

FAIRsharing for you: librarians, trainers, data stewards

Helping you to help researchers on their FAIR journey

FAIRsharing helps you to ...

- 1 promote standards and databases that enable FAIR data* management practices

- 2 grow your knowledge of the resource landscape to drive your decisions and activities

- 3 enrich your guidance and training for researchers with FAIRsharing educational material

FAIRsharing supports you to:

 **Inform** your activities and decisions on appropriate databases and standards for each discipline and data type, providing you with a global view of their coverage, life cycle status, and relationships

 **Enhance** your guidance and training for researchers with examples of generic and discipline-specific resources to describe and share (meta)data

 **Enable** FAIR data management and reproducible research, and help researchers fulfil data management policy and follow guidance

To support FAIRsharing you can:

 **Endorse** it as a trusted informative and educational resource on the evolving landscape of databases and standards

 **Signpost** it to increase awareness, use and value of these resources, their availability, scope and role in FAIR and good data management

 **Encourage** researchers to use the FAIRsharing DOIs to cite resources in their Data Management Plans and manuscripts

 **Join** the FAIRsharing Community Champions programme**, gaining recognition, professional development, and influence

Reach out to FAIRsharing to co-create and expand your guidance and training material

* data and metadata for **datasets, software, materials** and **other digital objects**
