National Open Access Monitor Survey: Organisational Identity

Introduction

Introduction

This survey is carried out under the National Open Access Monitoring project, funded by Ireland's National Open Research Forum (NORF) under the NORF Open Research Fund 2022 to address one of the six priority actions of Ireland's *National Action Plan for Open Research 2022-2023.*

This survey is for Research Performing Organisations, Research Funding Organisations and Publisher stakeholders of the National Open Access Monitor.

The purpose of this survey is to empower stakeholders to self-identify how their entities will be represented in the National Open Access Monitor.

The survey expects one response from each stakeholder entity. If multiple responses are obtained and inconsistencies occur, the Project Manager will follow up directly with respondents to clarify. To view a reference PDF of this survey, please click here [###].

Throughout this survey:

- The National Open Access Monitor, Ireland will be referred to as *the Monitor.*
- Research Performing Organisations will be referred to as *RPOs* and Research Funding Organisation will be referred to as *RFOs.*
- Persistent Identifiers will be referred to as *PIDs.*

The sections of this survey are:

1. Consent
2. Survey Respondent Identification
3. Potential Survey Skip Point [for Publishers]
4. RPO and RFO Dashboards
5. RPO and RFO Identification
6. RPO and RFO Categorisation
7. Publicly Funded Organisations/Entities
8. Affiliated Organisations/Entities
9. Persistent Identifiers (PIDs): RPOs and RFOs
10. Publisher Branching [end survey for non-Publishers]
11. RPO/RFO Publisher Identification
12. Persistent Identifiers (PIDs): RPO/RFO Publishers
13. Publisher Identification
14. Persistent Identifiers (PIDs): Publishers
15. Optional: RPO Identity Supplement
16. Submit Survey

This survey is open until COB 31st October 2023.

Please note: all survey data will be retained and hosted on a third party (Online Surveys) server and not on a MU server. For more information on how and why this survey data is being collected, and how it will be managed, please refer to the Stakeholder Information Sheet and Consent Form.

Your submission may be paused at any time by pressing "Finish Later". Respondents who click on the "Finish Later" link are taken to a page giving the survey's closing date and a 'finish later' URL. This URL can be used to return to the survey at the page on which you clicked the 'Finish later' link. The URL can be either bookmarked in your browser, or you will be asked if you would like the URL to be emailed to you.

A download of your responses will be available to you on completion.

If you decide to take part, you are still free to withdraw at any time without giving a reason and/or to withdraw your information up until such time as the contributions are actioned upon for the development of the National Open Access Monitor. The deadline to withdraw a submission from this survey is **COB 8th November 2023.**

If you have any questions relating to this survey, or require assistance in filling it out, please contact Dr Catherine Ferris (National Open Access Monitor Project Manager): Catherine.ferris@mu.ie

Consent

Formal contributors to the National Open Access Monitor Project (e.g. through stakeholder surveys like this) are required to complete and return a consent form **in advance of contributing.** This is a requirement of the Maynooth University Research Ethics Procedure.

If you have not yet completed a consent form:

1. stop here
2. complete the consent form, available at this link
3. return it to catherine.ferris@mu.ie
4. and then return to this survey.

Important: if the date/time of the survey response precedes the date/time that the consent form is received, the survey response will be **immediately deleted**.

If you have completed the consent form (an image of the first page is below as a reminder), please select *yes* below and continue.

National University
of Ireland Maynooth

Information Sheet

Purpose of the Study. I am Dr Catherine Ferris, IReL Open Scholarship Officer (Maynooth University) and Project Manager of the National Open Access Monitor Project, funded by the National Open Research Forum.

This project will develop a monitor for open access at the national level, initially through pilot reports and a national dashboard to publish, analyse and track progress towards 100% open access. The key objectives and expected outcomes are to:

- Work to arrive at a community-agreed definition for Open Access at the national level
- Build on previous NORF work, engaging with national stakeholders (DFHERIS, NORF, NORF 2022 Open Research Fund projects, HEA, research funding organisation, research performing organisations, national research infrastructures, publishers etc.) to gather and validate user requirements for Open Access monitoring
- Work with external vendors to deliver reports and a national dashboard to help Ireland publish, analyse and track open access rates at the national level.
- Document challenges that should be addressed in long-term monitoring solutions and recommend steps to be taken, including workflows for data validation and enrichment.
- Work to improve the quality and depth of data used for the national dashboard in line with international best practice through stakeholder collaboration with institutions, funders etc. and direct input or validation where possible.
- Following NORF and Science Europe recommendations, ensure that the monitor uses data and bibliographic databases that are openly accessible, is built using open infrastructure, and is publicly accessible to view and analyse.

