

Knowledge Management in the Swiss Digital Botanical Gardens Initiative (Swiss DBGI-KM)

<https://doi.org/10.5281/zenodo.7663471>

Who does what ?

**Botanical Gardens
directors**

Blaise Mulhauser

Gregor Kozlowski

Daniel Mietchen

Egon Willighagen

Nadir Alvarez

Donat Agosti

Mingxun (Ming) Wang

Jakub Galgonek

Philippe Cudre-Mauroux

WP5 - Community Engagement, Public Outreach & Biodiversity Conservation

"Produce tutorials and educational material describing best ORD practices. Connect to existing biodiversity digitization projects. Raise public awareness on chemodiversity."

Tom Walker

Swiss DBGI-KM team

Bernd Rinn

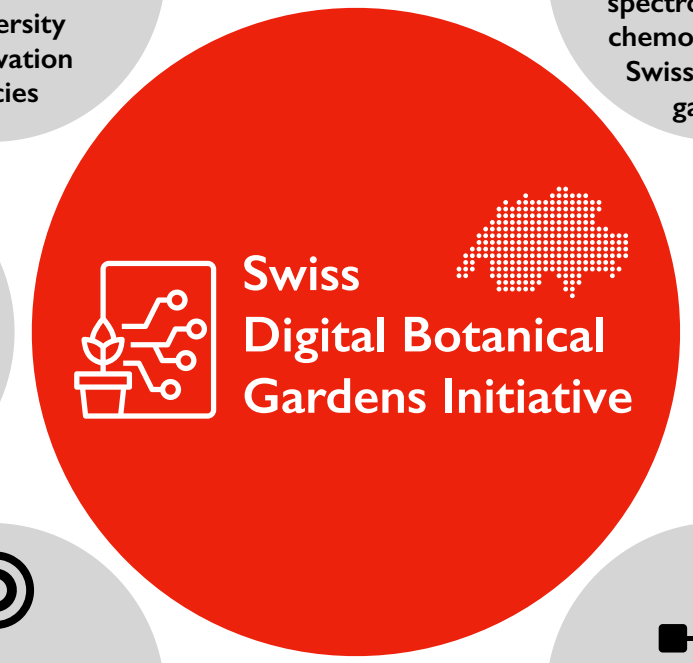

Caterina Barillari

Henry Lütcke

WP2 - Sample tracking system establishment

"Tracking physical objects and linking them to their digital counterpart"

Provide "molecular arguments" for biodiversity conservation policies

Establish chemical extracts libraries of Swiss botanical gardens

Digitize, through mass spectrometry, the chemodiversity of Swiss botanical gardens

Gather chemical information and relevant samples metadata in a tailored knowledge graph

Establish robust and scalable workflows for the digitization of wildlife ecosystems biodiversity

Illustrate the feasibility and advantages of an end-to-end Open Science project

Establish web and programmatic interfaces for the query of the acquired knowledge

Connect to existing ontologies (bio, chemo) and biodiversity digitization projects

WP3 - Knowledge representation and graph establishment

"Organising large amount of heterogeneous data to facilitate knowledge extraction and FAIRness"

