

Plastics Fate and Effects in the Human Body

Summary of Deliverable Number: D7.4
Deliverable Title: Common Dissemination and Communication
Strategy for the Cluster

WP7: Scientific Coordination and Operational Management
Lead Beneficiary: OPTIMAT
Dissemination Level: Confidential
Month: 30-09-2021

Deliverable Information

| | | |
|------------------------------------|---|------------------------------|
| Project title: | Plastics fate and effects in the human body | |
| Project acronym: | PlasticsFatE | |
| Grant Agreement No: | 965367 | |
| Coordination: | OPTIMAT Ltd | |
| Project start date: | May 2021 | Project Duration: 48 months |
| Project website: | https://www.plasticsfate.eu | |
| Deliverable No: | D7.4 | Deliverable Date: 30-09-2021 |
| WP No: | 7 | |
| WP Title: | Scientific Coordination and Operational Management | |
| Lead Beneficiary: | OPTIMAT | |
| Authors and institute short names: | Lesley Tobin OPTIMAT PlasticsFatE Mark Morrison OPTIMAT PlasticsFatE Rudolf Reuther ENAS PlasticsFatE DECHEMA, PlasticsFatE Food Packaging Forum, AURORA Health & Env. Alliance, POLYRISK MOVERIM, ImpTox OPTIMAT, PlasticsFatE Promoscience, ImpTox UAB, PlasticHeal UMC Utrecht, AURORA | |
| Dissemination level: | Confidential | |

Summary of Deliverable No. 7.4

Deliverable Title: Common Dissemination and Communication Strategy for the Cluster

Introduction

This document provides a summary of D7.4, which is a confidential deliverable within the scope of PlasticsFatE. This summary contains the essential details of the original deliverable. In compliance with intellectual property protection, no confidential information is given.

Summary

The Micro-and Nanoplastics Cluster—now known as CUSP “The European Research Cluster to Understand the Health Impacts of Micro-and Nanoplastics” -has been formed to facilitate collaborations between five research projects funded under Horizon 2020, the EU Framework Programme for Research and Innovation, SC1-BHC-36-2020 -Micro-and nanoplastics in our environment: Understanding exposures and impacts on human health.

These initiatives are working together to enhance impact by synergizing communication and dissemination strategies, and sharing expertise such as analytical methods, exposure assessments, inter-lab comparisons, representative materials, and data exchange. The cluster will also collaborate closely with the JRC, and annual cluster meetings will be organized to report on joint activities within and beyond the cluster.

This document describes the CUSP Common Dissemination and Communication Strategy(henceforth termed ‘CDP’ –Communication and Dissemination Plan), developed as a common deliverable of the five CUSP projects.
