

# Who is using Knowledge Graphs in NFDI?

AN OVERVIEW BY THE WORKING GROUP "KNOWLEDGE GRAPHS"

Fidan Limani<sup>1</sup>, Renat Shigapov<sup>2</sup>, Auriol Degbelo<sup>3</sup>, Sonja Schimmler<sup>4</sup>, Benjamin Zapilko<sup>5</sup>, Lozana Rossenova<sup>6</sup>, Stefan Dietze<sup>5</sup>, Konrad U. Förstner<sup>7</sup>, Saurav Karmakar<sup>5</sup>, Andreas Czerniak<sup>8</sup>.

*The NFDI Working Group "Knowledge Graphs" (WG KGs) promotes the use and creation of knowledge graphs in NFDI as a key technology for ensuring interoperability for both humans and machines. The members of the WG meet regularly to share knowledge about KG creation and use, as well as to develop KG-based basic service proposals for Base4NFDI. In this poster we describe the activities of this WG and share our ongoing overview of the KGs in NFDI.*

## PROFILE

- Aims:
  - Improve FAIRness of NFDI data
  - Improve the interoperability with national and international research data infrastructures
  - Contribute to the development of KG tools and services
- Members:
  - 56 members representing 22 NFDI consortia (and counting)
  - 94 subscribers to the WG's mailing list

## ACTIVITIES

- Promote the use and creation of KGs to ensure interoperability
- Survey – collect, discuss, publish, and exchange practices concerning multiple aspects of KG adoption in the NFDI:
  - Technology and design considerations
  - Services support
  - Added value, risks, and lessons learned
  - Connection to external KG projects, etc.
- Work on proposals and recommendations for KG-based service in the NFDI context

## OUTLOOK & FUTURE WORK

- **Success criteria:** act as a "one-stop-shop" catalog of previous KG implementations that NFDI members can consult before engaging in KG adoption tasks
- Continue to survey the KGs in NFDI, the software (stack) or technology used to implement them
- Identify synergies and potential collaborations across different NFDI consortia
