# Translated English version of the online questionnaire (experimental group)

This document is part of the dataset for the paper "Using GUI Test Videos to Obtain Stakeholders' Feedback", which has been accepted at the 17th International Conference on Software and System Processes. The authors of this paper are: Jianwei Shi, Jonas Mönnich, Jil Klünder, and Kurt Schneider. The experiment in which this questionnaire was used was conducted online in October 2022.

#### **Declaration of consent**

Dear Participant,

Thank you for your interest in participating in this study.

The subject of this questionnaire are different methods for collecting customer feedback in the context of software development.

This survey is created as part of a master's thesis at the Leibniz University Hannover. The data can be accessed by the supervisor or the assessors of the scientific work for the purpose of performance evaluation. The collected data may be stored for an unlimited period of time in accordance with *Art. 89 Abs. 1 DSGVO*.

- Participation in the study is voluntary. You can cancel the questionnaire at any time and without giving reasons.
- Your participation is anonymous, which means that your answers cannot be traced back to you. This also means that your personal personal data record is not identifiable for us. A subsequent deletion of your data is therefore not possible.
- Your data will be used exclusively for scientific purposes. The research does not follow any commercial interest.
- Your data will be treated confidentially and will be protected from unauthorized access. For the time of the evaluation the data will be stored on an internal server. The completely anonymized data set will be made available with the thesis.

Cons1	I hereby confirm that I am at least 18 years old and have read and understood the declaration of consent:
	☐ I agree to participate.

#### Gherkin tutorial

In order to participate in this study, it is necessary that you know the basics of *Gherkin*. These basics will be explained to you below.

Gherkin is a description language used by software developers to describe how software behaves in certain situations. Gherkin provides a set of keywords to structure this description. For each aspect of software behavior, a so-called scenario is documented. The set of all scenarios determines the behavior of the software. In the following you see an example scenario, with which we explain the basics of Gherkin. The software to which this scenario refers is a website for selling movie tickets.

```
Scenario: Successful movie ticket sale

Given I am on the shopping cart page
And I have a movie ticket worth 15 euros in my shopping cart
And I have 20 euros in credit
When I select "Buy now"
Then I see the notification "Thank you for your purchase. Enjoy the movie."
And my new credit is 5 euros
And I receive an email with the ticket attached as a PDF file
```

Apart from the title, which is marked by the keyword Scenario, a scenario consists of three parts: initial context, event, and outcome. These three parts are marked by the Gherkin keywords Given, When and Then.

- The initial context (Given) describes the state in which the software is at the beginning of the scenario.
- The event (When) describes an interaction that is performed by the user of the software.
- The outcome (Then) describes how the software should react to the event.

The keyword And can be used to repeat the previous keyword.

If extensive information is to be presented clearly, data tables can be used. The following example shows how an initial context can be structured using a data table.

The first row of a table consists of the column headings. The subsequent rows contain the values. In this example, row 2 and row 3 of the table would therefore each represent an offer that is displayed on the start page.

To confirm that you have read the text carefully, please answer the following questions. The study will continue when you have answered the questions correctly.

Compr1	Which of the following keywords are always included in a scenario (according to the text above)?
	☐ Then
	☐ Given
	☐ And
	☐ When
Compr2	Which of the following statements is/are correct?
	$\ \square$ A scenario describes how a software behaves in a certain situation.
	$\square$ An initial context is introduced by the keyword When.
	$\square$ Several scenarios are usually created for a software.
	☐ The software's reaction is described after the keyword Then.

#### Instructions

In this study you will be introduced to two "versions" of a software:

- Version 1: You will read an excerpt of the requirements. The requirements describe how the software is supposed to behave.
- Version 2: You will see 10 scenarios that show how the software actually behaves. Each scenario consists of a Gherkin text and a video that shows the implementation.

You will be asked to check if there are any inconsistencies between requirements and scenarios.

## Requirements

In the following you will read an excerpt of the software requirements. The requirements specify how the software should work. The excerpt will be displayed to you again as required during the course of the study.

The software is a social network where users can rate movies. In this section of the requirements, however, only the account management functions are considered.

The software is to be implemented as a website so that it can be used on PCs, smartphones and tablets. Overall, the website should make a friendly impression.

In order to use the software, a user account must be created. To do this, users enter an email address, a user name and a password. In addition, they must accept the "Terms of Use" and the "Privacy Policy". To ensure that the user account is created by a real person, an image-based CAPTCHA must be solved. After the account creation is completed, users are automatically logged in.

