

Hecat

Disruptive Technologies Supporting
Labour Market Decision Making

2022 IN REVIEW

KEY POINTS

- MyLabourMarket tool has been piloted in Slovenia
- Work continues to iterate MLM for the next round of piloting
- Two successful F2F meetings and regular group meetings via Zoom
- HECAT related work has been accepted and presented at conferences across Europe
- Consortium members continue to publish in international journals

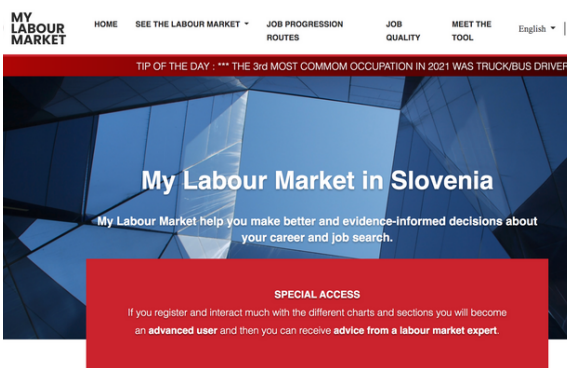

Our first post-Covid face-to-face in Sciences Po, France

As the world reopened, our consortium took the opportunity to step outside of Zoom and meet in France. The team visited Sciences Po, Paris where we shared a productive 2 days of collaboration and learning.

Another successful in-person meet up in Slovenia

We followed our French F2F with our next consortium meeting, hosted by our Slovenian partners in Ljubljana. Here, we again took the opportunities granted to us in person to work on our project offerings together.

MyLabourMarket piloting takes place

As the HECAT project nears its most exciting stages, testing has begun on our tool MyLabourMarket. Based on initial work from our sociology teams, our technical partners have been hard at work getting MyLabourMarket piloting ready. Testing took place in September 2022, led by consortium members from Roskilde University and assisted by fellow project members from across the cohort. Based on findings reported, iterations are currently being confirmed and carried out before the tool is re-piloted in early 2023.

This project has received funding from the European Union's Horizon 2020 research and innovation program under grant number 870702.

HECAT ——— 2022 IN REVIEW

Conference Highlights

HECAT was represented across a number of high-level conferences in 2022. These included:

- Sociological Association of Ireland, Limerick, May
- Street-level Bureaucracy, Copenhagen, June
- European Group for Organizational Studies (EGOS), Vienna, July
- European Association for the Study of Science and Technology (EASST), Madrid, July
- 17th European Congress on Psychology, Ljubljana, July
- European Network For Social Policy Analysis (ESPANET), Vienna, September

Talks and Events

Part 2: Presentation of work in progress paper drawing on HECAT project

Working title: Selecting suitable job quality items in profiling and job matching algorithms for public employment services

Clément Brébion, Janine Leschke (CBS)

Pavle Boskoski, Biljana Mileva Boshkoska (JSI)

CEDIC Talks - OsloMet

Featured Publications

2022 also saw exciting publications for some of our consortium members.

Alizée Delpierre of Sciences Po published her first book: *Servir les Riches* based on her PhD work. She additionally contributed to work on jobsearch which was published in *Sociologie Du Travail* with fellow consortium member Didier Demazière.

Zach Roche and Ray Griffin of SETU further published *Activation Through Marketisation as a Process of Ignorancing in Social Policy Administration*.
