

# Communicating impact: NASA Openscapes

We believe open science can accelerate data-driven solutions and increase diversity, equity, inclusion, and belonging in research and beyond.

**Today's Purpose:** to share movement building with NASA Openscapes and discuss impacts

**Julia Stewart Lowndes, Erin Robinson, Justin Rice,  
NASA Openscapes Mentors,  
and the Openscapes community**

ESDSWG, Baltimore, Maryland, March 22, 2023

# NASA Openscapes Mentors

## A mentor community across NASA Earth science data centers

Andy Barrett • Chris Battisto • Brandon Bottomley • Aaron Friesz • Alexis Hunzinger • Mahsa Jami • Alex Lewandowski • Bri Lind • Luis Lopez • Catalina Oaida Taglialatela • Celia Ou • Jack McNelis • Cassie Nickles • Brianna Pagán • Sargent Shriver • Amy Steiker • Michele Thornton • Makhan Virdi • Jess Welch

## Support researchers as they migrate analytical workflows to the Cloud:

- Co-creating common tutorials; review & reuse process
- Community of practice for teaching, mentoring, facilitation
- Scaling open science leaders

Slow down to speed up: deep investment in small numbers 1st.  
Combine practices from many places - open source software dev, community, facilitation (incl. rOpenSci, Turing Way, Carpentries, Mozilla, ESIP)

<https://nasa-openscapes.github.io>

# 2021 Cloud Hackathon - teaching researchers early on

<https://nasa-openscapes.github.io/2021-Cloud-Hackathon/>

## Preparation:

9 co-created tutorials for data access  
User-friendly book with Quarto  
Notebook review, teaching dry runs  
Shared facilitation & teaching practices

## The event:

65 2i2c JupyterHub AWS instances  
50 forks of the GitHub repo  
8 hack-team projects presented on Day 5

*"It was a really great week. The tutorials were AMAZING. Everyone did a great job, and everyone was very nice. I really appreciated welcoming environment. I don't have a strong python background. But i was supported in learning all around"*

## Blog summaries:

[earthdata.nasa.gov/learn/articles/2021-cloud-hackathon](https://earthdata.nasa.gov/learn/articles/2021-cloud-hackathon)

[podaac.jpl.nasa.gov/announcements/2021-12-15-The-2021-Cloud-Hackathon](https://podaac.jpl.nasa.gov/announcements/2021-12-15-The-2021-Cloud-Hackathon)

**2021 Cloud Hackathon**  
Transitioning Earthdata Workflows to the Cloud

This Hackathon is co-hosted by PODAAC, NSIDC DAAC, and LPDAAC. Additional support is provided by ASDC, GESDISC and Openscapes.

### Welcome

Welcome to **Cloud Hackathon: Transitioning Earthdata Workflows to the Cloud**, co-hosted by the NASA EOSDIS Physical Oceanography Distributed Active Archive Center ([PO.DAAC](#)), National Snow and Ice Data Center DAAC ([NSIDC DAAC](#)), Land Processes Distributed Active Archive Center ([LP.DAAC](#)), with support provided by [ASDC DAAC](#), [GES DISC](#) and [NASA Openscapes](#).

The Cloud Hackathon will take place **virtually** from **November 15-19, 2021**. The event is free to attend, but an application is required. The application period (September 21 - October 12, 2021) is now closed. Those who applied will be informed of the outcome on or around October 20th, 2021.

