

## Q18 In what areas do you see room for diversified treatment?

Answered: 73 Skipped: 29

## ABA Survey

#	RESPONSES	DATE
1	The actual goals selected for target; techniques for relationship and interaction.	12/10/2019 9:38 PM
2	incorporating more understanding into the foundations of setting events to the clients behaviors.	12/9/2019 9:46 PM
3	Diet, medication, exercise	11/20/2019 7:44 PM
4	Students who have experienced trauma, have anxiety or OCD, students with chromosomal exceptionalities	10/14/2019 3:14 AM
5	Research is needed to show if it's effective	10/6/2019 6:34 AM
6	Gerontology and environmental sustainability	10/5/2019 2:08 PM
7	Can be used with Students who are higher on the spectrum.	9/25/2019 12:04 PM
8	including OT and Speech as a branch of treatment	9/23/2019 7:27 PM
9	Incorporating speech and OT intervention	9/23/2019 3:58 PM
10	With trauma based clients (emotional disturbance)	9/23/2019 1:42 AM
11	Cultural aspects, physical impairments/disabilities	9/22/2019 7:11 PM
12	School	9/22/2019 12:42 PM
13	Mostly in skills' acquisition	9/22/2019 7:11 AM
14	Medication, neurology	9/21/2019 10:39 PM
15	Not sure what you mean by diversified treatment. I think ABA as a field is working on being more collaborative with other evidence based providers	9/21/2019 3:42 PM
16	?	9/21/2019 11:00 AM
17	With increased understanding we may be more successful in addressing social skill and sensory interventions if research supports the use of these treatments.	9/21/2019 10:59 AM
18	Everywhere. All ages. All skill levels. There are so many opportunities to try new things.	9/21/2019 8:12 AM
19	Communication, feeding	9/21/2019 7:06 AM
20	Everywhere. We are not very diversified in general and we have a hard time trusting anything that isn't backed by behavioral sciences.	9/20/2019 11:19 PM
21	Mindfulness practices to address social anxiety or emotional coping mechanism	9/20/2019 11:11 PM
22	Effectiveness of cognitive behavioral intervention in adulthood	9/20/2019 11:00 PM
23	Attention issues	9/20/2019 10:17 PM
24	It would be great for us to study more about the neurology of the condition. Also, it would be helpful to incorporate more CBT type interventions (in an ABA way) for our higher functioning kids. I would like for BCBAs to learn more about common comorbid conditions that many of our clients have.	9/20/2019 10:16 PM
25	More training for other disciplines on ABA.	9/20/2019 10:09 PM
26	Mental health, trauma, family struggles	9/20/2019 9:39 PM
27	Mainstream education in schools, general training for all parents	9/20/2019 9:11 PM
28	All	9/20/2019 9:09 PM
29	School	9/20/2019 9:05 PM
30	Biomedical treatments. There's more to autism than social communication and restricted/repetitive behaviors.	9/20/2019 8:54 PM
31	Through assessment, other areas of treatment are identified such as speech, O.T, P.T depending on the severity or intensity, for example Verbal behavior functional communication training could be well developed to address the communication difficulties if there are no other	9/20/2019 8:31 PM

## ABA Survey

physiological implication but the client may still require speech to address the structural aspect of the communication deficit.

32	Interdisciplinary teams. More research on adults.	9/20/2019 6:57 PM
33	When it would benefit a child to combine multiple services	9/20/2019 6:38 PM
34	Speech acquisition, sensory-oriented behaviors and processing.	9/20/2019 6:06 PM
35	Different views	9/20/2019 3:23 PM
36	Speech	9/20/2019 3:17 PM
37	All	9/20/2019 3:05 PM
38	All areas. There needs to be a team approach and BCBAs need to collab with teachers and OT and Speech and medical.	9/20/2019 3:00 PM
39	Diversified? Not sure what that means specifically. SLPs contributing, of course. OT/PT input in ABA therapy, sure. More comprehensive treatment will lead to better outcomes as long as those treatments help inform ABA therapy.	9/20/2019 2:19 PM
40	Not sure	9/20/2019 2:16 PM
41	Other professionals can assist in treating specialized issues, for example Speech Language Pathologists working on swallowing or fine articulation issues. Other professionals may have insight into certain issues that are beyond the scope of ABA such as neurological issues, biological/medical issues, or psychological and psychpharmacological issues.	9/20/2019 2:12 PM
42	I do know	9/20/2019 2:11 PM
43	Behavior support plans	9/20/2019 2:04 PM
44	OCD tendencies, sensory sensitivities and social skills	9/20/2019 1:56 PM
45	much more consideration of neurological/medically related aspects of autism	9/20/2019 1:47 PM
46	Speech, Occupational therapy (NOT sensory), Physical therapy and Medical.	9/20/2019 1:41 PM
47	There needs to be an open mind to other treatments like animal therapy and music therapy	9/20/2019 1:26 PM
48	More understanding of development to further the efficacy of treatment at various life stages is needed. Especially over age 6	9/20/2019 12:51 PM
49	Not sure	9/20/2019 12:51 PM
50	Any and all	9/20/2019 12:49 PM
51	In both home-based and school settings	9/20/2019 12:42 PM
52	Socialization and sensory aspects	9/20/2019 12:19 PM
53	Multi-modal assessment including quality of life, biological factors, environmental factors, and psychological factors	9/20/2019 12:12 PM
54	Language w speech	9/20/2019 12:11 PM
55	School plans	9/20/2019 12:09 PM
56	Social skills, coping strategies, parent training	9/20/2019 12:02 PM
57	Speech and OT services	9/20/2019 12:01 PM
58	Functioning levels	9/20/2019 11:55 AM
59	More studies on adults with intellectual disabilities and squally diagnoses clients	9/20/2019 11:49 AM
60	community intergration	9/20/2019 11:48 AM
61	In all areas	9/20/2019 11:37 AM
62	Other environments, such as school, hospitals, and treatment facilities. BCBAs do not "own" any space outside of ABA clinics, so it is a good idea to become used to the idea of collaboration.	9/20/2019 11:36 AM

## ABA Survey

63	age differences	9/20/2019 11:34 AM
64	Compassion	9/20/2019 11:29 AM
65	I think there are a lot of avenues for diversified treatment, including speech language pathologists, occupational therapists, physical therapists, feeding specialists, neuroscientists, and psychologists.	9/20/2019 11:29 AM
66	I would like ABA to consider the different neurological development of kids living with ASD.	9/20/2019 11:22 AM
67	Cases involving mental health clients.	9/20/2019 11:21 AM
68	across all settings and skills	9/20/2019 11:17 AM
69	Psychological services, medical services	9/20/2019 11:13 AM
70	Implementing service components	9/20/2019 11:12 AM
71	Working closer with other professionals	9/20/2019 11:12 AM
72	Early intervention	9/20/2019 11:10 AM
73	Teenage and adult services need to be improved with consultation with other agencies that provide services long term.	9/20/2019 11:09 AM
