

Elevation data

Geoscience Australia 2015. Digital Elevation Model (DEM) of Australia derived from LiDAR 5 Metre Grid. Geoscience Australia, Canberra. <https://doi.org/10.26186/89644>

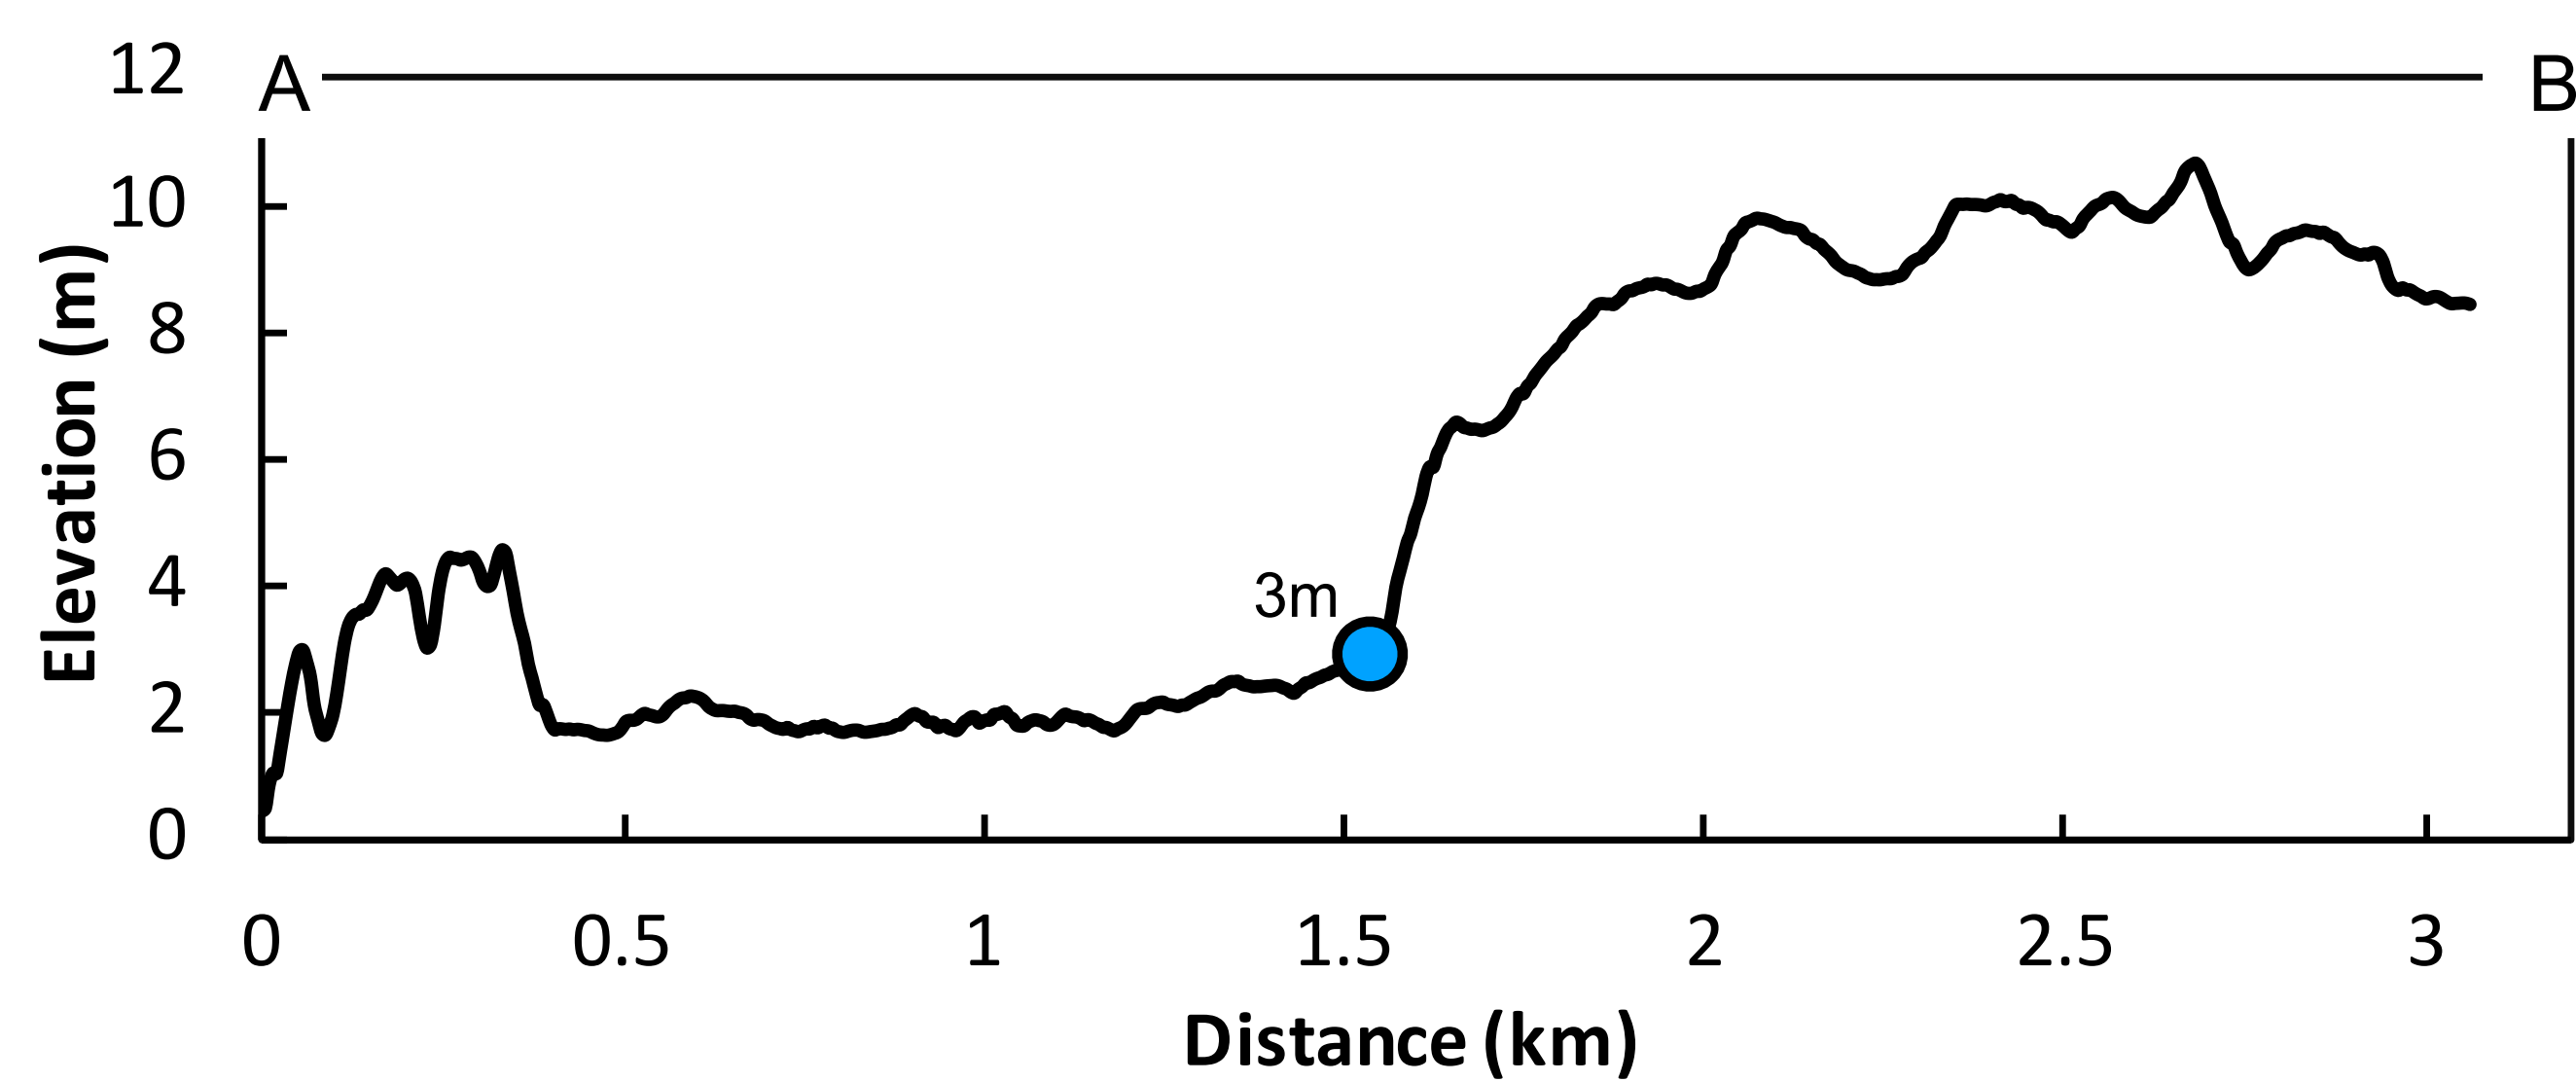

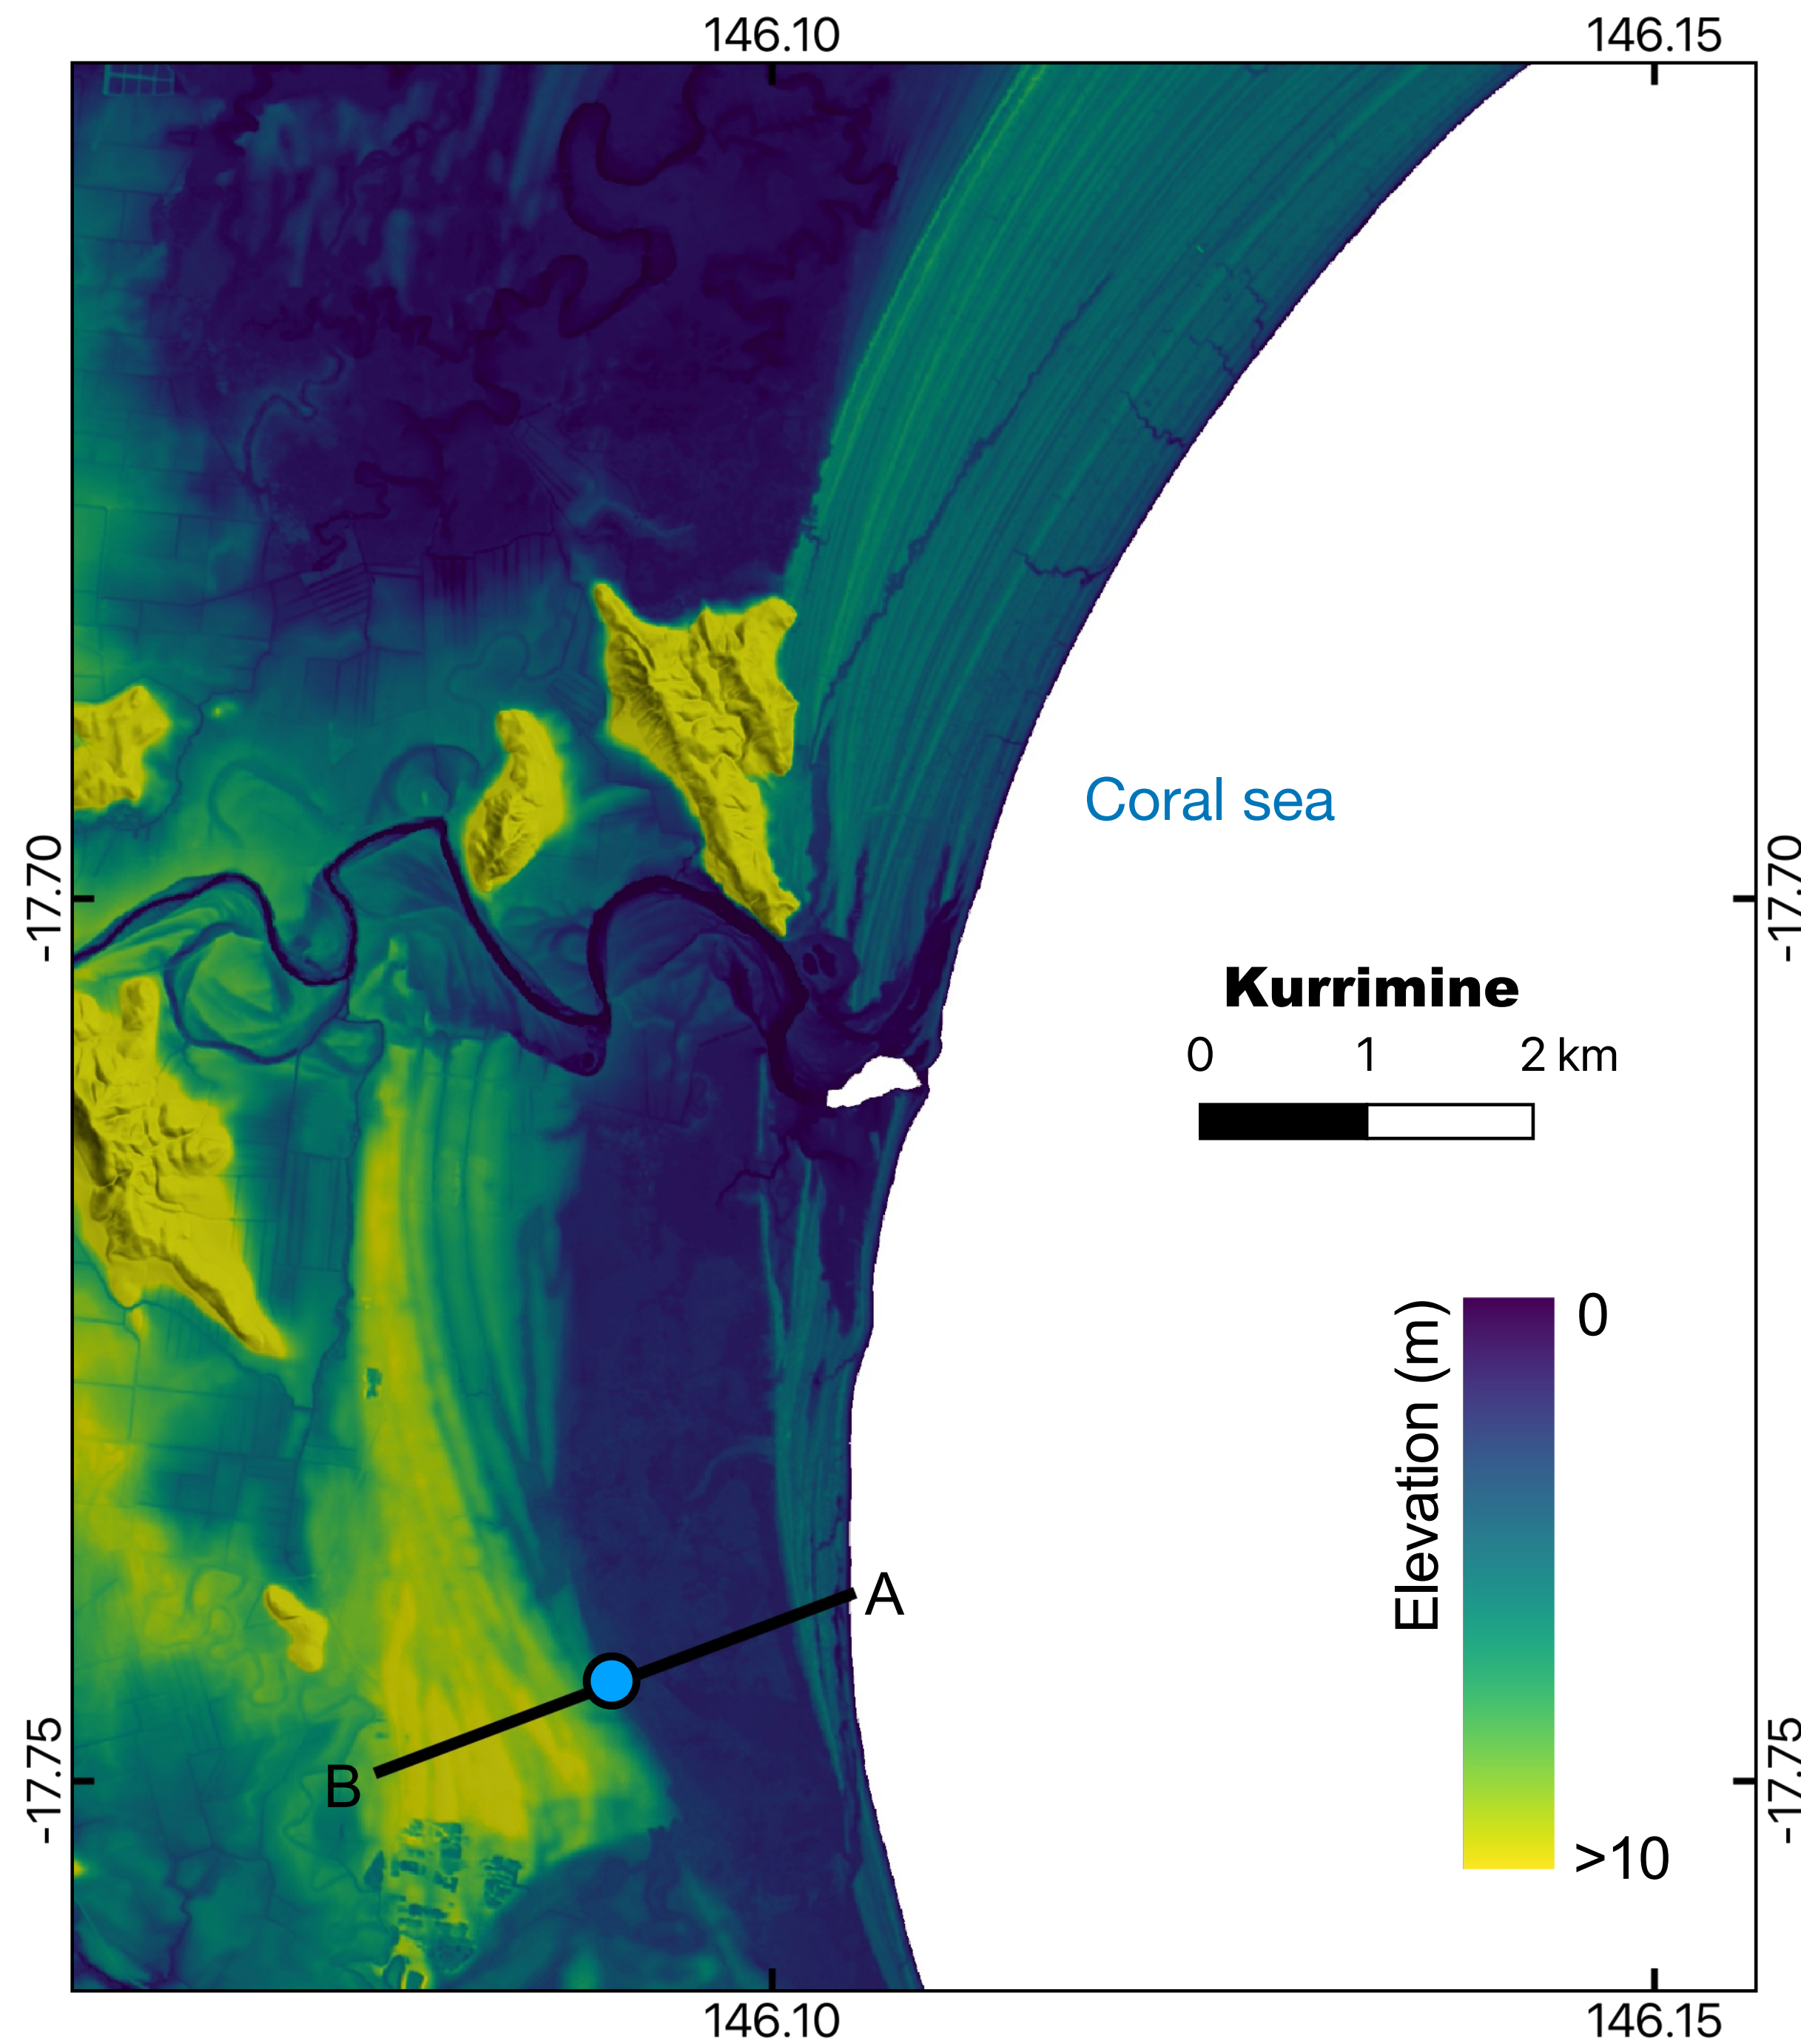

Elevation data licence: CC-BY 4.0

Map drawn in QGIS 3.16

Elevations are referred to the Australian Height Datum (AHD)

The star indicates the approximate point where core JW4 was drilled by Gagan et al., 1994, *Sedimentology* (**41**, 329-351)

The blue dot indicates the inner part of the Last Interglacial barrier. This point has been used as a sea-level proxy.