A copy of the Project Plan is available here: https://doi.org/10.5281/zenodo.7331432

What will the study involve and what information will be collected?
Participants will be asked to provide input and contribute as representatives of stakeholder entities, over the course of the two-year project (1 November 2022-1 November 2024), in the following areas:

- to arrive at a community-agreed definition for Open Access in this context at the national level
- to validate, and if required expand on, the user stories and functional requirements of the National Open Access Monitor identified by the NORF OA Monitoring Policy Brief Group. These functional requirements should explicitly state current OA reporting metrics for each stakeholder, required data points and potential future requirements.
- to monitor and track the costs associated with contributing to this project and to provide this data to the Project Manager, for inclusion in the final report to the funder, in a pseudonymised format (to the high-level stakeholder group) to demonstrate the cost of this work to the national research system.
- to provide metadata and persistent identifiers as required, to enable the successful delivery of the pilot dashboard
- to provide feedback on the pilot dashboard
- if necessary, to work with the Project Manager to determine the impact of vendor non-deliverables
- to work with the Project Manager to identify gaps, incomplete representation, or errors in pilot data.
- to work to improve the quality and depth of data used for the national dashboard.

1. Have you completed the National Open Access Monitor Project Stakeholder Consent Form, and returned it to catherine.ferris@mu.ie? ✱ *Required*

○ Yes
○ No

Consent Disclaimer

The National Open Access Monitor Project Stakeholder Consent Form allows participants to choose to be pseudonymised, if you would rather your contribution was not publicly attributed to you and your organisation/entity.

However, due to the nature and purpose of this survey on Organisational Identity, the **identity of your organisation/entity cannot be pseudonymised**. Therefore, while your name will remain pseudonymised, it will be evident that a representative of your organisation/entity contributed to this survey.

- If you chose pseudonymisation in the consent form, and are happy to continue with this survey under these conditions, please continue.
- If you chose pseudonymisation in the consent form, and are **not** happy to continue with this survey under these conditions, please stop here and forward this survey onto another person in your organisation/entity to complete.

Survey Respondent Identification

2. Your name ✻ *Required*

3. Your department ✻ *Required*

4. Your job title ✻ *Required*

5. Your email address (the Project Manager may need to follow-up with you on your responses. Your email address will not be made public.) ✻ *Required*

Please enter a valid email address.

6. The name of the organisation/entity that you represent ✻ *Required*
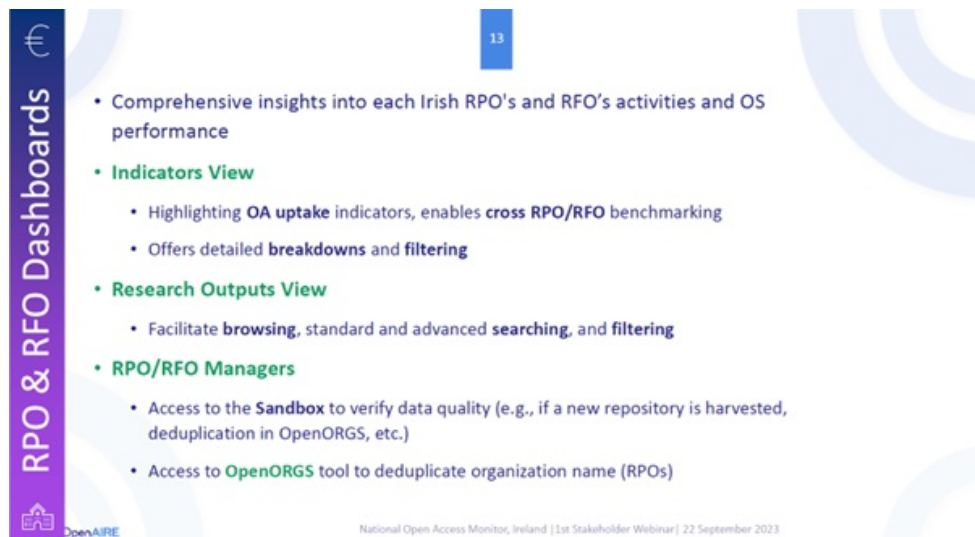

Potential Survey Skip Point

7. Questions 8-30 are applicable for RPOs and RFOs only, and are not applicable to Publishers. If your organisation/entity is a Publisher (and not also an RPO/RFO), then please indicate below and the survey will skip directly to the Publisher Persistent Identifier section of the survey ✱ *Required*

○ My organisation/entity is a Publisher

○ My organisation/entity is an RPO; an RFO; an RPO & RFO; an RPO & Publisher; an RFO & Publisher; or an RPO, RFO & Publisher

RPO and RFO Dashboards

The National Open Access Monitor will include dashboards for each RPO and RFO.

