The 'Scarlatti paradox'

Domenico Scarlatti research can boast no equivalent to the enormous progress in Bach and Handel scholarship since 1950; in fact, this period has witnessed the uncovering of more additional intelligence about the two German masters than one could locate with a microscope in the entire body of information about Scarlatti...

...The popularity of [Scarlatti's] music brought serious study to it earlier than to much other music of the period; we embarked quite a while ago and yet we still cannot see the opposite shore. So many tasks remain that the state of our art would fail aesthetic inspection or information audit.

Joel Sheveloff, 'Domenico Scarlatti: Tercentenary Frustrations', MQ, 1985

Our objective is therefore to carry out the first comprehensive and systematic study of all surviving C18 MS and printed copies of Scarlatti's keyboard sonatas

Scope - the size of the task

- 555 sonatas in Kirkpatrick's catalogue, plus >30 attributed or attributable
- 55,469 bars of music
- ± 3200 MS and printed witnesses
- In >100 volumes
- In >30 libraries and archives worldwide
- $\pm 20,000,000$ data points makes a bigg(ish) data set (by humanities standards)

A jigsaw without the box and with most of the pieces missing

22.

Allegro.

Methodology – philology and phylogenetics

- ‘forensic’ philology – contact and transfer/copy and change
- but the conventional stemma will not work for a compilation
 - a matrix approach is needed
- phylogenetics and ‘reverse DNA’ – differences in common may indicate kinship

**Hence the need for detailed bar-by-bar, note-by-note collation
of all witnesses against a common baseline (control)**

Success factors

- Teamwork – interdisciplinary and practitioner focused
- Citizen Science (the Argos team) – many extra pairs of eyes and hands
- Access to Jérémie Lumbroso's repository
- The 'Roseingrave' tool for data capture – powerful, flexible and adaptable
- The code – highly structured and legible by humans and computers
- 1 successful pilot project as proof of concept; a second pilot just launched
- Cash

Our approach is empirical and data-driven; comprehensive, systematic and accessible; with a keen eye on future potential and the implications for performers

Next Steps in Scarlatti Research

Computational Musicology

ResearchWorks — Feb. 27th, 2023
Dr. Jérémie Lumbroso

From Computer Science to Music

- questions of scale
 - how to approach a composer that is known only through 555 sonatas
 - scaling issues arising from analysis
 - *how a composer created a generative formula that could scale to 500+ pieces*
- questions of data management
 - how to manage the data related to research projects
- questions of community building
 - how to build focused community and scholarship around the composer
 - how to bring together a critical mass of researchers

K. 533: Repetitions

102

K. 533

Allegro assai

The image displays two systems of musical notation for a piano piece, K. 533, marked 'Allegro assai'. The key signature is D major (two sharps) and the time signature is 6/8. The first system consists of four measures. In the first measure, the right hand has a whole rest while the left hand plays a sixteenth-note ascending scale. The second measure features a sixteenth-note ascending scale in both hands. The third and fourth measures show the right hand playing a dotted quarter note with a mordent, while the left hand continues with a sixteenth-note ascending scale. The second system also consists of four measures, starting with a measure number '5' above the first note. The right hand plays a dotted quarter note with a mordent, and the left hand plays a sixteenth-note ascending scale. The subsequent three measures show the right hand playing a sixteenth-note descending scale while the left hand plays a dotted half note.

Princeton Center for Digital Humanities

Computer-Assisted Pattern Analysis of Domenico Scarlatti's Keyboard Sonatas

Enabling new research on the Baroque composer by facilitating quantitative approaches

Domenico Scarlatti's 555 keyboard sonatas hold the confusing honor of being, as W. Dean Sutcliffe phrased it, "one of the greatest but least well understood and covered repertoires of Western keyboard music." A confluence of many factors seem to have led to this gap between importance and understanding. One of the main factors is the size, impenetrability, and density of the corpus of sonatas. This seems to have proven daunting for experts in musicology who may be used to more qualitative methods.

