

SPLEEN

SECONDARY AND LEAKAGE FLOW EFFECTS IN
HIGH-SPEED LOW PRESSURE TURBINES

von KARMAN INSTITUTE
FOR FLUID DYNAMICS

SAFRAN

AIRCRAFT ENGINES

SPLEEN-HSTC-DB_Acknowledgements

This document is part of an open-access database of experimental data of the flow in a high-speed low-pressure turbine cascade.

The data have been collected at the von Karman Institute for Fluid Dynamics (Belgium) in the period 2018-2022 within the H2020 Clean Sky 2 SPLEEN project.

This project has received Funding from the European Union's Horizon 2020 research and innovation programme under the grant agreement No 820883

ACKNOWLEDGMENTS

We want to acknowledge and thank a long list of people that, up to this point, have significantly contributed with their work and dedication to the SPLEEN project and to the realization of this database. In alphabetical order:

Aude	Lahalle
Bogdan C.	Cernat
Cedric	Uribe
Christelle	Debeer
Davide	Miglio
Deniz	Develi
Elissavet	Boufidi
Eugene	Bryan
Fabrizio	Fontanello