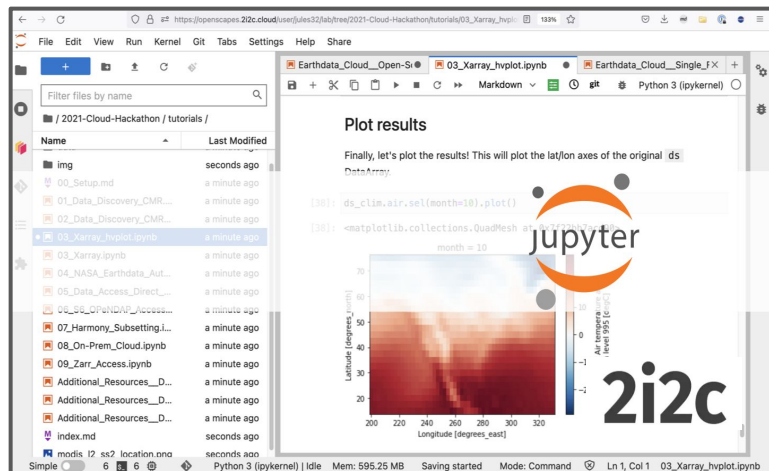

### About

The **Cloud Hackathon: Transitioning Earthdata Workflows to the Cloud** is a virtual 5-day (4 hours per day) collaborative open science learning experience aimed at exploring, creating, and promoting effective cloud-based science and applications workflows using NASA Earthdata Cloud data, tools, and services (among others), in support of Earth science data processing and analysis in the era of big data. Its goals are to:

On Day 1, Mentors stepping in to teach due to an emergency:  
trust + teamwork + familiarity with the material

# Identifying & responding to user needs

15+ workshops & talks led by Mentors since: reusing & extending tutorials with software & conceptual solutions

2i2c JupyterHub: Python, R, Matlab, corn base image: built on Pangeo stack

earthaccess  
Python library

Cheatsheets  
& guides

**NASA Earthdata Cloud Cookbook**  
Supporting NASA Earth science research teams' migration to the cloud

AUTHOR: NASA Openscapes Team | PUBLISHED: May 1, 2022

## Welcome

Welcome to the NASA Openscapes EarthData Cloud Cookbook!

This Cookbook is learning-oriented to support scientific researchers using NASA Earthdata from Distributed Active Archive Centers (DAACs) as they migrate their workflows to the cloud. It has resources to learn how to work with NASA Earthdata on the cloud, as well as well as documentation for how to contribute to these resources. It is under active, open development.

### The Cloud Paradigm

NASA Distributed Active Archive Centers (DAACs) are in the process of moving their data holdings to the cloud. In the new paradigm, data storage (orange in the illustration) will migrate to the cloud (green) and DAAC-provided tools and services built on top of the data are co-located in the Earthdata Cloud.

Cookbook: current tutorials & onboarding

Value of Hosted JupyterHubs  
White paper / RFI

The Value of Hosted JupyterHubs in enabling Open NASA Earth Science in the Cloud

Response to Aspect 1, the question on user needs and use cases for scientific data and computing in support of Open Science at SMD

## NASA Openscapes Mentor Community

### DAAC Staff

- Lay a foundation with **cloud terminology and concepts**
- Provide resources that are **easy to revisit**
- **Continued support** and education are critical
- Significant **learning curve and time investment** required for cloud adoption

Shared 2i2c cloud environment featuring JupyterHub

### End-Users

- Improved **conceptual understanding** of why and when to use, or not use, the cloud
- Inconsistent data and service availability leads to **difficulties reusing** a given workflow
- Lack of common and robust resources
- Earthdata Cloud ecosystem is **complex and overwhelming**

Sentiments from cloud workshop

### Open Science Community

- Recognizing **easy cloud access as a core service**
- Continuing to close the loop between the users we work with and our engineers to **build solutions together**

**Cheatsheets** are a one-stop shop for cloud data access vocabulary & roadmaps (see poster IN22C-0320 for all cheatsheets)

**NASA Earthdata Cookbook** is a central resource for common tutorials, use cases, and self-guided learning

**earthaccess Python library** is an open-source library to simplify Earthdata Cloud search and access

**How we work:  
Openscapes' Flywheel  
for movement building**

**Engage**  
A Future Us mindset

Create space and place

Welcome

Invest in learning  
and trust

**Empower**  
Learning culture

Inspire

Work Openly

**Amplify**  
Open leaders

Leverage common workflows,  
skills, tools

The Openscapes Flywheel:  
A framework for managers to  
facilitate and scale inclusive  
Open science practices  
[Robinson & Lowndes 2022 \(preprint\)](#)

