

Dataset Metadata

Title

Perception and Utilization of AI-Powered Tools in Dental Education

Description

This dataset contains responses from participants regarding their awareness, knowledge, and perceptions of AI-powered tools in dental education. The data was collected during May-June 2023 to investigate the potential enhancement that AI can bring to dental education. The dataset includes variables related to participants' demographics, experiences, perceptions, and opinions.

Details in the published protocol by Uribe, S. E., & Maldupa, I. (2023, June 2). Chatbots In Dental Education - Research Protocol. <https://doi.org/10.17605/OSF.IO/3BSG2>

Authors

Sergio E. Uribe (1, 2, 3, 10); Ilze Maldupa (1); Argyro Kavadella (4); Maha Tantawy (5); Akhilanand Chaurasia (6, 10); Margherita Fontana (7); Rodrigo Marino (8); Falk Schwendicke (9, 10).

Data Access

The dataset can be accessed and downloaded from the following link: [Insert link to the dataset file]

Data Format

The dataset is provided in CSV (Comma-Separated Values) format. Each row represents a participant, and the columns contain the variables and corresponding data.

Data Size

[428 × 27] (S3: spec_tbl_df/tbl_df/tbl/data.frame)

Data Quality

The data has been reviewed for quality assurance, including data validation and cleaning processes. However, it is advised to carefully review the codebook and metadata before utilizing the data for analysis.

Data Documentation

The dataset is accompanied by a codebook file, which describes the variables, their definitions, and possible values. Referring to the codebook for a comprehensive understanding of the dataset is recommended.

Funding

Uribe was supported by European Union's Horizon 2020 grant agreement 857287 for the Baltic Biomaterials Centre of Excellence, Headquarters at Riga Technical University, Riga, Latvia