The dashboards will be automatically created for all Irish organisations/entities represented in the OpenAIRE Graph metadata: https://graph.openaire.eu/docs/data-model/entities/organization

The questions in this section are to:

1. ensure we have a complete list of Irish RPOs and RFOs
2. ensure that we can identify organisations/entities missing from the OpenAIRE Graph metadata
3. ensure each organisation/entity is categorised correctly as RPO or RFO as applicable.

In the next section, please select the organisation/entity you represent, and indicate if it is an RPO, an RFO, both an RFO and RPO, or neither.

RPO and RFO Identification

8. Select the name of the organisation/entity you represent (listed in alphabetical order) ✱ *Required*

RPO and RFO Categorisation

9. Please indicate if your organisation/entity is an RPO, an RFO, both an RFO and RPO, or neither. ✱ *Required*

○ RPO

○ RFO

○ RPO and RFO

○ neither RPO nor RFO

Publicly Funded Organisations/Entities

As per the <u>tender</u> requirements, the Monitor must identify publicly funded research outputs.

Item	Requirement	Mandatory / Desirable
B1	The Monitor **MUST** show to what extent Irish scholarly publications resulting from publicly funded research are immediately openly available by default and are accessible on an ongoing basis. Publicly funded in this context is defined as "Publicly funded research is research undertaken in whole or in part via publicly funded resourcing or remuneration, e.g., salaries, grants, contracts, etc."	M

Publicly funded, in this context, has been defined in the <u>National Action Plan for Open Research 2022-2030</u>.

---

20 Publicly funded research is research undertaken in whole or in part via publicly funded resourcing or remuneration, e.g. salaries, grants, contracts, etc.

Therefore, it is expected that the following will be identified as "publicly funded" research outputs in the Monitor:

- Irish scholarly publications by staff of organisations/entities which are partially or fully publicly funded; and
- Irish scholarly publications, partially or fully funded by publicly-funded Irish funders

In the next question, please identify if your organisation/entity is in receipt of public funding.

10. Is your organisation/entity in receipt of public funding? To note: if your organisation/entity is *partially* funded by public funding and *partially* funded by other means, select yes. ✳ *Required*

    ◯ yes

    ◯ no

Affiliated Organisations/Entities

It is acknowledged that many research organisations/entities in Ireland are formally affiliated, either as parent/child entities under a parent legal entity, or due to formal research agreements which mean that research outputs from Entity A should also be attributed to Entity B. It is expected that in the Monitor, these relationships will be reflected in the following way: the research outputs of Entity A will appear on the dashboard of Entity A and also on the dashboard of Entity B. **Your input is needed here**, as the experts in the complex legal relationships your organisation/entities has, to define the appropriate representation of those organisations' research outputs in the Monitor.

There are multiple scenarios which may be represented by the Monitor:

- one-to-one relationships: e.g. *Research Centre, which is a Research Performing Organisation, but is not a legal entity. That Research Centre sits under a Higher Education Institution, which is the legal entity for the Research Centre. In this example, the Research Centre will have a RPO dashboard, and the research outputs of the Research Centre will also appear in the Higher Education Institution dashboard.*
- one-to-many relationships: *e.g. two Research Centres, both Research Performing Organisations, but not legal entities. Those two Research Centres sit under one Higher Education Institution, with is the legal entity for the Research Centres. In this example, both Research Centres will have RPO dashboards, and the research outputs of both Research Centres will also appear in the Higher Education Institution dashboard.*
- Many-to-many relationships: e.g. *Research Centre, which itself is a Research Performing Organisation, but is not a legal entity. That Research Centre sits under a Higher Education Institution, which is the legal entity for the Research Centre. This Higher Education Institution also has a research agreement with a hospital. The same hospital also has a research agreement with Higher Education Institution 2. In this example, the Research Centre will have a RPO dashboard, and the Hospital will have an RPO dashboard, the research outputs of the Research Centre will also appear on the dashboard of Higher Education Institution 1, and the research outputs of the Hospital will also appear in the applicable Higher Education Institution 1 dashboard, or Higher Education Institution 2 dashboard.*

 - ▫

One-to-One Relationship:

One-to-Many Relationship:
Many-to-Many Relationship:

These examples are not exhaustive, but are indicative examples to help you complete the following section.

