

## Foreword to the use of the distributed materials

Dear colleagues,

We are very happy to share with you the **EmoHI** recordings, which we hope will be useful for your research.

The materials made available here are from the study by Leanne Nagels, Etienne Gaudrain, Deborah Vickers, Marta Matos Lopes, Petra Hendriks, Deniz Başkent, “Development of vocal emotion recognition in school-age children: The EmoHI test for hearing-impaired population” published in 2020 in *PeerJ* (10.7717/peerj.8773).

Creating such materials is no small task. We have spent a great deal of time, effort and resources to design the materials, recruit suitable speakers, record the materials, edit the recordings and make them available here. Hence, we would appreciate if you could consider the following terms before using them:

1. Please **send us a short summary** explaining the intended purpose of these materials, along with the names of researchers who will make use of them. You can do so by simply sending an email to Pr. Deniz Başkent <[d.baskent@rug.nl](mailto:d.baskent@rug.nl)>. We are very interested in knowing what you will do with our materials!
2. We would appreciate it if you **do not distribute these materials to other researchers or projects directly, but instead point to the source**. This also applies to processed versions of these stimuli. If you receive such requests, please direct them to us or to the website you downloaded them from. The materials are distributed under a Creative Commons license, which allows redistribution. However, by always going back to the original source, it is guaranteed that the whole set is being distributed, and if any error has been spotted in the meantime, the repository will have been updated.
3. Please make sure you **cite the following references** in each publication using these materials:
  - a. Nagels L., Gaudrain E., Vickers D., Matos Lopes M., Hendriks P., Başkent D. (2020) “Development of vocal emotion recognition in school-age children: The EmoHI test for hearing-impaired population” *PeerJ*, doi: 10.7717/peerj.8773
  - b. Nagels L., Gaudrain E., Hendriks P., Başkent D. (2023) “EmoHI: Emotion test for hearing-impaired population”. Version 2. *Zenodo*, doi: 10.5281/zenodo.7997063

Note that referencing the authors is not just a courtesy, it is a requirement of the Creative Commons license the materials are distributed under.

4. The materials are only available **for academic research purposes**. Any commercial use of the materials is prohibited by the license. If such a need arises, please contact us.
5. Since we are very interested in your research, please send us any publication resulting from the use of the materials. We would like to keep track of the use of the materials and will publish this information on our lab website for all to see.
6. The materials are distributed as is, without any form of guarantee. The University of Groningen, the University Medical Center Groningen, the Department of Otorhinolaryngology, and the researchers associated with these materials cannot be held responsible for faulty use of the data. We are also not able to provide any technical support, but you can of course always contact the authors if you have questions about the materials.
7. By downloading these materials, you agree to have read and understood all terms listed here and stipulated by the license.

Wishing you all the best in your research!
