

SeasFire DataCube version 0.3

General Information: Variables have been added since the previous version. Many variables have been updated and others fixed. Now the total number of **variables** is **59**. The changes include:

Updates (this concerns the attributes only)

- oci_nao
- Coordinates

Added variables

- Biomes (<https://ecoregions.appspot.com/>)
- Arctic Oscillation index – (<https://psl.noaa.gov/data/climateindices/list/>)
- Soil Water Levels 2, 3, 4 (swlv2, swlv3, swlv4) - (<https://cds.climate.copernicus.eu/cdsapp#!/dataset/reanalysis-era5-single-levels?tab=overview>)

Fixed

- oci_epo (corrected December months of -99.90 to nan)
- oci_pdo (corrected 2021 months of -99.90 to the valid value)
- gwis_ba_valid_mask (changed the last weeks of 2020 to non valid)
- Ssrd (2020-2021, corrected aggregation)

| Full name | DataArray name | Unit | Contact * |
|--|----------------|--------|-----------|
| Dataset: ERA5 Meteo Reanalysis Data | | | |
| Mean sea level pressure | mslp | Pa | NOA |
| Total precipitation | tp | m | MPI |
| Relative humidity | rel_hum | % | MPI |
| Vapor Pressure Deficit | vpd | hPa | MPI |
| Sea Surface Temperature | sst | K | MPI |
| Skin temperature | skt | K | MPI |
| Wind speed at 10 meters | ws10 | m*s-2 | MPI |
| Temperature at 2 meters - Mean | t2m_mean | K | MPI |
| Temperature at 2 meters - Min | t2m_min | K | MPI |
| Temperature at 2 meters - Max | t2m_max | K | MPI |
| Surface net solar radiation | ssr | MJ m-2 | MPI |
| Surface solar radiation downwards | ssrd | MJ m-2 | MPI |
| Volumetric soil water level 1 | swvl1 | m3/m3 | MPI |
| Volumetric soil water level 2 | swvl2 | m3/m3 | MPI |
| Volumetric soil water level 3 | swvl3 | m3/m3 | MPI |
| Volumetric soil water level 4 | swvl4 | m3/m3 | MPI |
| Land-Sea mask | lsm | 0-1 | NOA |
| Dataset: Copernicus | | | |
