

JESS Thermodynamic Database v8.9
Licence, copyright and disclaimer
23-Jan-2023

For the purpose of freely distributing the whole contents of the Joint Expert Speciation System (JESS) Thermodynamic Reaction Database (called JPD), permission is hereby granted by Fairwater Enterprises Pty Ltd (ACN 110 427 828), 940 Balingup-Nannup Road, Southamptn, WA 6253, Australia to Josep Bonet, Montserrat Filella, and Peter M May so they may individually and/or collectively render the JPD compilation into PDF form and make the resulting PDF files widely available on the internet or by any other means.

Fairwater Enterprises Pty Ltd manages and distributes JESS software on behalf of the JESS Owners: Mayhem Unit Trust (ABN 12 962 237 824) of 940 Balingup-Nannup Road, Southamptn, WA 6253, Australia and Nalco Company, a Delaware Corporation at 1601 West Diehl Road, Naperville, IL 60563, U.S.A. Nalco Company has acquired all relevant rights from the previous Owner in part, The CSIR. (The CSIR is a statutory council, duly established under Act No 46 of 1988 of the Republic of South Africa, located at Meiring Maude Road, Brummeria, Pretoria, South Africa.) Fairwater Enterprises Pty Ltd is a private company with limited liability, duly incorporated under the relevant laws of Australia and is herein represented by Dr Peter M. May acting as a member of the company and in no other capacity.

Whilst considerable effort is made to ensure that JESS and JPD are error-free and user-friendly, we give no warranties. All JESS material is made available on an 'as is' basis, under the condition that you use it entirely at your own risk. No person or agency involved in JESS development assumes any responsibility for losses incurred through the use of JESS or of its documentation.

All JESS intellectual property rights (including copyright) are hereby asserted and retained. However, provided appropriate attribution is given, permission is granted to anyone under the terms of the above disclaimer to use freely the contents of the PDF documents pertaining to the JESS Thermodynamic Reaction Database v8.9 as recorded therein. Any dissemination by you of these documents to third parties must include the above disclaimer and, in any event and under all circumstances, takes place at your own risk.

Dr Peter M May
