# FAIR DATA

KB } nationale bibliotheek

DEUTSCHE  
NATIONAL  
BIBLIOTHEK

Well, not entirely... One small country of indomitable Belgians still hold their metadata. And life is not easy for those who have to garrison the fortified data silos either.

Data model - RDF and Wikibase

Data integration

Data governance

Data access

# From Silos to FAIR: Strengthening Belgian Cultural Heritage with a Wikibase-driven Research Data Infrastructure

# Data gap - problem and envisioned solution

Data model - RDF and Wikibase

Data integration

Data governance

Data access

# Data about Belgian entities related to cultural heritage?

## Regional:

Different cultural heritage institutions in both Dutch-speaking *Flanders* and French-speaking *Fédération Wallonie-Bruxelles*

## National:

Ten Federal Scientific Institutes with multilingual data from which five in the field of Cultural Heritage

## International:

Institutions in neighboring countries with the same languages

Data aggregators like OCLC or Europeana

Cultural Heritage

Royal Museums  
of Fine Arts of Belgium

ROYAL MUSEUMS OF ART AND HISTORY  
KONINKLIJKE MUSEA VOOR KUNST EN GESCHIEDENIS  
MUSÉES ROYAUX D'ART ET D'HISTOIRE

Each institution has its own type of collections and speciality:  
good use case for *decentralized data* due to **different domain models**

# Duplicate data of shared entities leads to problems

# KBR

Royal Institute for  
Cultural Heritage

Royal Museums  
of Fine Arts of Belgium

ROYAL MUSEUMS OF ART AND HISTORY  
KONINKLIJKE MUSEA VOOR KUNST EN GESCHIEDENIS  
MUSÉES ROYAUX D'ART ET D'HISTOIRE

**Duplicate efforts** to curate data about entities

Varying quality and correctness of data

+ efforts for data consumers  
to integrate and identify/fix  
inconsistencies

# Shared entity management with open source software and FAIR data

# KBR

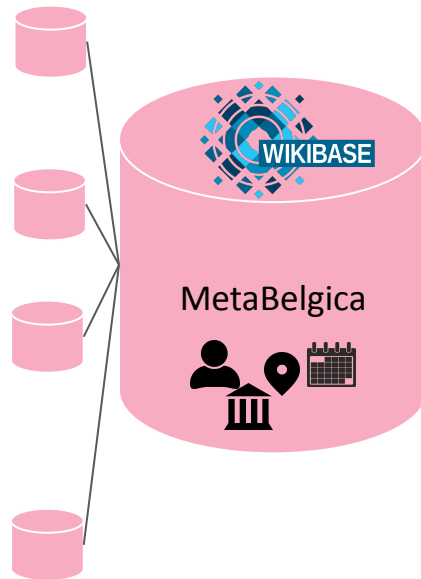

Royal Institute for  
Cultural Heritage

Royal Museums  
of Fine Arts of Belgium

ROYAL MUSEUMS OF ART AND HISTORY  
KONINKLIJKE MUSEA VOOR KUNST EN GESCHIEDENIS  
MUSÉES ROYAUX D'ART ET D'HISTOIRE

Coordinated data management  
for enriched data of high quality

Persistent identifiers and a single  
trustworthy source for users

# MetaBelgica: A shared entity management between Federal Scientific Institutes

## Entity types

persons, organizations, time/events, locations

## Project duration

2023 - 2026

## Technologies

Resource Description Framework (RDF, Linked Data), Wikibase

## Follow-up committee

Metadata experts

Domain experts / Stakeholders

Data gap - problem and envisioned solution

**Data model - RDF and Wikibase**

Data integration

Data governance

Data access

# Desk research, workshops and data analysis

## Currently used data standards and guidelines

Which data formats are used, any third-party identifiers?

E.g. 53% of KBRs 900k person authorities have an International Standard Name Identifier (ISNI), 70% of our known Belgians

## Current cataloging practices

When and how are new entities created?

How are entities linked?

## Analyze data (samples) to determine data integration strategy

Legacy data of only text, duplicate data, pseudonyms, ...

# Reuse existing RDF-based data models (examples)

<https://joinup.ec.europa.eu/collection/oslo-open-standards-linked-organisations-0>

# Planned iterative data integration based on data quality

Royal Library  
of Belgium

Royal Museums  
of Fine Arts

Royal Institute for  
Cultural Heritage

Royal Museums  
of Art and History

(1) Knowledge Graph Construction with a Human-In-The-Loop for high quality data

(2) Manual data curation supported by reconciliation for lower quality data

Data gap - problem and envisioned solution

Data model - RDF and Wikibase

Data integration

**Data governance**

Data access

# Data governance for MetaBelgica

After the initial data integration, how to keep the data in sync?

Which data fields should be common?

How to deal with changes?

How to respect/align the different cataloging guidelines?

Organizational structures: Also link people, not just data

Synthesize different **guidelines**

Part of desk research and workshops when creating a common data model

Integrate the operation of MetaBelgica in **daily curations tasks** of each institution

Create documentation of usage in NL/FR

Organize internal trainings

Investigate the inception of a **governance and editorial board**

Formalize collaboration and promote platform

# Support governance with technical components

## **Wikibase** as back-end to curate common data

Having Wikibase in the first place helps, because non-technical personnel can curate and integrate data

## **Semi-automatic means** to keep local databases and MetaBelgica in sync

E.g. weekly report about difference between local and shared which can be used to keep the data clean and aligned

Data gap - problem and envisioned solution

Data model - RDF and Wikibase

Data integration

Data governance

**Data access**

# In general: different possibilities of access

Data dumps in common formats such as CSV or different RDF serializations

Application Programming Interfaces (APIs) or query interfaces such as SPARQL or Linked Data Fragments

Web platform with user interface

# Which data to access by whom?

We will survey possible stakeholders

Identify the **needs of our users** and building up a user base in the first place

Which **data fields** to **share** among partners and which to make public

Part of data governance that touches upon policies like the GDPR

Data gap

Fill the Belgian gap with FAIR data shared by the partners

Data model

RDF for interoperability + Wikibase as a platform

Data integration

Different integration strategies: semi-automatic + manual

Data governance

Organizational and technical

Data access

As open as possible, as closed as necessary

# From Silos to FAIR: Strengthening Belgian Cultural Heritage with a Wikibase-driven Research Data Infrastructure
