# The BookMetaHub – Thoth interface:

## Open metadata management platforms for publishers

### Interface for most extensive data curation:

#### ➤ BookMetaHub

- Import of DOI-based records and ONIX files
- Data curation via User Interface
- Export of Crossref-compatible XMLs and BITS XML

#### ➤ Thoth

- Data curation via User Interfaces
- Export of various ONIX formats, KBART, CSV, JSON
- Easy interoperable solution for the creation of rich DIY metadata for (OA) books
- Increased discoverability and visibility for academic book publications
- Data flow between systems for more robust publishing ecosystem

## Abstract

In October 2013, one of the largest anti-migrant riots took place in Moscow. Clashes and arrests continued late into the night. Some in the crowd, which grew to several thousand people, could be heard chanting "Russia for the Russians" with their animus directed towards dark-skinned labor migrants from the southern border. The slogan "Russia for the Russians" is not a recent invention. It first gained notoriety in the very last years of the tsarist regime, appealing primarily to individuals drawn to the radical right. Analyzing a wide range of printed and visual sources, *Racism in Modern Russia* marks the first serious attempt to understand the history of racism over a span of 150 years. A brilliant examination of the complexities of racism, Eugene M. Avrutin's panoramic book asks powerful questions about inequality and privilege, denigration and belonging, power and policy, and the complex historical links between race, whiteness, and geography. *The ebook editions of this book are available open access under a CC BY-NC-ND 4.0 license on www.bloomsburycollections.com.*