To log in regularly, users must enter their username and password. After logging in or out, they are always redirected to the home page, where they can see currently popular movies. If users forget their password, they can request a password reset on the login page. For this purpose, the email address must be provided.

Users are supposed to personalize their profile. They can change their avatar by uploading a profile picture. If a user has not uploaded their own profile picture, a default picture (blue person outline) is displayed. Users can delete an uploaded profile picture so that the default avatar is displayed again. Users can also display their top 3 favorite movies on their profile. To add a movie as a favorite, users can use a dedicated search function and then select the movie from a poster preview.

If users no longer wish to use the software, they can deactivate their user account via the profile settings. To do this they must enter their password and explicitly agree to the deactivation.

Important inputs and actions should be designed in such a way that they avoid accidental irrevocable mis-entries and mis-actions.

If a password entry fails, an error message should be displayed before the inputs are removed and the interaction can be executed again.

For all actions, users should be explicitly informed whether the action was successful or failed (for example, by displaying a temporary notification).

To confirm that you have read the text carefully, please answer the following question. The study will continue when you have answered the question correctly.

	continue when you have answered the question correctly.
Compr3	Which of the following statements is/are correct?
	$\hfill\Box$ The text above describes all the requirements for the software.
	$\ \square$ The text above describes some requirements for the software.
	☐ The software allows users to rate movies.
	☐ The requirements in the text refer to the rating of movies.

On the following pages you will be presented with 10 scenarios. You are asked to decide whether there are any inconsistencies between the scenarios and the requirements.

Please note the following:

- Each scenario consists of a Gherkin text and a video.
- You will find a recap of the requirements before each scenario.
- You can return to previous scenarios by using the buttons at the bottom of the page.

Information regarding the videos:

- You can use all functions that the video player offers (pause, maximize, skip) and repeat the videos as often as necessary.
- · The video recordings have been edited to assist you in viewing.
- In the videos, you may sometimes see functionalities that were not discussed in the requirements. Disregard these functionalities when looking for inconsistencies.

The graph below provides an overview of all the scenarios you will see. The arrangement of the scenarios in the graph serves only as an example.

Click here to see the requirements.

Note: The following Gherkin text and video depict the same scenario in different ways. Do  $\underline{not}$  compare the Gherkin text with the video, but compare the text & video with the requirements (above).

## Diff1 Does scenario 1 (Gherkin text & video) match the requirements?

If the scenario matches the requirements, please write "Matches all (Stimmt überein)". Otherwise, describe all inconsistencies that you notice.

Note: The following Gherkin text and video depict the same scenario in different ways. Do  $\underline{not}$  compare the Gherkin text with the video, but compare the text & video with the requirements (above).

## Diff2 Does scenario 2 (Gherkin text & video) match the requirements?

If the scenario matches the requirements, please write "Matches all (Stimmt überein)". Otherwise, describe all inconsistencies that you notice.

## Cert2 How certain are you on answering the last question?

Click here to see the requirements.

Note: The following Gherkin text and video depict the same scenario in different ways. Do  $\underline{not}$  compare the Gherkin text with the video, but compare the text & video with the requirements (above).

## Diff3 Does scenario 3 (Gherkin text & video) match the requirements?

If the scenario matches the requirements, please write "Matches all (Stimmt überein)". Otherwise, describe all inconsistencies that you notice.

## Cert3 How certain are you on answering the last question?

Click here to see the requirements.

Note: The following Gherkin text and video depict the same scenario in different ways. Do  $\underline{not}$  compare the Gherkin text with the video, but compare the text & video with the requirements (above).

#### Diff4 Does scenario 4 (Gherkin text & video) match the requirements?

If the scenario matches the requirements, please write "Matches all (Stimmt überein)". Otherwise, describe all inconsistencies that you notice.

## Cert4 How certain are you on answering the last question?

Click here to see the requirements.

Note: The following Gherkin text and video depict the same scenario in different ways. Do <u>not</u> compare the Gherkin text with the video, but compare the text & video with the requirements (above).

```
Scenario: Add profile picture
Given I am on the account settings page
When I drag an image into the selection field
And I confirm the image selection
Then a notification shows that the profile picture was changed successfully
And the uploaded picture is shown as my current profile picture
```

## Diff5 Does scenario 5 (Gherkin text & video) match the requirements?

If the scenario matches the requirements, please write "Matches all (Stimmt überein)". Otherwise, describe all inconsistencies that you notice.

## Cert5 How certain are you on answering the last question?

Click here to see the requirements.