Tarcisio Mendes de Farias

Ana Claudia Sima

Christophe Dessimoz

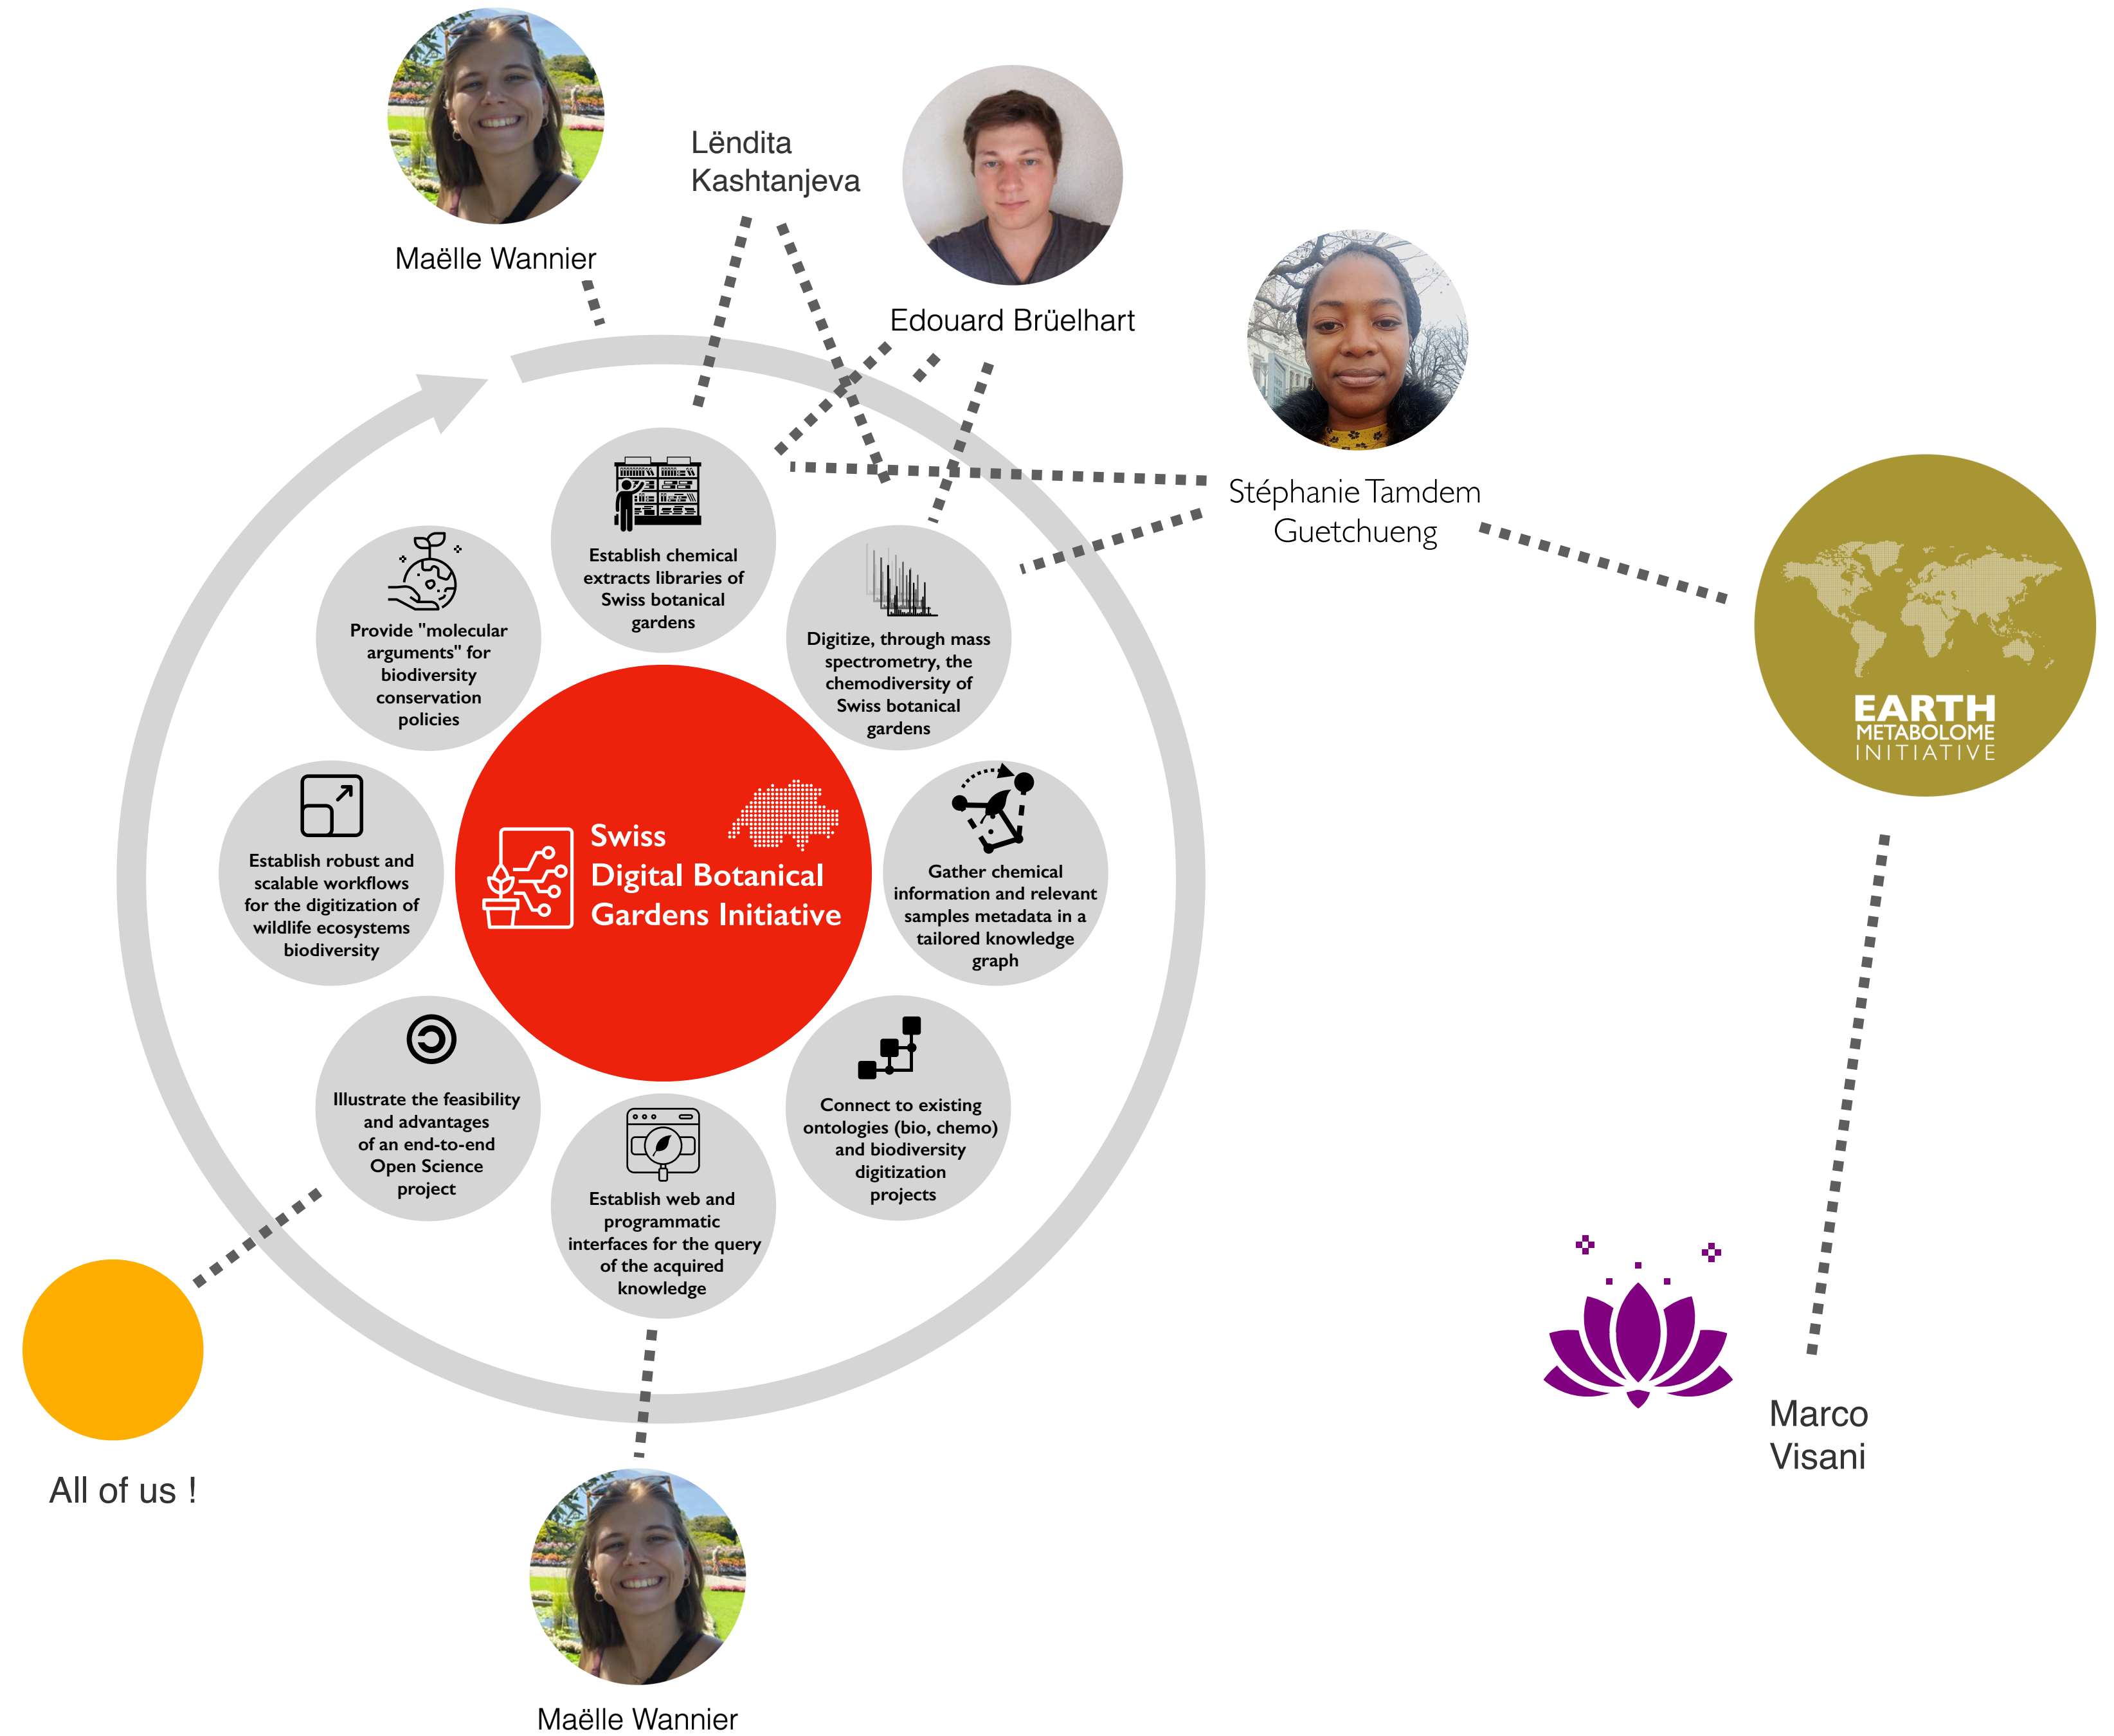

Postdoc UniFr

WP4 - Human-Data Interaction

"Improve Human-Data interaction through natural language processing and data visualisation. Explore new means for knowledge dissemination"

DBGI team

Who does what ... and when ?

WP1 - Project coordination

WP2 - Sample tracking system establishment

Defining identifiers, data and metadata formats

Iterative refinement & evaluation of other implementations

Specification & first draft of the sample tracking system

Advanced version

WP3 - Knowledge representation and graph establishment

Ontology engineering

Knowledge Graph interoperability

Knowledge Graph construction

SPARQL endpoint establishment

WP4 - Human-Data Interaction

Visualisations

Semantic search

Dissemination

WP5 - Community Engagement, Public Outreach & Biodiversity Conservation

Tutorials establishment

Hackathon season 1

Legal aspects investigation

Hackathon season 2

Workshop & conferences season

Questions from enduser collection

Connection to existing biodiversity digitization initiatives

Data mining for biodiversity conservation and outreach activities.

SIB partner

Partners

• UniFr - COMMONS Lab

• UniNe - Institute of Biology

• ETHZ-SIS

• SIB

**How do we exchange
information/knowledge ?**

YES

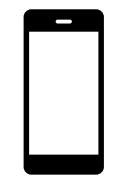

Information and Knowledge Dissemination means in the DBGI

Do I need (a quick) answer or feedback ?

NO

YES

Will I or others re-use this information (the question, the answer or a note) in the future ?
