Onboarding data providers in GoTriple

- An open platform!
 - Big aggregators and small archives alike
 - SSH-related (See [GoTriple's Disciplines](#))
- How
 - Option 1: you can be harvested by a large aggregator
 - BASE, DOAJ
 - OpenAIRE, Isidore
 - Option 2: producing a datafile in OpenAIRE format
 - SW development needed
 - Option 3: you can be harvested directly by GoTriple
 - Harvesting Management System

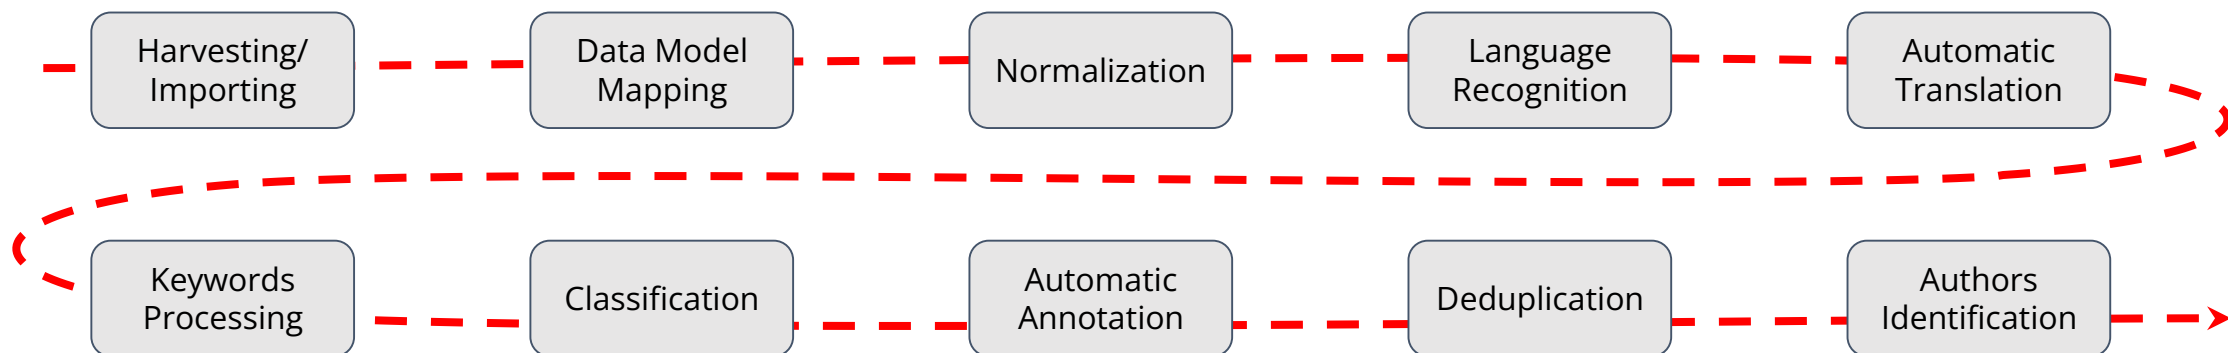

GoTriple architecture

Publications metadata acquisition

- Harvesting of OAI-PMH endpoints
 - DC and EDM formats
- OpenAire and Isidore data dumps
 - OpenAIRE is a “generic” file format for data import
- “Assembly line” style processing

How to be harvested by GoTriple

- Some resources:
 - [GoTriple Content Providers Handbook](#)
 - [Your data in GoTriple](#)
 - *Various TRIPLE deliverable*