Note: The following Gherkin text and video depict the same scenario in different ways. Do  $\underline{not}$  compare the Gherkin text with the video, but compare the text & video with the requirements (above).

```
Scenario: Delete profile picture
Given I am on the account settings page
And I previously added a custom profile picture
When I delete my profile picture
Then a notification shows that the profile picture was deleted successfully
And the default profile picture is shown as my current profile picture
```

## Diff6 Does scenario 6 (Gherkin text & video) match the requirements?

If the scenario matches the requirements, please write "Matches all (Stimmt überein)". Otherwise, describe all inconsistencies that you notice.

## Cert6 How certain are you on answering the last question?

Click here to see the requirements.

Note: The following Gherkin text and video depict the same scenario in different ways. Do  $\underline{not}$  compare the Gherkin text with the video, but compare the text & video with the requirements (above).

```
Scenario: Add favorite movie to profile
Given I am on the account settings page
When I open the favorite movies search
And I search for "Django Unchained"
And I select "Django Unchained" from a list of search results
Then "Django Unchained" is added as one of my favorite movies
```

## Diff7 Does scenario 7 (Gherkin text & video) match the requirements?

If the scenario matches the requirements, please write "Matches all (Stimmt überein)". Otherwise, describe all inconsistencies that you notice.

## Cert7 How certain are you on answering the last question?

Click here to see the requirements.

Note: The following Gherkin text and video depict the same scenario in different ways. Do  $\underline{not}$  compare the Gherkin text with the video, but compare the text & video with the requirements (above).

## Diff8 Does scenario 8 (Gherkin text & video) match the requirements?

If the scenario matches the requirements, please write "Matches all (Stimmt überein)". Otherwise, describe all inconsistencies that you notice.

## Cert8 How certain are you on answering the last question?

Click here to see the requirements.

Note: The following Gherkin text and video depict the same scenario in different ways. Do <u>not</u> compare the Gherkin text with the video, but compare the text & video with the requirements (above).

## Diff9 Does scenario 9 (Gherkin text & video) match the requirements?

If the scenario matches the requirements, please write "Matches all (Stimmt überein)". Otherwise, describe all inconsistencies that you notice.

## Cert9 How certain are you on answering the last question?

Click here to see the requirements.

Note: The following Gherkin text and video depict the same scenario in different ways. Do <u>not</u> compare the Gherkin text with the video, but compare the text & video with the requirements (above).

## Diff10 Does scenario 10 (Gherkin text & video) match the requirements?

If the scenario matches the requirements, please write "Matches all (Stimmt überein)". Otherwise, describe all inconsistencies that you notice.

## Cert10 How certain are you on answering the last question?

ProcEval1	Overall, how difficult was it to recognize inconsistencies?									
	Very easy	0	0	0	0	0	0	0	0	Very difficult
ProcEval2	After showing you ten scenarios: How do you assess your understanding of the functionality and usage of the presented functions?									
	Very limited	0	0	0	0	0	0	0	0	Very extensive
	Demographics									
Dem1	What gender	What gender do you identify as?								
	O Female									
	O Male									
	O Diverse									
Dem2	How old are you?									
	I am	years	old.							
Dem3	What is the highest educational qualification you have?									
	O Still in school									
	<ul> <li>Finished school without graduation</li> <li>Hauptschulabschluss</li> <li>Realschulabschluss</li> <li>Vocational baccalaureate diploma (Fachabitur)</li> <li>A-levels (Abitur)</li> <li>Bachelor's degree</li> <li>Master's degree</li> </ul>									
	O Ph.D.									
Dem4	How much programming experience do you have?									
	O No experience									
	O Limited experience (student, hobby programmer etc.)									
	O Extensive experience (professional software developer, research assistant, etc.)									
Dem5	How familiar are you with the concept of behavior-driven development (BDD)?									
	O I am unfamiliar									
	O I know a little									
	O I know a lot									

**Process evaluation** 

## Please answer the following questions honestly - the answers have no consequences for you! SelfAssess1 Did you answer the questions in this study seriously? O Yes, I have answered all questions seriously. My information can be used for the evaluation. O No. Were you able to complete the questionnaire without being distracted? SelfAssess2 O Yes, I paid full attention to the study and worked through it in one sitting. O I was briefly distracted by my environment (people, smartphone, etc.) once. O I was distracted by my environment (people, smartphone, etc.) several times. Were you able to complete all tasks as indicated in each instruction? SelfAssess3 O I completed all tasks as indicated in the instructions. O I sometimes did not understand the instructions. O I often did not understand the instructions. Do you have any additional comments? SelfAssess4 Did you notice anything negative while taking this survey? Were the questions not clear at any point or were you uncomfortable answering them?

**Closing questions**
