from the prior action (Citizen Social Science Meetup), the chat group is an active message group hosted on [Signal](#), a privacy-oriented and open-source communication tool. The group is an environment for a low barrier, instant exchange of thoughts, events, and materials, with 61 members from around the globe.

- Community Hangouts: A series of nine online community meetings that contributed to shaping a global bottom-up perspective on how science should/is be thought of and addressed, and how inclusive, bottom-up practices are enabled in the most diverse contexts worldwide. With participants from all continents, it highlighted best practices and lessons learned. Community Hangouts were a sharing knowledge space to support other actors shaping their respective communities while learning from their experiences.

Together with events participation and the already active academic community around its scientific papers, CoAct believes Citizen Social Science studies can grow from and take root from this Horizon 2020 project on the grounds of Science and Open Science.

Press and Media Outreach

This is a tool to monitor partners communication and dissemination activities during the whole project. When a CoAct partner releases or carries out a specific action (for example: blogs, press releases, press article, flyers, videos/film), podcast, poster, exhibition, social media post on their institutional channels, newsletter, publication on their website, etc.) a new entry on this excel log must be added including some basic information about the action made.