Lumbroso and his team believe the key to unlocking new, serious scholarship on Scarlatti's keyboard sonatas is to turn to quantitative methods and plan to employ computer science expertise on the processing of Big Data streams, to process a subset of the sonatas, and to establish a framework for the structural analysis of these sonatas. The proposal will be based on:

- The curation of an open-source machine-readable dataset of the keyboard sonatas, such as to enable a new generation of scholars to study the sonatas using existing tools (such as music21, etc.).
- The creation of a set of open-source scripts for the extraction and categorization of rhythmic micro-patterns and structural macro-patterns within the sonatas

The repository

The image shows the GitHub repository page for 'scarlatti'. At the top is a profile picture of Domenico Scarlatti and the name 'scarlatti' with the description 'Preservation, diffusion and promotion of Domenico Scarlatti's work, particularly the keyboard sonatas.' Below this is a navigation bar with links to Overview, Repositories (15), Projects, Packages, Teams (3), People (6), and Settings. The main content area shows a README file titled 'Scarlatti Foundation'. The README text states: 'The Scarlatti Foundation's goal is the preservation and dissemination of the works of Domenico Scarlatti, and in particular of his keyboard sonatas. This GitHub organization contains: high-quality digitizations of the contemporary sources for Scarlatti's work; high-quality datasets related to Scarlatti. The foundation's initial support was provided by Princeton University and is supported by on-going grants. Contact Dr. Jérémie Lumbroso lumbroso@cs.princeton.edu for more information.'

Popular repositories

This section displays four popular repositories. Each repository card includes the repository name, a brief description, and icons for programming language, stars, and forks.

- roseingrave** (Public)
Massively scalable musical source comparator
Python, 2 stars, 1 fork
- sonatas-catalog** (Public)
Repository that stores a machine-readable listing of all Scarlatti sonatas, with key, mode, tempo and time signature.
1 star
- gilbert-edition** (Public)
Dataset of the Kenneth Gilbert Le Pupitre edition of Scarlatti sonatas.
1 fork
- barcelona-ms1964** (Public)
Typographical facsimile of the Barcelona MS 1964 manuscript of Scarlatti sonatas.

- Aggregate all data related to Scarlatti in open access
- **ALL manuscripts EVER**
- **ALL prints EVER**
 - (except Longo 🙅)
- ALL datasets related to Scarlatti

APPROCHE STATISTIQUE DES SONATES

Le thème de ce colloque : "Que savons-nous de Scarlatti aujourd'hui ?", pose à la fois une question très importante, et même agaçante, si l'on songe, qu'en définitive, on ne sait pas grand chose et, d'autre part, sans grande importance, parce que ce qui fait exister Scarlatti au-delà de sa mort, ce n'est évidemment pas son jeu du clavecin ni le témoignage de ses contemporains sur ses talents d'improvisateur, mais bien l'œuvre pour clavier que nous appelons les 555 sonates, même si cette appellation, un peu approximative, témoigne d'une certaine recherche de la symbolique du nombre, chose qui, jusqu'à preuve du contraire, a toujours désintéressé Scarlatti (à la différence de son fameux contemporain, Bach).

Mais avant d'aller plus avant, je me dois de me présenter : je ne suis pas un musicologue. Je suis un praticien, un humble claveciniste dont la science théorique et historique se limite, sur le sujet qui nous intéresse aujourd'hui, aux ouvrages de vulgarisation tels que les éditions de R. Strakosky (1). Ainsi le

Difficulty level according to Kirkpatrick catalog

Data by Christophe Rousset (1983)

— K77 → K165 — K1 → K49

Kirkpatrick catalog (K1 → K555)

Barcutter + Incipits

Presto

A modern musical score for a Presto movement, featuring two staves (treble and bass clef) in 3/8 time. The key signature is one sharp (F#). The score includes various musical notations such as notes, rests, trills (tr), and ornaments (w). The tempo marking "Presto" is at the top left. The word "Allegro" is written below the first staff. The score is divided into two systems, each with six measures. The first system ends with a double bar line. The second system continues the piece.

YOUR EMAIL
(here lumbroso@princeton.edu)

LINK TO TARGET SOURCE
(here Amsterdam, Barcelona 1964, Barcelona Orfeo 1740, etc.)

LINK TO CONTROL SOURCE
("K. xx", and usually Essercizi, Venezia or Parma)

LINK TO SUPPLEMENTAL SOURCES
may help with reading the manuscript sources (i.e., modern Gilbert edition, or modern facsimile of Barcelona)

checkbox field (check if true)

dropdown field (click on the menu)

freeform field

YOUR ASSIGNED SONATAS
there is one spreadsheet per sonata
you are invited to complete all sheets assigned

BAR DIFFERENCE CELLS
one row per bar across all sources
notate differences between the control
(in the top left corner, "K. 16") and the target source
(in the first row, i.e., "Amsterdam", "Barcelona 1964")