Important:

1. This survey expects responses from **each entity** in the one-to-one, one-to-many, and many-to-many relationships. **Only where all entities agree there is a formal relationship in place** that should be reflected in the Monitor will the link be implemented. To enable this verification process, please forward this survey to the relevant staff within the other entities for them to complete.
2. This section of the survey is to represent relationships of RPO-to-RPO and RFO-to-RFO, not RPO-to-RFO; research outputs of an RPO funded by an RFO will appear in both dashboards automatically (metadata dependent).
3. This section of the survey is not intended to capture the multiple affiliations of individual researchers associated with your organisation/entity. If an individual researcher is affiliated with HEI 4 and HEI 40, their research outputs will appear in both HEI dashboard 4 and HEI dashboard 40 automatically (metadata dependent).

11. Please indicate: ✱ *Required*

○ My organisation/entity is formally affiliated with another organisation/entity

○ My organisation/entity is not formally affiliated with another organisation/entity

Affiliated Organisations/Entities (Part 2)

12. Please select the other organisation(s) and/or entities that your organisation/entity is formally affiliated to, either as parent/child entities under a parent legal entity, or due to formal research agreements, as part of a one-to-one, one-to-many or many-to-many relationship (listed in alphabetical order) To note: do not enter *your* organisation here, you've already selected your organisation in Question 8. ✱ *Required*

12.a. If the affiliated organisation(s) and or entities are not listed here, please provide a list of the full names of those organisations/entities, separated by semicolons (no spaces):

[text box]

13. Please indicate: ✽ *Required*

- ○ I expect the research outputs of the selected organisation(s)/entities to appear in my organisation's/entity's dashboard
- ○ I expect the research outputs of my organisation/entity to appear in the selected organisation(s)'/entities'

dashboard(s)

○ Both

If you selected Both:

13.a. For "I expect the research outputs of the selected organisation(s)/entities to appear in my organisation's/entity's dashboard", please list the selected organisation(s)/entities this applies to

```

```

13.b. For "I expect the research outputs of my organisation/entity to appear in the selected organisation(s)'/entities' dashboard(s)", please list the selected organisation(s)/entities this applies to

```

```

14. Please indicate if, to the best of your knowledge, your organisation/entity is one entity in a many-to-many relationship (see description at the start of this section), as this will require additional analysis to ensure that research outputs are attributed to the correct RPOs. ✱ *Required*

○ yes

○ no

○ don't know

15. If your organisation/entity is formally affiliated with another organisation/entity, and that relationship is not captured in the survey questions above, please provide details here, and give your expectation for how affected research outputs should be represented in the Monitor dashboards

```

```

Persistent Identifiers (PIDs): RPOs and RFOs

The tender requirements for the Monitor specified that the vendor must (*at a minimum*) use PIDs to identify Irish scholarly publications:

The Monitor will be built using open data from the OpenAIRE Graph:

This section is to capture the PIDs that represent RPOs and RFOs that will be represented in the Monitor, to enable OpenAIRE to query the OpenAIRE graph using those PIDs and identify research outputs associated with your organisation/entity.

Please supply the most comprehensive listing of identifiers that you have available to you. When providing lists, please provide the PIDs separated by semicolons (no spaces) (e.g. 8798;8849)

If your organisation is one organisation/entity in a one-to-one, one-to-many, or many-to-many relationship, please only supply the PIDs that identify your discreet RPO/RFO organisation/entity. To enable a comprehensive collation of relevant PIDs for this process, **please forward this survey to the relevant staff within the other affiliated organisations/entities** for them to complete their PID submission.

Optional: RPO Identity Supplement

OpenAIRE provide the option for RPOs to enhance the representation of their organisation/entity by supplementing the OpenAIRE Graph metadata with data from their organisation's/entity's CRIS and/or Institutional Repositories.

If your RPO would like to participate in this optional action, please provide the name, system name and URL of your Institutional Repository and/or CRIS (as applicable) next.

Providing this information does not obligate your organisation/entity to register your system with OpenAIRE as part of the Monitor project. This information is being captured at this point to assist OpenAIRE in identifying existing and potential integration points for this optional enhancement activity.

Please skip this question if not applicable.
