

Academic and Non-Commercial Research Use Software License and Terms of Use

Genomic Language Model (gLM) is a software package that includes original code created by the Harvard researchers listed below (the “Software”), and third-party code that may be obtained by End Users under separate terms of use. The Software is designed to label behaviors identified from 3D pose dynamics data through the use of computational modeling and fitting approaches. The Software was developed by Yunha Hwang, at Harvard University. It is distributed for free academic and non-commercial research use by President and Fellows of Harvard College (“Harvard”).

Using the Software indicates your agreement to be bound by the terms of this Academic and Non-Commercial Research Use Software License and Terms of Use (“License and Terms of Use”). Absent your agreement to the terms below, you (the “End User”) have no rights to hold or use the Software whatsoever.

Harvard agrees to grant hereunder a limited non-exclusive license to End User for the use of the Software in the performance of End User’s internal, non-commercial research on the following terms and conditions:

1. **NO REDISTRIBUTION.** The Software remains the property of Harvard, and End User shall not publish, distribute, or otherwise transfer or make available the Software to any other party.
2. **NO COMMERCIAL USE.** End User shall not use the Software for Commercial use and any such use of the Software is expressly prohibited. “Commercial use” includes, but is not limited to, (i) use of the Software in fee-for-service arrangements, (ii) use of the Software by core facilities or laboratories at non-profit institutions to provide research services to (or in collaboration with) for-profit third parties for a fee, (iii) use of the Software in industry-sponsored and/or collaborative research projects in which any rights to use the Software are granted to the industry sponsor or collaborator, and (iv) use of the Software by a for-profit entity in internal research conducted for the purpose of testing, improving or screening products or services to be marketed or sold by or on behalf of such entity. If End User wishes to use the Software for Commercial use, End User must execute a separate license agreement with Harvard.