NOTES
notate any note or observation having
to do with one of the cells to the right

- Compare every pair of manuscripts
 - Crowdsourcing
- Derive “difference code”
- Eventually rebuild the full text of each manuscript using “control” + “diff code”
- Goal is to obtain a fully searchable dataset of all musical content

Open-source edition

- Reference edition for machine queries
- Control text in LilyPond
- Variants derived programmatically from diff codes (Roseingrave) and control text
- Research project involving **Nicolas Sceaux**

Overall deliverables

- Our own research questions
- Creating the data infrastructure to make it easier for EVERYBODY to investigate research questions on Scarlatti
 - All of our byproducts available publicly
- Many tools to support future research both on Scarlatti and on digital musicology of manuscripts

People and Process: the Argos team

- International group of expertly trained musicians and researchers
 - Guildhall School, Royal Academy of Music, Juilliard, Utrecht Conservatoire, Conservatorio 'G. Verdi'...
 - We are recruiting more devotees!
- Over 55.000 bars of music in the Kirkpatrick catalogue

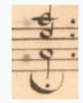

Our volunteers:

Miguel Arnaiz Molina (Spain)
Enrico Baiano (Italy)
Alyssa Campbell (USA)
Penelope Cave (UK)
Laia Martín (Spain)
Luis Romero (Mexico/Netherlands)
Christine Saunders (UK)
Idil Turgut (Turkey/Netherlands)
Robert Warner (USA)
Christine Whiffen (UK)
Raymond Wui Man Yiu (Hong Kong/UK)

People and Process

- Notation system
- Lilypond pitch conventions
 - Free text-based music engraving software
 - Letters, numbers, and punctuation: c2 dsharp''4 eflat''8.
 - Special abbreviations for ornamentation: app acc tr etc.

Type of ornament	Example	Abbreviation/code
Acciaccatura (slashed grace note)		acc (K. 109, Cambridge 148)
Appoggiatura		app (K. 522, Venezia 13)
Trill (squiggly/wavy line)		trill
Trill	tr; t; +	tr
Long wavy line		longwavyline (K. 109, Parma 3)
Mordent		mordent (K. 522, New York Cary)
Slide		slide (K. 109, Venezia 1749)
Line of dots		lineofdots
Tremulo	tre; trem; trem.lo	trem
Turn		turn
Double appoggiatura		dblapp
Fermata		fermata (K. 544, Parma 15)

Recording variants: step one

- Counting notes
 - Special rules for ornaments, tied notes, rests
- Separate vertical sound events
 - Use of Kenneth Gilbert's edition

Recording variants: step two

- Pre-defined formats

Code	Meaning
9c'] c''	The ninth note in the bar, which is a middle C in the control, is an octave higher in this witness.
9c'] 0	The c' on position 9 is not present in the witness.
9c'] r4	The c' on position 9 is a crotchet rest in the witness.
9] +c4	Crotchet c present in witness on position 9 but not in control.

- Separation of variants

Incorrect notations

```
7a8b9c] 7b8c9d  
7a] +natural -tr
```

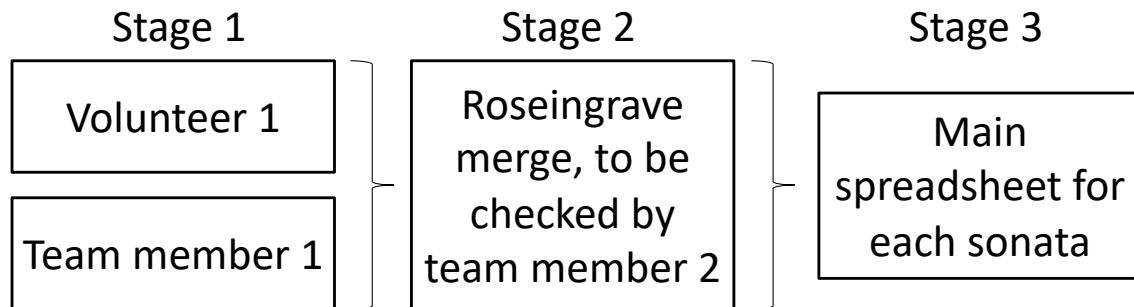

These notations are incorrect: please record each variant **separately**, even if multiple variants occur on the same note.

Correct notations

```
7a] b ; 8b] c ; 9c] d  
7a] +natural ; 7a] -tr
```

- Online user manual: constant refinement

Recording variants: workflow

- Workflow ensures quality and accuracy