**Openscapes Flywheel:  
Our hands-on role supporting  
NASA Openscapes Mentors**

## Engage

A Future Us mindset

### Welcome

- **ESDSWG invite**
- **Nomination form**; opt-in; sign up as pairs or trios

### Inspire

- **Storytelling & artwork**
- **Teach researchers together**
- **Slides, blogs, language for reuse**
- **Braveness** sharing details with different audiences

## Amplify

Open leaders

### Create space and place

- **Scaffolding & facilitation**: regular meetings (Cohort Calls, Coworking, Clinics, Hackdays)
- **Manage software**: Google Drive, Slack, GitHub Org, 2i2c JupyterHub, AWS Credits (remove Cloud cost), Quarto & notebooks
- **Time as part of their jobs**

### Leverage common workflows, skills, tools

- **Reuse resources from open science communities** (Posit, RLadies, Pangeo) and each other (corn, earthaccess, cheatsheets)
- **Support communicating, dev'ing rapport** in giving and receiving feedback and not having to ask where things are or to reuse

### Invest in learning and trust

- **Role-modeling** to build trust, growth mindset & psych safety via live notes, screensharing, making mistakes, sharing early
- **Teach & learn technical collab skills** w/ GitHub, 2i2c JupyterHub, Quarto, etc
- **Teaching & mentoring skills** w/ Carpentries, coaching

Empower  
Learning culture

### Work Openly

- **Promote & support live coding, tutorial review, onboarding docs, teaching dry runs**
- **Planning & organizing**
- **Support infrastructure** for Cookbook (Quarto, GitHub, Docker, 2i2c, Slack, GDrive)

[Robinson & Lowndes 2022](#)

# Communicating impact of movement building: NASA Openscapes

**“Openscapes has created a collaborative environment for DAAC staff to collectively support open science initiatives for NASA Earthdata users.** It enables us to work more openly with other DAACs toward our common goal of making the Earthdata ecosystem more accessible and inclusive. **We’ve developed awesome material to help Earthdata users** such as [workflow cheatsheets](#), a python package ([earthaccess](#)), and data recipes hosted in the cross-DAAC [NASA Earthdata Cloud Cookbook](#).

**Perhaps just as important as what we’ve done however, are mindsets we’ve grown into along the way.** It’s okay to share imperfect works in progress. The virtual environment can be conducive to laughter and connection. Ideas are not too big or too small to share. **We are better at dreaming and implementing the future together.**” –Cassandra Nickles (PO.DAAC)

## Engage

A Future Us mindset

### Create space and place

- 7 DAACs participating (Cohort Calls, Coworking, Hackdays)
- 2i2c, Quarto, Notebooks, GitHub
- Onboarding documentation - [Flywheel pub](#), [Approach Guide](#)

### Invest in learning and trust

- “I made my first pull request”
- Co-create consistent tutorials, teaching style, less reinventing
- More awareness cross-DAAC
- Coworking - eg someone brought a Q, Mentors from 4 DAACs discussed, tested in 2i2c ✨🚀

### Welcome

- Community events, talks, & blogs (ESIP [cross-gov takeaways 2022](#), [2023](#))

### Inspire ✨

- Internal workshops (DAAC staff)
- Career advancement, bringing mindset to new places
- Speaking up in other meetings (TIM, TRAIN, Cloud Playground)

### Leverage common workflows, skills, tools

- External workshops (e.g. [Cloud Hackathon](#), [Champions](#) Unis, Science Teams, SWOT, EMIT) ✨
- Connecting & consulting based on experiences (Pathfinder for 2i2c, compare w/ SMCE; AWS)
- Engaging beyond (Pangeo, Ladies of Landsat, rOpenSci, Posit, Carpentries, pyOpenSci)

## Amplify

Open leaders

## Empower

Learning culture

### Work Openly

- Reuse: tutorials, slides, art, facilitation & open practices
- [Earthdata Cloud Cookbook](#)
- [Cheatsheets](#)
- [earthaccess](#) library
- [corn](#) base image
- [Value of Hosted JupyterHubs \(White paper RFI\)](#)
- “Cheatsheets helped visualize all the steps, now we’re reducing the ‘time to science’ with earthaccess”

# Communicating impact of movement building: Openscapes

**Openscapes is a community and a movement to support kinder science for future us**

**We work with environmental and Earth science teams** in government, academia, & NGOs, including NASA Earthdata, NOAA Fisheries, California Water Boards, EPA

**“To address our climate emergency, we must rapidly, radically reshape society. We need every solution and every solver”.**

Ayana Elizabeth Johnson & Katharine Wilkinson, All We Can Save

## Engage

A Future Us mindset

### Welcome

- Art, storytelling
- Talks & keynotes

RStudio::conf, WIDS,  
NASEM, NASA, ESIP, etc

### Inspire

-  Ileana Fenwick, Eli Holmes
- **Morale** - “I’m staying in the job because of Openscapes”
- **Workforce dev, succession planning, org resilience**
- **Policy change**, NOAA GitHub
- **Forked Programs** - Pathways; Cal Water Boards; Tidepool Digital

### Create space and place

- NASA Openscapes Framework
- **Champions Program** (17x, 160 teams)
- **Mentors Community**
- **Pathways to Open Science** for Black marine scientists
- **Reflections** (upcoming May 2023)

### Leverage common workflows, skills, tools

- **Open educational resources & software**
- **Connecting open communities:** rOpenSci, RLadies, Carpentries, Pangeo, Turing Way, Black in Marine Science, BWEEMS, NCEAS, ESIP cross-gov sessions

## Amplify

Open leaders

### Invest in learning and trust;

- **Technical skill building** “I’ve saved 400 would-be emails in 4 months”
- **Teaching, mentoring, coaching skill building;** don’t have to be an expert to share what you know
- **Team building** where people have felt alone

Empower  
Learning culture

### Work Openly

- **Open educational resources** - Series, Approach Guide, Cookbook, Pathways
- **Publications** - Nature, Sci Am, Podcasts

# These impacts aren't easily measured *and that's ok.*

## Stories and Depth

- “Small numbers are important” - Dr. Yvette Pearson, [TOPS Supporting DEI in Open Science panel](#)
- Learning from other movements

## [Leverage points in systems](#) - Donella Meadows

2nd most powerful leverage point from a list of 12:

- 2. The mindset or paradigm out of which the system arises.

## Leading and lagging indicators

- Leading: Can control, can measure. Lagging: can't control
- Leading: # DAAC Mentors, # hrs deep work contributing to Cookbook & cross-DAAC collaboration.  
Lagging: # material created, workshops, users moving to the cloud. **“Engage”**: leading indicators.

# Upcoming in 2023 - the Flywheel turns again

## Champions Program - starts April 19

Remote-by-design mentorship for environmental & Earth science research teams to explore open science. **For NASA Openscapes, research teams will also spend time experimenting & planning what analytical workflows with NASA Earthdata are like in the Cloud.** Complements workshops & hackweeks.

## Our ask: personal invites to 2 DAAC science teams

Nominations by April 7; <https://nasa-openscapes.github.io/champions>

\*Please come talk with me! I have 2-pagers (and stickers!)

We're partnering with eScience to better support researchers together; **we invite folks to participate in both Openscapes Champions and eScience Hackweeks to deepen skills for modern science.** [ICESat-2](#) Aug 7-11

## Mentors Community - onboarding new Mentors in late Summer/Fall

Current Mentors aren't leaving, we're growing the community. Welcoming Mentors from new and existing DAACs! More information upcoming in summer

Benefits of joining:

- Awesome community
- Aligns with DAAC priorities
- Cross-DAAC community of expertise, tutorials, open science leadership
- Carpentries instructor training
- Access to 2i2c JupyterHub

# Thank you!
